

CENSUS

OF THE COMMONWEALTH OF

MASSACHUSETTS:

1895.

PREPARED UNDER THE DIRECTION OF

HORACE G. WADLIN,

CHIEF OF THE BUREAU OF STATISTICS OF LABOR.

VOLUME V.

MANUFACTURES.

BOSTON:

WRIGHT & POTTER PRINTING CO., STATE PRINTERS,

18 POST OFFICE SQUARE.

1898.

TABLE OF CONTENTS.

INTRODUCTION,	Page xiii-xv
-------------------------	-----------------

MANUFACTURES: BY TOWNS.

NUMBER OF ESTABLISHMENTS, PRIVATE FIRMS, AND CORPORATIONS: BY TOWNS,	5-54
Explanation of presentation,	7
Towns in the county of Barnstable,	7, 8
Cities and towns in the county of Berkshire,	8-10
Cities and towns in the county of Bristol,	10-13
Towns in the county of Dukes,	13
Cities and towns in the county of Essex,	14-18
Towns in the county of Franklin,	18-20
Cities and towns in the county of Hampden,	20-23
Cities and towns in the county of Hampshire,	23-25
Cities and towns in the county of Middlesex,	25-32
Town and county of Nantucket,	32
Cities and towns in the county of Norfolk,	32-36
Cities and towns in the county of Plymouth,	36-39
Cities and towns in the county of Suffolk,	39, 40
Cities and towns in the county of Worcester,	40-46
Recapitulation: By Counties,	47-52
Recapitulation. For the State,	53

DATE OF ESTABLISHMENT: BY TOWNS,	55-146
Explanation of presentation,	57
Towns in the county of Barnstable,	57, 58
Cities and towns in the county of Berkshire,	58-61
Cities and towns in the county of Bristol,	61-65
Towns in the county of Dukes,	65, 66
Cities and towns in the county of Essex,	66-74
Towns in the county of Franklin,	74-76
Cities and towns in the county of Hampden,	76-80
Cities and towns in the county of Hampshire,	80-82
Cities and towns in the county of Middlesex,	82-92
Town and county of Nantucket,	93
Cities and towns in the county of Norfolk,	93-97
Cities and towns in the county of Plymouth,	97-101
Cities and towns in the county of Suffolk,	101-105
Cities and towns in the county of Worcester,	105-113
Recapitulation: By Counties,	113-134
Recapitulation by years. For the State,	135-145

CORPORATIONS, CAPITAL STOCK, ETC.: BY TOWNS,	147-176
Explanation of presentation,	149
Recapitulation. For the State,	175

PARTNERS AND STOCKHOLDERS: BY TOWNS,	177-188
Explanation of presentation,	179
Recapitulation. For the State — Partners,	186
Recapitulation. For the State — Stockholders,	186
Recapitulation. For the State — Aggregates,	187

TABULAR ANALYSES,	189-200
Number of establishments, private firms, and corporations,	189, 190
Date of establishment,	190, 191
Corporations, capital stock, etc.,	191-195
Partners and stockholders,	195-199

	Page
CAPITAL INVESTED: BY TOWNS,	201-208
Explanation of presentation,	203
Recapitulation. For the State,	208
STOCK USED: BY TOWNS,	209-214
Explanation of presentation,	211
Recapitulation. For the State,	213
GOODS MADE: BY TOWNS,	215-220
Explanation of presentation,	217
Recapitulation. For the State,	219
TABULAR ANALYSES,	221-232
Capital invested,	221-225
General remarks as to capital,	221-223
The method of returning capital in early censuses,	221
The first return made of "credit capital,"	221, 222
The present accepted method of obtaining returns of capital,	222, 223
Aggregate capital classified,	223
Capital invested in the counties,	223, 224
Capital invested in the cities,	224, 225
Stock used,	225-228
Increase or decrease between 1895 and 1885 for the counties,	225, 226
Percentages of stock used in the counties,	226, 227
Percentages of stock used in the cities,	227, 228
Goods made and work done,	228-231
Increase or decrease between 1895 and 1885 for the counties,	228
Increase or decrease between 1895 and 1885 for the cities,	228-230
Percentages of goods made and work done in the counties,	230
Percentages of goods made and work done in the cities,	230, 231
PERSONS EMPLOYED: BY TOWNS,	233-240
Explanation of presentation,	235
Recapitulation. For the State,	240
HOOR, DAY, AND PIECE HANDS: BY TOWNS,	241-248
Explanation of presentation,	243
Recapitulation. For the State,	248
PERSONS EMPLOYED: BY MONTHS. FOR CITIES,	249-254

THE
DECENNIAL CENSUS OF THE COMMONWEALTH.
1895.

VOLUME V.

INTRODUCTION.

This volume is the fifth of the reports embodying the results of the Decennial Census of 1895, and relates entirely to the Manufacturing and Mechanical Industries of the Commonwealth. It includes the following sections, each of which has been published separately in pamphlet form as soon as completed, in order that the information might be made public at the earliest possible moment.

Part 1.

Number of Establishments, Private Firms, and Corporations : By Towns.
Date of Establishment : By Towns.
Corporations, Capital Stock, etc. : By Towns.
Partners and Stockholders : By Towns.
Capital Invested : By Towns.
Stock Used : By Towns.
Goods Made : By Towns.

Part 2.

Persons Employed : By Towns.
Hour, Day, and Piece Hands : By Towns.
Persons Employed : By Months. For Cities.
Same Number of Persons Employed : By Towns.
Wages, Salaries, and Earnings : By Towns.
Classified Weekly Wages. For Cities.
Motive Power : By Towns.
Machinery and Tools : By Towns.
Proportion of Business Done and Days in Operation : By Towns.
General Statistics of Manufactures. For Cities.

Part 3.

Number of Establishments, Private Firms, and Corporations : By Industries.
Date of Establishment : By Industries.
Corporations, Capital Stock, etc. : By Industries.
Partners and Stockholders : By Industries.

Part 3 — Con.

Capital Invested: By Industries.

Stock Used: By Industries.

Goods Made: By Industries.

Persons Employed: By Industries.

Hour, Day, and Piece Hands: By Industries.

Persons Employed — by Months: By Industries.

Same Number of Persons Employed: By Industries.

Wages, Salaries, and Earnings: By Industries.

Classified Weekly Wages: By Industries.

Motive Power: By Industries.

Machinery and Tools: By Industries.

Proportion of Business Done and Days in Operation: By Industries.

General Statistics of Manufactures: By Industries. For Cities.

General Statistics of Manufactures. For Selected Industries.

Although the enumeration of the population was made in May, 1895, the returns relating to manufactures were not collected until after the first of January, 1896, in order that the operations of the year 1895 might be fully covered.

Unfortunately, the year named fell within a period of extraordinary business depression, and this is shown in the results of the industrial census contained in this volume, the aggregates being much below the normal level, and the comparisons with previous census returns being correspondingly affected.

The entirely abnormal condition prevailing in the years subsequent to 1892 may be seen from the following general statement:

The aggregate amount of the output in the year 1885, as disclosed by the Decennial Census, was \$674,634,269. The gains year by year since that time, as shown by the Annual Statistics of Manufactures taken by this Department, disregarding fractional percentages, are as follows: In 1886 as compared with 1885, 15 per cent; in 1887 as compared with 1886, five per cent; in 1888 as compared with 1887, three per cent; in 1889 as compared with 1888, two per cent; in 1890 as compared with 1889, four per cent. The United States Census taken in 1890 showed an aggregate output of \$888,160,403, a net gain for the five years, as shown both by the Census and the Annual Statistics of Manufactures, of about 31 per cent.* For the subsequent five years, the Annual Statistics of Manufactures show the following gains or losses, disregarding, as before, fractional percentages: In 1891 as compared with 1890, a gain of one per cent; in 1892 as compared with 1891, a gain of five per cent; in 1893 as compared with 1892, a loss of eight per cent; in 1894 as compared with 1893, a loss of 10 per cent; in 1895 as compared with 1894, a gain of nine per cent. The results of the Census of 1895 show an output in that year of \$849,807,302, the percentage of net loss, both by the Annual Statistics of Manufactures and by the Census, in 1895 as

* The exact percentage of gain shown by the Census was 31.65.

compared with 1890, being about four per cent.* As the comparison turns upon values, part of the decline is due to a fall in prices. If the ratio of gain which appears in 1890 as compared with 1885 had continued for the subsequent five years, the product in 1895 would have been \$1,169,263,171. This, however, could hardly have been expected, inasmuch as the gain during the last half of the decade from 1880 to 1890 (31.65 per cent) was much larger than that shown in any other recent five-year period within the history of the Commonwealth. The gain in 1885 as compared with 1880 was but 6.89 per cent, and for that reason, although the gain in 1890 for the preceding five years alone was 31.65 per cent, the percentage of gain for the entire decade 1880 to 1890 was but 40.72; while the gain in 1885 as compared with 1875 was but 27.56 per cent. Therefore, notwithstanding the depression since 1892, the gain for the entire period subsequent to 1885 (25.97 per cent) has been nearly as great as was shown in the decade preceding that year. If, however, the depression had not occurred, and the annual increase subsequent to 1890 had equalled the average annual increase shown upon the output for 1875, in the decade from 1875 to 1885, the aggregate for the present Census would have been \$1,010,548,907; and this supposition is entirely within reasonable limits.

It is impossible, within the limitations of space accorded to this volume, to discuss at greater length the influence of the depression upon the manufactures of Massachusetts. It affected the industries individually, of course, but not always in the same degree as it has affected the grand total. That is, some industries suffered far more than others. By means of the returns obtained for the Annual Statistics of Manufactures, this Department has data which make it possible to determine, for all the leading industries, what part of the fall from the normal level, shown by the statistics of the Census year, is due to the unusual conditions then existing; and the subject may be more fully treated in a special bulletin to be hereafter issued.

It is obvious, from what we have said, that no conclusion as to the decadence or apparent stagnation of any industry should be drawn from the census figures of 1895, when compared with those of any previous census, without taking into account the depression, which, beginning in 1893, still existed two years later.

The attention of the reader is especially called to the analytical text which accompanies the statistical presentations in the volume, containing explanations and qualifications upon which an accurate understanding of the figures depends.

HORACE G. WADLIN,

Chief.

BUREAU OF STATISTICS OF LABOR,
STATE HOUSE, BOSTON.
October, 1898.

* The exact percentage of decrease shown by the Census is 4.32.

MANUFACTURES.

DATE OF ESTABLISHMENT:
BY TOWNS.

DATE OF ESTABLISHMENT: BY TOWNS.

[This presentation shows the origin and growth of the manufacturing and mechanical industries in each city and town, with a recapitulation by counties and for the State. In several towns there are no manufacturing or mechanical industries, and such instances are noted under the names of the counties in which they occur. The proper method of reading this table is as follows: In the town of Barnstable there are 36 establishments classified under "Building;" one was established in 1845 (1845/1), one in 1846 (1846/1), one in 1849 (1849/1), etc. The total number of establishments in each city and town is given in the preceding presentation, pages 5 to 53.]

COUNTY OF BARNSTABLE.

[No manufacturing or mechanical industries in the town of Eastham.]

CORPORATIONS, CAPITAL STOCK, ETC.:

BY TOWNS.

CORPORATIONS, CAPITAL STOCK, ETC.: BY TOWNS.

In this presentation are given statistics of such corporations as were engaged in manufacturing and mechanical industry in the Commonwealth during the Census year ending December 31, 1895. The first column shows the location of the plant, the date of incorporation, and, if originally established as a private firm, the date of such establishment. The presentation also includes the following: Whether the original establishment was a private firm or on a corporate basis; whether incorporated under general or special law; the State in which incorporated; a comparison of the amount of capital stock at the time of incorporation and on December 31, 1895; and a comparison of the number of stockholders at the time of incorporation and on December 31, 1895.

The proper method of reading the presentation is as follows: Referring to the town of Sandwich, we find therein two corporations; one was originally established in the year 1890 as a private firm; in 1893 it was incorporated under the general law of the State of Maine, with a capital stock of \$26,300, and four stockholders; on December 31, 1895, the amount of capital stock was the same, namely, \$26,300, and there were still four stockholders connected with the corporation. The second corporation in this town was originally established as a corporation in 1895 under the general law of the State of Massachusetts. Its capital stock was \$18,500 at the time of incorporation and also at the close of the year 1895. The stockholders numbered 92 at the time of incorporation and the same number was holding stock at the close of the year 1895. Other lines may be read in a similar manner.

Duplications appear in this table and are indicated by an asterisk (*) following the name of the town. (See the town of Provincetown in the county of Barnstable). They are caused by the fact that the same firm or corporation is often engaged in manufacturing in two or more establishments located in the same town; sometimes in the same industry in different towns; and sometimes in more than one industry in the same town or in different towns. The plan adopted has been to consider each establishment as one (whether managed in connection with another or not), and to credit the whole number of corporations, stockholders, and amount of capital stock to each town, but, in making up the total for the counties and for the State, to omit the duplications.

It has been considered impracticable, in this presentation, to include the capital stock or the stockholders of certain establishments, such as associations, which have no corporate form of management; railroad corporations, in which but a small portion of the capital is invested in the repairing and equipping of railroad cars, etc.; and syndicates, wherein the capital is invested not only in this State but in others. To include them would be to increase abnormally the number of stockholders and the total amount of capital stock.

Associations are indicated by the sign (†), railroad corporations by the sign (||), and syndicates by the sign (§).

CORPORATIONS, CAPITAL STOCK, ETC.: BY TOWNS.

11 Includes six syndicates, three railroad corporations, and three associations.

12 Includes one syndicate.

13 Includes one syndicate, two railroad corporations, and six associations.

PARTNERS AND STOCKHOLDERS:
BY TOWNS.

PARTNERS AND STOCKHOLDERS: BY TOWNS.

This presentation shows the number of partners and stockholders concerned in the management of the 26,265 establishments shown on pages 5 to 52. The partners are divided into general partners (males and females) and special partners, estates, etc. The stockholders are designated as males, females, and banks, trustees, etc., while in the last four columns of the presentation aggregates of partners and stockholders are given.

There are duplications in the columns devoted to "Partners," "Stockholders," and "Aggregates." These duplications are indicated by a dagger (†) following the name of the town. (See the town of Provincetown in the county of Barnstable). They are caused by the fact that the same firm or corporation is often engaged in manufacturing in two or more establishments located in the same town; sometimes in the same industry in different towns; and sometimes in more than one industry in the same town or in different towns. The plan adopted has been to consider each establishment as one (whether managed in connection with another or not), and to credit the whole number of partners and stockholders to each town, but, in making up the total for the counties and for the State, to omit the duplications.

Stockholders of certain establishments which are operated by railroad companies, or by syndicates or associations, many of which have extensive investments of capital outside this Commonwealth, are not included in this presentation; since to include all the stockholders of a railroad company, or of a syndicate, or similar association, in connection with such merely branch establishments, incidental only to the main business of the corporation, would result in abnormally increasing the aggregate.

In several towns there are no manufacturing or mechanical industries, and such instances are indicated by an asterisk (*) which follows the name of the town. (See the town of Eastham in the county of Barnstable).

TABULAR ANALYSES

FOR THE FOLLOWING PRESENTATIONS:

NUMBER OF ESTABLISHMENTS, PRIVATE FIRMS, AND CORPORATIONS: BY TOWNS,	Pages 5-54
DATE OF ESTABLISHMENT: BY TOWNS,	55-146
CORPORATIONS, CAPITAL STOCK, ETC.: BY TOWNS,	147-176
PARTNERS AND STOCKHOLDERS: BY TOWNS,	177-188

Number of Establishments, Private Firms, and Corporations.

The presentation contained upon pages 5 to 54, shows the number of private firms and corporations, and therefore indicates the extent to which corporate management or private management, respectively, controls industrial operations within the Commonwealth. The information is presented by towns, with county and State recapitulations. In our analysis we shall deal mainly with the aggregates for the State, referring principally to the recapitulation on page 53.

From this recapitulation it will be seen that the total number of establishments engaged in the manufacturing and mechanical industries in Massachusetts during the Census year, 1895, was 26,265. Of these, 24,579 were controlled by private firms and 1,625 were under corporate management; while 20 were connected with the railroad corporations of the State, 23 were controlled by syndicates, and 18 by associations other than corporations and syndicates. These figures include some duplications of ownership. There were not really 26,265 distinct private firms and corporations in the State, although this figure represents the number of establishments, which, as to management, are separable into the forms of ownership above indicated. One firm or corporation may carry on two or more establishments in the same or in different towns or industries, but, in this presentation each establishment, whether managed in connection with another or not, is considered a unit. In the analysis table, page 199, however, these duplications are avoided, diminishing slightly the aggregates for *private firms and corporations* as compared with the aggregates for *establishments* as shown in the first two analysis tables. For the purpose of comparison with the facts disclosed in previous Censuses, the establishments managed by corporations, railroads, syndicates, and associations may be combined, such establishments numbering in the aggregate 1,686.

The following table presents a comparison for the years 1885 and 1895, with percentages:

CLASSIFICATION.	NUMBER OF ESTABLISHMENTS		INCREASE IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages
THE STATE.	23,431	26,265	2,834	12.95
Private firms,	22,482	24,579	2,097	9.33
Corporations,	949	1,686	737	77.66

The number of establishments increased from 23,431 in 1885 to 26,265 in 1895, a gain of 12.95 per cent. The number of private firms increased during the period from 22,482 to 24,579, a gain of but 9.33 per cent, while the corporations show an increase from 949 to 1,686, a gain of 77.66 per cent.

The following table enables us to determine the relative number of corporations, private firms, etc., comprising the total number of establishments in 1885 and 1895, respectively, with percentages :

CLASSIFICATION.	NUMBER OF ESTABLISHMENTS		PERCENTAGES	
	1885	1895	1885	1895
THE STATE.	23,431	26,265	100.00	100.00
Private firms,	22,482	24,579	95.95	93.58
Corporations,	920	1,625	3.93	6.18
Associations,	26	18	0.11	0.07
Railroads,	—	20	—	0.08
Syndicates,	—	23	—	0.09
Institutions,	3	—	0.01	—

In 1885, the private firms constituted 95.95 per cent of the total number of establishments, while the corporations, including under that head only those having a distinct corporate organization, constituted but 3.93 per cent of the total number. In 1895, the corporations constituted 6.18 per cent of the total number, while the private firms comprised only 93.58 per cent. This comparison indicates a gradual increase in the corporate form as against the private form of management for industrial enterprises.

Date of Establishment.

On pages 55 to 146 we present the dates of establishment of the different manufacturing firms or corporations existing in 1895. As explained in the note at the beginning of the table, this presentation shows the origin and growth of the manufacturing and mechanical industries in each city and town, with a recapitulation by counties and for the State. In the following table, condensed from the recapitulation for the State, pages 135 to 145, we may note the increase in the number of establishments by periods of years :

PERIODS OF YEARS.	Number Established in Periods Specified	Percentages
THE STATE.	26,265	100.00
1891 to 1895,	7,131	27.15
1886 to 1890,	5,176	19.71
1881 to 1885,	3,351	12.76
1876 to 1880,	2,765	10.53
1871 to 1875,	2,111	8.04
1866 to 1870,	1,664	6.33
1861 to 1865,	951	3.62
1856 to 1860,	817	3.11
1851 to 1855,	534	2.03
1846 to 1850,	569	2.16
1841 to 1845,	333	1.27
1831 to 1840,	430	1.64
1821 to 1830,	189	0.72
1811 to 1820,	84	0.32
1801 to 1810,	44	0.17
1791 to 1800,	57	0.22
1747 to 1790,	34	0.13
1677 to 1746,	25	0.09

Of the total number of establishments, namely, 26,265, there are 7,131, or 27.15 per cent, which were established in the period 1891 to 1895. This is the largest percentage of establishments originating in any single period of years. The next largest percentage is found in the period 1886 to 1890, during which 5,176 concerns were established, or 19.71 per cent of the whole number existing in 1895. The periods subsequent to 1866 show a marked advance over the periods prior to that date. Of all the establishments existing in the State, 22,198, or 84.52 per cent, have been established since the year 1865. On the other hand, there are 25 concerns which were established prior to 1747, the oldest dating from 1677; and, in the aggregate, there are 116 that were established prior to the beginning of the present century.

Corporations, Capital Stock, etc.

The table, pages 147 to 176, presents statistics relative to the corporations engaged in the manufacturing and mechanical industries in the Commonwealth during the Census year, showing the location of the plant, the date of incorporation, and, if originally established as a private firm, the date of such establishment. The presentation also includes data showing whether the original establishment was a private firm, or if established upon a corporate basis; whether incorporated under general or special law; the State in which incorporated; a comparison of the amount of capital stock at the time of incorporation and on December 31, 1895; and a comparison of the number of stockholders at the time of incorporation and on December 31, 1895, the end of the Census year.

A recapitulation for the State appears on page 175, from which it is shown that, combining under the head of corporations for the purpose of comparison all the concerns managed by railroad companies, syndicates, and associations, 821 were originally established as private firms and 784 as corporations; 105 were incorporated under special laws and 1,452 under the general law, the remaining 48 being, as stated, railroad companies, syndicates, and associations. These figures are brought forward, with percentages, in two analysis tables, the first of which relates to the form in which the concerns were originally established.

FORM OF ORIGINAL ESTABLISHMENT.	Number	Percentages
THE STATE.	1,605	100.00
Private firms,	821	51.15
Corporations,	784	48.85

Without repeating the figures which we have previously given, we may point out that 51.15 per cent of the corporations engaged in industrial enterprises were originally established as private firms, and 48.85 per cent as corporations.

The next table brings forward the information as to manner of incorporation.

MANNER OF INCORPORATION.	Number	Percentages
THE STATE.	1,605	100.00
General law,	1,452	90.47
Special law,	105	6.54
Railroads, syndicates, etc.,	48	2.99

Of the total number of corporations, 90.47 per cent were established under general and 6.54 per cent under special laws, while the other establishments included under this

head, constituting 2.99 per cent of the whole number, are managed by railroad companies, syndicates, etc.

Referring once more to the recapitulation on page 175, we note that the amount of capital stock at the time of incorporation was, in the aggregate, \$189,994,060, while the amount on December 31, 1895, was \$302,880,324. The number of stockholders at the time of incorporation was, in the aggregate, 24,508, and on December 31, 1895, had risen to 57,191.

For the purpose of comparing the number of corporations in 1895 and 1885 in the different counties and for the State, the following table is introduced:

THE STATE, AND COUNTIES.	NUMBER OF CORPORATIONS		PERCENTAGES	
	1885	1895	1885	1895
THE STATE.	949	1,605	100.00	100.00
Barnstable,	4	4	0.42	0.25
Berkshire,	49	65	5.16	4.05
Bristol,	115	139	12.12	8.66
Dukes,	—	4	—	0.25
Essex,	105	157	11.06	9.78
Franklin,	20	40	2.11	2.49
Hampden,	111	186	11.70	11.59
Hampshire,	36	41	3.79	2.56
Middlesex,	123	210	12.96	13.08
Nantucket,	1	1	0.11	0.06
Norfolk,	39	77	4.11	4.80
Plymouth,	27	51	2.85	3.18
Suffolk,	201	379	21.18	23.61
Worcester,	118	251	12.43	15.64

The number of corporations returned in 1885 includes certain unavoidable duplications, while the number for 1895 does not. These do not, however, materially affect the comparisons. Disregarding them, we may say that while, as previously shown, the number in the State has risen from 949 in 1885 to 1,605 in 1895, there has been no increase in the counties of Barnstable and Nantucket. We note, however, an increase from 49 to 65 in Berkshire; from 115 to 139 in Bristol; from 105 to 157 in Essex; from 20 to 40 in Franklin; from 111 to 186 in Hampden; from 36 to 41 in Hampshire; from 123 to 210 in Middlesex; from 39 to 77 in Norfolk; from 27 to 51 in Plymouth; from 201 to 379 in Suffolk; and from 118 to 251 in Worcester. In Dukes County there were no corporations reported in 1885, while four were reported in 1895. The largest number of corporations appears in Suffolk County, this number representing 23.61 per cent of the total number in 1895, as against 21.18 per cent in 1885. Next to Suffolk stands Worcester County, in which 251 corporations are found, or 15.64 per cent of the entire number in 1895, as against 12.43 per cent in 1885. Middlesex County ranks next with 210, or 13.08 per cent of the entire number, as against 12.96 per cent in 1885. Hampden County contains 186 corporations, or 11.59 per cent of the whole number, as against 11.70 per cent in 1885; while Essex and Bristol Counties contain, respectively, 157 and 139, or 9.78 and 8.66 per cent of the whole number, as against 11.06 and 12.12 per cent in 1885. It is not necessary to point out the other counties in detail, as, compared with those which have been cited, they are of minor importance.

The following table presents the amount of capital stock at the time of incorporation and on December 31, 1895, for the State and by counties, with the increase in amounts and percentages:

THE STATE, AND COUNTIES.	AMOUNT OF CAPITAL STOCK —		INCREASE (+), OR NO CHANGE (=), ON DEC. 31, 1895, AS COM- PARED WITH DATE OF INCORPORATION	
	At Incorporation	On Dec. 31, 1895	Amounts	Percentages
THE STATE.	\$189,994,060	\$302,880,324	+\$112,886,264	+59.42
Barnstable,	51,800	77,800	+26,000	+50.19
Berkshire,	4,971,400	8,877,650	+3,906,250	+78.57
Bristol,	31,436,540	51,065,132	+19,628,592	+62.44
Dukes,	135,200	135,200	=	=
Essex,	17,687,950	36,817,739	+19,129,789	+108.15
Franklin,	2,401,700	3,935,800	+1,534,100	+63.88
Hampden,	21,739,500	30,524,000	+8,784,500	+40.41
Hampshire,	4,635,200	7,959,620	+3,324,420	+71.72
Middlesex,	30,147,320	55,890,298	+25,742,978	+85.39
Nantucket,	36,000	36,000	=	=
Norfolk,	6,317,300	9,117,750	+2,800,450	+44.33
Plymouth,	4,002,900	5,488,610	+1,485,710	+37.12
Suffolk,	45,124,950	57,025,500	+11,900,550	+26.37
Worcester,	21,306,300	35,929,225	+14,622,925	+68.63

The percentage of increase in capital stock, as shown by the amount on December 31, 1895, as against the amount at the time of incorporation, is, for the State, 59.42. This percentage of increase is exceeded in several counties, however. The corporations in Berkshire County have increased their capital stock 78.57 per cent; those in Bristol, 62.44 per cent; in Essex, 108.15 per cent; in Franklin, 63.88 per cent; in Hampshire, 71.72 per cent; in Middlesex, 85.39 per cent; and in Worcester, 68.63 per cent. Although, as shown in the previous table, Suffolk County contains the largest number of corporations, the increase in capital stock since the date of incorporation has been but 26.37 per cent in that county.

The relative capitalization of the corporations in different counties, as compared with the total capitalization of the corporations for the State, both at the time of incorporation and on December 31, 1895, is shown in the following table:

THE STATE, AND COUNTIES.	AMOUNT OF CAPITAL STOCK —		PERCENTAGES	
	At Incorporation	On Dec. 31, 1895	At Incorporation	On Dec. 31, 1895
THE STATE.	\$189,994,060	\$302,880,324	100.00	100.00
Barnstable,	51,800	77,800	0.03	0.03
Berkshire,	4,971,400	8,877,650	2.62	2.93
Bristol,	31,436,540	51,065,132	16.55	16.86
Dukes,	135,200	135,200	0.07	0.04
Essex,	17,687,950	36,817,739	9.31	12.16
Franklin,	2,401,700	3,935,800	1.26	1.30
Hampden,	21,739,500	30,524,000	11.44	10.08
Hampshire,	4,635,200	7,959,620	2.44	2.63
Middlesex,	30,147,320	55,890,298	15.87	18.45
Nantucket,	36,000	36,000	0.02	0.01
Norfolk,	6,317,300	9,117,750	3.32	3.01
Plymouth,	4,002,900	5,488,610	2.11	1.81
Suffolk,	45,124,950	57,025,500	23.75	18.83
Worcester,	21,306,300	35,929,225	11.21	11.86

The largest percentages of corporate capital are held in the counties of Suffolk and Middlesex, these percentages being, respectively, 18.83 and 18.45, although at the time of incorporation Suffolk County held 23.75 per cent and Middlesex 15.87 per cent of the total capital. At the time of incorporation Bristol County held 16.55 per cent of the total corporate capital in the State, and practically the same percentage obtained on December 31, 1895. The other counties which hold comparatively large percentages of the entire corporate capital are Essex, 12.16, Worcester, 11.86, and Hampden, 10.08.

The following table enables a comparison of the amount of capital stock held at the time of incorporation by corporations engaged in industrial enterprises in Massachusetts in 1895 as against the amount held by corporations in 1885, with percentages, by counties :

THE STATE, AND COUNTIES.	AMOUNT OF CAPITAL STOCK AT INCORPORATION		PERCENTAGES	
	1885	1895	1885	1895
THE STATE.	\$122,945,208	\$189,994,060	100.00	100.00
Barnstable,	1,403,000	51,800	1.14	0.03
Berkshire,	4,365,800	4,971,400	3.55	2.62
Bristol,	22,597,600	31,436,540	18.38	16.55
Dukes,	—	135,200	—	0.07
Essex,	14,511,600	17,687,950	11.80	9.31
Franklin,	2,072,000	2,401,700	1.68	1.26
Hampden,	11,489,750	21,739,500	9.35	11.44
Hampshire,	3,886,800	4,635,200	3.16	2.44
Middlesex,	20,091,358	30,147,320	16.34	15.87
Nantucket,	20,000	36,000	0.02	0.02
Norfolk,	4,726,000	6,317,300	3.84	3.32
Plymouth,	1,396,800	4,002,900	1.14	2.11
Suffolk,	23,957,000	45,124,950	19.49	23.75
Worcester,	12,427,500	21,306,300	10.11	11.21

Of the capital stock at the time of incorporation, 19.49 per cent in 1885 belonged to corporations in the county of Suffolk, while 23.75 is the corresponding percentage for 1895. Next in order in 1885 are the counties of Bristol, holding 18.38 per cent of the capital at the time of incorporation; Middlesex, holding 16.34 per cent; Essex, holding 11.80 per cent; and Worcester, holding 10.11 per cent; no other county holding in excess of 10 per cent. Ranking next to Suffolk County in 1895 is Bristol, holding 16.55 per cent of the capital stock at the time of incorporation; Middlesex, 15.87 per cent; Hampden, 11.44 per cent; and Worcester, 11.21 per cent; no other county holding in excess of 10 per cent.

The next table shows the states or countries in which the corporations were organized.

STATE OR COUNTRY IN WHICH ORGANIZED.	Number	Percentages
THE STATE.	1,557	100.00
Massachusetts,	1,195	76.75
Maine,	247	15.87
New York,	26	1.67
New Jersey,	22	1.42
New Hampshire,	19	1.22

STATE OR COUNTRY IN WHICH ORGANIZED.	Number	Percentages
Connecticut,	14	0.90
West Virginia,	13	0.84
Rhode Island,	10	0.64
Illinois,	4	0.26
Ohio,	2	0.13
Pennsylvania,	1	0.06
Vermont,	1	0.06
Wyoming,	1	0.06
Canada,	1	0.06
England,	1	0.06

Of the whole number of corporations, 1,557, the number organized in Massachusetts constitutes 76.75 per cent, leaving 23.25 per cent which were organized out of the State. Of these, Maine furnishes the largest number, namely, 247, or 15.87 per cent of the whole number of corporations. Of the others, those which were organized in New York constitute 1.67 per cent, those organized in New Jersey, 1.42 per cent, and those organized in New Hampshire, 1.22 per cent; all the other corporations which were organized out of the State forming together but 3.07 per cent of the whole number.

Partners and Stockholders.

The presentation, pages 177 to 188, relates entirely to partners and stockholders, showing the number of partners and stockholders concerned in managing the 26,265 establishments engaged in industrial operations in the State. The partners are divided into general partners (males and females) and special partners, estates, etc. The stockholders are designated as males, females, and banks, trustees, etc., while in the last four columns of the presentation aggregates of partners and stockholders are given. The note preceding the table, on page 179, should be read carefully, in order to prevent misconception of the figures.

It will be seen that the total number of partners connected with the firms engaged in manufacturing in 1895 was 30,370, the general partners comprising 27,557 males and 2,586 females, while the special partners include 96 males and 12 females; the remainder being made up of estates and trustees managing private firms.

The following analysis table shows the number of partners classified as general and special in the private firms, and the number of estates holding private management, for the years 1895 and 1885, with percentages of increase or decrease:

THE STATE, AND CLASSIFICATION.	NUMBER OF PARTNERS		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages
THE STATE.	28,294	30,370	+2,076	+7.34
General partners,	28,164	30,143	+1,979	+7.03
Special partners,	117	108	-9	-7.69
Estates, etc.,	13	119	+106	+815.38

The increase in the total number of partners in 1895, as compared with 1885, was 2,076, or 7.34 per cent. The increase in general partners was 1,979, or 7.03 per cent; the

number of special partners, however, declined from 117 to 108, or 7.69 per cent. The general partners in 1895 constituted 99.25 per cent of the entire number, as against 99.54 per cent in 1885, showing that at each period the larger number of partners included those actively engaged in the work of administration, and that the proportion of partners thus engaged of the total number remained substantially the same as in the preceding decade.

We present next a classification by sex, with percentages.

THE STATE, AND CLASSIFICATION.	NUMBER OF PARTNERS		INCREASE IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages
THE STATE.	28,294	30,370	2,076	7.34
Males,	26,521	27,653	1,132	4.27
Females,	1,760	2,598	838	47.61
Estates, etc.,	13	119	106	815.38

The number of male partners in 1895 was 27,653 and the number of female partners 2,598. The male partners increased 4.27 per cent during the decade, while the increase in females, although only 838, constitutes an increase of 47.61 per cent.

The next table admits of a comparison of the proportion of males and females of the whole number in 1895 and in 1885.

THE STATE, AND CLASSIFICATION.	NUMBER OF PARTNERS		PERCENTAGES	
	1885	1895	1885	1895
THE STATE.	28,294	30,370	100.00	100.00
Males,	26,521	27,653	93.73	91.05
Females,	1,760	2,598	6.22	8.56
Estates, etc.,	13	119	0.05	0.39

This table at once brings out the fact that the proportion of females of the whole number of partners has gradually increased. Of the total number of partners in 1885, 93.73 per cent were males and 6.22 per cent females, while in 1895, 91.05 per cent were males and 8.56 per cent females. Individuals may hold stock in more than one corporation, and may therefore be counted more than once in aggregating the returns from the different establishments. The same statement applies, of course, to the aggregate number of partners, although the instances of partners who are thus represented in different establishments must be much less frequent than among the stockholders. The inclusion of the same individual more than once, however, cannot be avoided, and the figures are to be considered as indicative and not as absolute. It may be fairly assumed that the total was proportionately enlarged at each Census period, and therefore that the comparative percentages are not affected.

Referring to the recapitulation relating to stockholders on page 186, it will be seen that the total number of stockholders is 57,191, of whom 34,231 were males and 17,369 females, the other stockholders comprising banks, trustees, estates, other firms and corporations, and charitable and educational institutions. We introduce an analysis table showing the increase in stockholders, classified by sex, in 1895 as compared with 1885.

THE STATE, AND CLASSIFICATION.	NUMBER OF STOCKHOLDERS		INCREASE IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages
THE STATE.	42,731	57,191	14,460	33.84
Males,	30,733	34,231	3,498	11.38
Females,	11,572	17,369	5,797	50.10
Banks, trustees, etc.,	426	5,591	5,165	1,212.44

The total increase in stockholders is 14,460, or 33.84 per cent; the increase in male stockholders being 3,498, or 11.38 per cent, and in females 5,797, or 50.10 per cent. As in the case of partners, we note a larger proportionate increase of females who are interested in the management of industrial enterprises, than of males.

The next table shows the proportion of males and females of the total number of stockholders at each Census date, with percentages.

THE STATE, AND CLASSIFICATION.	NUMBER OF STOCKHOLDERS		PERCENTAGES	
	1885	1895	1885	1895
THE STATE.	42,731	57,191	100.00	100.00
Males,	30,733	34,231	71.92	59.85
Females,	11,572	17,369	27.08	30.37
Banks, trustees, etc.,	426	5,591	1.00	9.78

Of the total number of stockholders in 1885, 71.92 per cent were males and 27.08 per cent females, while one per cent of the whole number were banks, trustees, etc. In 1895, 59.85 per cent were males, 30.37 per cent females, and 9.78 per cent were banks, trustees, etc.

The following table, drawn from the recapitulation on page 175, shows the number of stockholders in the different corporations at the time of incorporation and on December 31, 1895, with percentages of increase or decrease, by counties:

THE STATE, AND COUNTIES.	NUMBER OF STOCKHOLDERS —		INCREASE (+), OR DECREASE (—), ON DEC. 31, 1895, AS COMPARED WITH DATE OF INCORPORATION	
	At Incorporation	On Dec. 31, 1895	Number	Percentages
THE STATE.	24,508	57,191	+32,683	+133.36
Barnstable,	117	183	+66	+56.41
Berkshire,	612	1,268	+656	+107.19
Bristol,	6,415	15,880	+9,465	+147.54
Dukes,	60	99	+39	+65.00
Essex,	2,686	5,675	+2,989	+111.28
Franklin,	423	1,048	+625	+147.75

Suffolk,	3,520	8,301	+4,781	+135.82
Worcester,	2,035	4,336	+2,301	+113.07

The number of stockholders at the time of incorporation was, in the aggregate, 24,508, increasing, however, to 57,191, the number holding stock on December 31, 1895, an increase of 133.36 per cent. Disregarding the numbers, we find that the corporations in Middlesex County show the largest percentage of increase, namely, 247.53, followed by Franklin and Bristol Counties, showing, respectively, increases of 147.75 and 147.54 per cent. In Suffolk County the number of stockholders has increased since the date of incorporation to the extent of 135.82 per cent.

Referring to the recapitulation on page 187, and combining partners and stockholders, we obtain an aggregate of 87,561, including banks, trustees, estates, etc., which in themselves number 5,710. Of the others, 61,884 were males and 19,967 females.

The following analysis table permits a comparison between 1895 and 1885 of partners and stockholders in the aggregate, with percentages of increase:

THE STATE, AND CLASSIFICATION.	NUMBER OF PARTNERS AND STOCKHOLDERS		INCREASE IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages
THE STATE.	71,025	87,561	16,536	23.28
Males,	57,254	61,884	4,630	8.09
Females,	13,332	19,967	6,635	49.77
Banks, estates, etc.,	439	5,710	5,271	1,200.68

The increase in the number of partners and stockholders combined is, for the State, 16,536, or 23.28 per cent, the males having increased 4,630, or 8.09 per cent since 1885, and the females 6,635, or 49.77 per cent.

The next table shows the percentages of males and females of the total number of partners and stockholders at each Census date.

THE STATE, AND CLASSIFICATION.	NUMBER OF PARTNERS AND STOCKHOLDERS		PERCENTAGES	
	1885	1895	1885	1895
THE STATE.	71,025	87,561	100.00	100.00
Males,	57,254	61,884	80.61	70.68
Females,	13,332	19,967	18.77	22.80
Banks, estates, etc.,	439	5,710	0.62	6.52

The banks, estates, etc., constituted less than one per cent of the whole number of partners and stockholders in 1885, rising, however, to 6.52 per cent in 1895. Of the other partners and stockholders, the males comprised 80.61 per cent in 1885, dropping to 70.68 per cent in 1895; and the females 18.77 per cent in 1885, increasing to 22.80 per cent in 1895.

The tables which we have presented relative to partners and stockholders bring out not only the gain among women in the ownership and management of industrial establishments, but also plainly indicate the extension of ownership which accompanies the change from private firms to corporate management. This last point is perhaps more completely shown in the final analysis table, which exhibits a classification of partners and stockholders, with numbers and averages, for 1885 and 1895.

CLASSIFICATION OF PARTNERS, STOCKHOLDERS, ETC.	NUMBER AND AVERAGES	
	1885	1895
Number of private firms,	22,482	24,508
Number of partners,	28,294	30,370
Average number of partners to a private firm,	1.26	1.24
Number of corporations,	949	1,605
Number of stockholders,	42,731	57,191
Average number of stockholders to a corporation, . .	45.03	35.63

The duplications in establishments, occurring for the reason stated on page 189, are avoided in this table which shows the exact number of private firms and corporations, and the figures, as will be seen, are slightly smaller than those given in preceding tables.

In 1885, the number of private firms was 22,482, administered by 28,294 partners, an average of 1.26 to each firm. In 1895, the number of private firms had increased to 24,508, administered by 30,370 partners, or an average of 1.24 persons to each firm. The number of corporations in 1885 was 949, increasing to 1,605 in 1895. The number of stockholders in 1885 was 42,731, or an average of 45.03 to each corporation. In 1895, the number of stockholders was 57,191, or an average of 35.63 to each corporation. The average number of partners to each private firm and of stockholders to each corporation has declined since 1885; but the 24,508 private firms engaged in manufacturing represent the ownership of only 30,370 partners, while, on the other hand, the 1,605 corporations represent the ownership of 57,191 stockholders. It will be remembered that, as shown in a previous table, 821 of these corporations, more than one-half, were originally established as private firms, and that these 821 private firms could not at that time have represented, on the average, more than two partners each. The change from private firms to corporate management immediately resulted in the extension of ownership; and the tendency to expand ownership by increasing the number of stockholders after incorporation has been shown in a previous table, page 197, in which it appeared that the 1,605 corporations at the time of incorporation represented 24,508 stockholders; while on December 31, 1895, or at the close of the Census year, they represented 57,191 stockholders.

CAPITAL INVESTED: BY TOWNS.

CAPITAL INVESTED: BY TOWNS.

[In this presentation is shown the aggregate amount of capital invested by towns, cities, counties, and for the State. That portion invested in the "Plant," so-called, is subdivided so as to show, respectively, the amount invested in land, buildings and fixtures, machinery and motive power, and implements and tools. The amount of cash on hand and in bank on December 31, 1895, or on the last day of the financial year ending in 1895, is also given together with the value, on that date, of unused stock on hand and stock in process of manufacture. The value of finished goods on hand has not been considered as forming a part of capital invested. The column "Credit Capital" shows the aggregate amount of borrowed capital. This amount forms a part, of course, of the "Total Capital Invested," having been included in one or more of the items of investment which make up that total. It is presented separately in order that the amount of borrowed capital may be shown; that is, the amount of capital invested which is not due to the personal investment of the firms or corporations themselves. In order to avoid disclosing facts concerning individual establishments, the amount of capital invested in certain towns has been intentionally omitted, such omissions being indicated by a dagger and dash (†—) in each of the columns. (See the town of Mashpee in the county of Barnstable). The omitted figures are, however, included in the county and State totals.]

STOCK USED: BY TOWNS.

STOCK USED: BY TOWNS.

[In this presentation, the figures given under "Value of Stock Used" represent the cost value of all kinds of materials used in the establishments in the towns and cities of the Commonwealth during the Census year, 1895, whether entering into the construction of the articles manufactured, or consumed in the processes necessary to the production of the goods. In order to avoid disclosing facts concerning individual establishments, the value of stock used in certain towns has been intentionally omitted, such omissions being indicated by a dagger and dash (†—) in the column devoted to stock used. (See the town of Mashpee in the county of Barnstable). The omitted figures are, however, included in the county and State totals.]

TABULAR ANALYSES

FOR THE FOLLOWING PRESENTATIONS:

	Pages
CAPITAL INVESTED: BY TOWNS,	201-208
STOCK USED: BY TOWNS,	209-214
GOODS MADE: BY TOWNS,	215-220

General Remarks as to Capital.

The presentation, pages 201-208, relates to capital invested, by towns, the recapitulation appearing on page 208.

Of all the elements entering into industrial statistics, the returns as to capital are the most difficult to obtain and the least satisfactory in their results. In the first place it is neither expected nor desired to obtain information as to capital which will show the financial status of the establishments. We wish to determine the amount of capital devoted to production, not to show the assets and liabilities of the corporations and private firms. Manifestly this is not shown by a statement of share capital, nor by the amount of money put into the establishments by the partners or stockholders. A considerable amount is always borrowed in addition to the personal investment of those who actually own the business; and if this credit capital is not included, the capital devoted to production will be understated, and all deductions as to the relation of output, etc., to capital, will be erroneous.

In early Censuses capital, for this and various other reasons, was generally understated. Thus, in remarks upon the tables of manufacturing industry, Ninth Census of the United States, 1870, the late Francis A. Walker, Superintendent, says:

“ The Census returns of capital invested in manufactures are entirely untrustworthy and delusive. * * * No man in business knows what he is worth — far less can say what portion of his estate is to be treated as capital. With respect, indeed, to corporations having a determinate capital stock, the difficulty of making a correct return in this particular becomes very much reduced. * * * Where, however, business is carried on outside of incorporated companies, the difficulty of obtaining even an approximate return of capital, resulting from the nature of the inquiry itself * * * becomes such as to render success hopeless. So numerous are the constructions, possible and even reasonable, in respect to what constitutes manufacturing capital, that anything like harmony or consistency of treatment is not to be expected of a large body of officials pursuing their work independently of each other.”

Since this was written, however, much progress has been made both in making the form of inquiry distinct and unmistakable, and in securing full returns. In the Massachusetts Census of 1875, little more was obtained than stock or share capital in the case of corporations, and the personal investments in cash in the case of private firms. In 1885, the Analysis of the subject of capital contains this explanatory statement:

“ The Bureau, in making investigations some seven years ago, ascertained in the case of a number of large corporations that their nominal capital invested was not more than one-third of the capital used and necessary to carry on the business as it then existed. It was then decided that in the Census of 1885 an attempt should be made to secure more complete and reliable statistics of capital invested.

It was comparatively easy to ask for the value of the real or fixed items of capital, such as land, buildings and fixtures, machinery, implements and tools, and cash. Beyond this was an enumeration that had not been touched upon by statisticians, and it was foreseen that such an investigation must be to a great extent tentative. Nevertheless, a conscientious attempt has been made by the Census Office to secure statistics of 'credit capital,' which is as essential to the carrying on of a great establishment as the real or cash capital, but which has, in the past, been entirely omitted from the returns."

The returns as to capital were also classified so as to show the amount invested in the plant, covering land, buildings and fixtures, machinery, implements and tools, the amount of cash, and the amount of credit capital. These classified items were then totaled under the head "Total Real (fixed), Cash, and Credit Capital Invested."

It is probable, however, that the introduction of the inquiry as to credit capital led to duplications of capital in nearly every return in 1885, when, as must have been the case, the money borrowed had been invested in some one of the items separately returned, or else was held as cash, also separately returned. That is, either the items "land," "buildings," and the rest, including the item "cash," were returned *less the amount of credit capital*, which is improbable, or the item "credit capital," returned in the aggregate, was returned *less the amount already appearing under the head of "land," "buildings," etc.*, which is also improbable, or else the total amount of capital invested, obtained by combining the amount returned under each head separately, was unduly enlarged by duplications.

This duplication of credit capital already returned under other heads was apparently avoided in the returns as to capital in the Eleventh United States Census, 1890, which, although closely following the form used in Massachusetts in 1885, did not call for credit capital separately. Finished products on hand (a); bills receivable (b); and ledger accounts (c), were, however, included under the head of capital. Undoubtedly these items should be included if it is desired to know the *assets* of the establishments, but it seems equally clear that none of them should be included if the aggregate is to show only the capital devoted to production. The item (a) is *product*, not capital. It is an asset, of course, but by so much as capital is increased by including it, the deductions which follow in the Census report as to "Amount of Capital required for a product value of \$100," and especially deductions as to the relation of profit to capital, sure to be made, are invalidated. The same statement applies to items (b) and (c), which, while assets, are simply paper assets, not available for use in production until realized upon, when the proceeds will take their proper place under the head of "cash," or will be invested in "land," "buildings," "machinery and tools," etc.

The experience of this Department, in the annual collection of statistics of manufactures, since 1885, has finally led to the adoption of seven specified items, which are believed to cover the various forms in which industrial capital devoted to production appears, namely:

- A. Value of LAND occupied by the establishment (if owned).
- B. Value of BUILDINGS and Fixtures (if owned).
- C. Value of MACHINERY and Motive Power (if owned).
- D. Value of IMPLEMENTS and TOOLS (not included under C).
- E. Value of PATENT RIGHTS, PATTERNS, etc. (if owned).
- F. CASH on hand and in bank at the date of making the return.
- G. Value, at cost, of RAW MATERIALS and ARTICLES TO BE USED IN THE INDUSTRY, on hand at the date of making the return, including goods in process of manufacture.

Substantially these inquiries were used in the Census of 1895, upon which the presentations contained in this volume are based, and, besides these, the amount of credit capital was asked for separately, in order that the amount of borrowed money entering into the business might be seen. This credit capital, having gone into some one or more of the specified items of capital, is, of course, included in the aggregate amount of capital shown in the presentations, but is included there only once.

Clearly, items A to F in the list of inquiries above given include forms of capital necessary to carry on the establishments. They are all items of capital devoted to pro-

duction. As to the item G, the case is not so plain. It includes items of "stock" and also items of "product," although as yet incomplete. At all events, they are forms of capital invested antecedent to the completion of the productive processes, and necessary for, indeed, actually employed in, those processes. The inquiries as they stand at least have the merit of being distinct, susceptible of definite replies without duplications, and seem to omit none of the capital devoted to production.

From what we have said it will be apparent that the returns as to capital, having been secured on a different basis in nearly every Census, whether State or National, cannot be justly compared. Nor can deductions as to the relation of product to capital, or other deductions turning upon capital, be put into comparison with similar deductions drawn from any previous Census. Such deductions, at any time, whether relating to profit or output, are apt to be extremely misleading unless the term "Capital" is exactly defined, and the elements that compose it are definitely known; and the misleading features are intensified when the returns of one Census are compared with those of another made upon an entirely different basis. We therefore make no comparisons as to capital in 1895 as against the amount returned in any other Census year.

Aggregate Capital Classified.

The entire amount of capital invested for the Census year 1895 was \$516,082,557. The following table shows the different items of capital which make up this aggregate:

CLASSIFICATION OF CAPITAL INVESTED.	Amounts	Percentages
THE STATE.	\$516,082,557	100.00
Land,	40,834,036	7.91
Buildings and fixtures,	107,267,552	20.78
Machinery and motive power,	148,503,229	28.78
Implements and tools,	30,232,225	5.86
Cash on hand and in bank,	40,149,726	7.78
Stock on hand (raw and in process),	149,095,789	28.89
Credit capital (included in total capital),	76,754,319	14.87

The item of land amounted to \$40,834,036, or 7.91 per cent of the total capital invested; the value of buildings and fixtures was \$107,267,552, or 20.78 per cent of the aggregate capital; machinery and motive power amounted to \$148,503,229, or 28.78 per cent of the aggregate capital; implements and tools, \$30,232,225, or 5.86 per cent of the aggregate; cash on hand and in bank at the date of the returns, \$40,149,726, or 7.78 per cent of the aggregate; and stock on hand (raw and in process), \$149,095,789, or 28.89 per cent of the aggregate. The first four items shown in the foregoing table comprise what may be termed the industrial plant, and, taken together, the aggregate amount invested therein constitutes 63.33 per cent of the entire amount of capital invested. The table shows separately the amount of credit capital. This is included in the total capital, since the capital which is borrowed, and therefore termed "credit capital," has been invested in one or more of the items appearing in the table. The total amount of such credit capital is \$76,754,319, or 14.87 per cent of the aggregate capital. That is to say, of the total capital invested in manufacturing enterprises, nearly fifteen dollars in every \$100 (14.87 per cent) is borrowed.

Capital Invested in the Counties.

We introduce an analysis table showing the amount of capital invested in the different counties, with the percentages which such amounts form of the total industrial capital in the State.

THE STATE, AND COUNTIES.	Amount of Capital Invested	Percentages
THE STATE.	\$516,082,557	100.00
Barnstable,	518,866	0.10
Berkshire,	22,590,622	4.38
Bristol,	80,502,956	15.60
Dukes,	136,912	0.03
Essex,	68,518,929	13.28
Franklin,	6,455,348	1.25
Hampden,	48,588,118	9.41
Hampshire,	9,100,419	1.76
Middlesex,	89,569,548	17.36
Nantucket,	92,085	0.02
Norfolk,	20,648,373	4.00
Plymouth,	14,552,359	2.82
Suffolk,	83,421,048	16.16
Worcester,	71,386,974	13.83

The largest amount of capital found in any single county appears in Middlesex, aggregating \$89,569,548, or 17.36 per cent of the total capital in the State. The other counties follow Middlesex in the order named below, with the percentages which the capital in such counties forms of the total capital as annexed in each case: Suffolk, 16.16; Bristol, 15.60; Worcester, 13.83; Essex, 13.28; Hampden, 9.41; Berkshire, 4.38; Norfolk, 4; Plymouth, 2.82; Hampshire, 1.76; Franklin, 1.25; Barnstable, 0.10; Dukes, 0.03; Nantucket, 0.02. It will be seen that the last eight counties, namely, Nantucket, Dukes, Barnstable, Franklin, Hampshire, Plymouth, Norfolk, and Berkshire, together hold only 14.36 per cent of the industrial capital of the Commonwealth, or only slightly more than the counties of Essex and Worcester hold separately; while six counties, namely, Middlesex, Suffolk, Bristol, Worcester, Essex, and Hampden, together hold 85.64 per cent of the aggregate capital.

The recapitulation on page 208 shows for each of the counties the subdivision of capital into the items of plant, cash on hand and in bank, and stock on hand (raw and in process), the item "plant" being subdivided into land, buildings and fixtures, machinery and motive power, and implements and tools. It shows also the credit capital in each of the counties.

Capital Invested in the Cities.

The following table brings forward the amount of capital invested in the cities, with percentages showing the proportion of the total capital in the State which is held in each of the cities respectively:

THE STATE, AND CITIES.	Amount of Capital Invested	Percentages
THE STATE.	\$516,082,557	100.00
Beverly,	1,330,784	0.26
Boston,	77,064,107	14.93
Brockton,	6,078,299	1.18
Cambridge,	14,052,911	2.72
Chelsea,	6,018,738	1.17
Chicopee,	7,175,211	1.39
Everett,	714,767	0.14
Fall River,	43,850,952	8.50

THE STATE, AND CITIES.	Amount of Capital Invested	Percentages
Fitchburg,	\$8,079,412	1.56
Gloucester,	3,003,256	0.58
Haverhill,	4,601,200	0.89

Quincy,	1,935,515	0.37
Salem,	4,834,330	0.94
Somerville,	5,400,052	1.05
Springfield,	10,540,680	2.04
Taunton,	7,111,976	1.38
Waltham,	5,956,485	1.15
Woburn,	2,097,938	0.41
Worcester,	22,766,714	4.41
Aggregate for towns,	142,349,823	27.58

The city holding the largest amount of capital is Boston, the aggregate being \$77,-064,107, or 14.93 per cent of the industrial capital of the State. Next to Boston comes Fall River, in which the aggregate capital amounts to \$43,850,952, or 8.50 per cent of the total for the State. Next to Fall River we find Lowell and Lawrence, the aggregate capital in these cities being, respectively, \$29,967,401 and \$26,323,113, or 5.81 and 5.10 per cent of the total capital for the State. No other city holds more than five per cent of the total capital for the State, although Worcester, New Bedford, and Holyoke approach this limit, the percentages held in each of these cities being, respectively, 4.41, 4.35, and 4.19. The aggregate amount of capital held in the towns of the Commonwealth is \$142,349,823, or 27.58 per cent of the total capital in the State, while the aggregate capital held in the cities is \$373,732,734, or 72.42 per cent of the total capital. To put it in other words, out of every \$100 of industrial capital held in the Commonwealth, \$72.42 is held in the cities and \$27.58 in the towns.

Stock Used.

The presentation, pages 209-214, exhibits the value of stock used, by towns. As explained in the note preceding this presentation, the term "stock used" includes all kinds of materials used in the establishments, whether entering into the construction of the articles manufactured, or consumed in the processes necessary to the production of the goods. That is, it includes not merely the raw material essential to the fabric of the goods made, for example, cotton; but it also includes coal, oil, dyestuffs, and materials of every kind required for the industrial processes.

The recapitulation appears on page 213, from which it is seen that the aggregate amount of stock used, as thus defined, was \$461,254,353. In order to enable a com-

parison to be made, by counties, between the years 1885 and 1895, with the increase or decrease in amounts and percentages, the following table is introduced:

THE STATE, AND COUNTIES.	VALUE OF STOCK USED		INCREASE (+), OR DECREASE (—), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Amounts	Percentages
THE STATE.	\$389,757,458	\$461,254,353	+\$71,496,895	+18.34
Barnstable,	1,263,861	558,679	—705,182	—55.80
Berkshire,	13,534,235	16,671,623	+3,137,388	+23.18
Bristol,	31,947,151	40,155,574	+8,208,423	+25.69
Dukes,	79,313	94,806	+15,493	+19.53
Essex,	70,006,858	78,016,781	+8,009,923	+11.44
Franklin,	3,037,872	3,338,094	+300,222	+9.88
Hampden,	23,205,639	30,779,254	+7,573,615	+32.64
Hampshire,	6,923,886	6,266,950	—656,936	—9.49
Middlesex,	77,437,254	96,649,927	+19,212,673	+24.81
Nantucket,	44,312	48,173	+3,861	+8.71
Norfolk,	16,373,240	19,661,594	+3,288,354	+20.08
Plymouth,	15,906,564	21,928,794	+6,022,230	+37.86
Suffolk,	83,238,788	88,951,495	+5,712,707	+6.86
Worcester,	46,758,485	58,132,609	+11,374,124	+24.33

Disregarding the amounts shown in the preceding table, and confining ourselves to the percentages, we note that the increase in the value of stock used for the State in 1895 as compared with 1885, was 18.34 per cent. Two counties show a decrease, namely, Barnstable and Hampshire. These are not, however, among the leading industrial counties in the State. The decline in Barnstable County amounted to 55.80 per cent and in Hampshire County to 9.49 per cent; but the entire value of stock used in Barnstable was only \$1,263,861 in 1885, falling to \$558,679 in 1895, while the decline in Hampshire County amounted to but \$656,936. The county showing the greatest increase in value of stock used was Plymouth, the gain amounting to 37.86 per cent. Hampden shows an increase of 32.64 per cent; while other counties which show a percentage of increase larger than the percentage of increase for the State are the following, the percentage being annexed in each case: Bristol, 25.69; Middlesex, 24.81; Worcester, 24.33; Berkshire, 23.18; Norfolk, 20.08; and Dukes, 19.53. Although the county of Dukes appears in this list, the total value of stock used in that county was but \$94,806 in 1895.

Percentages of Stock Used in the Counties.

The value of stock used in the different counties, with the proportion which the amount in each county forms of the total value of stock used in the State, is shown in the following table:

THE STATE, AND COUNTIES.	Value of Stock Used	Percentages
THE STATE.	\$461,254,353	100.00
Barnstable,	558,679	0.12
Berkshire,	16,671,623	3.62
Bristol,	40,155,574	8.71
Dukes,	94,806	0.02
Essex,	78,016,781	16.91
Franklin,	3,338,094	0.72

THE STATE, AND COUNTIES.	Value of Stock Used	Percentages
Hampden,	\$30,779,254	6.67
Hampshire,	6,266,950	1.36
Middlesex,	96,649,927	20.95
Nantucket,	48,173	0.01
Norfolk,	19,661,594	4.26
Plymouth,	21,928,794	4.76
Suffolk,	88,951,495	19.29
Worcester,	58,132,609	12.60

Middlesex County stands at the head of the list, the value of stock used therein being \$96,649,927, or 20.95 per cent of the entire value of stock used in the State. Three other counties show large percentages of stock used, namely, Suffolk, 19.29; Essex, 16.91; and Worcester, 12.60.

Percentages of Stock Used in the Cities.

A similar table follows for the cities :

THE STATE, AND CITIES.	Value of Stock Used	Percentages
THE STATE.	\$461,254,353	100.00
Beverly,	1,986,771	0.43
Boston,	83,831,605	18.18

Holyoke,	12,255,556	2.66
Lawrence,	18,026,522	3.91
Lowell,	20,353,916	4.41
Lynn,	20,401,311	4.42
Malden,	4,632,502	1.00
Marlborough,	3,477,805	0.75
Medford,	570,869	0.12
New Bedford,	10,031,242	2.18
Newburyport,	3,034,997	0.66
Newton,	2,693,619	0.58
North Adams,	9,202,121	2.00
Northampton,	2,277,707	0.49
Pittsfield,	3,306,754	0.72
Quincy,	1,199,704	0.26
Salem,	6,185,206	1.34
Somerville,	12,241,118	2.65
Springfield,	8,436,384	1.83
Taunton,	4,864,081	1.05

THE STATE, AND CITIES.	Value of Stock Used	Percentages
Waltham,	\$1,734,371	0.38
Woburn,	3,796,547	0.82
Worcester,	20,072,858	4.35
Aggregate for towns,	120,770,285	26.18

In the city of Boston the value of stock used was \$83,831,605, or 18.18 per cent of the total value of stock used in the State; a far larger percentage than is found in any other city, and larger than in any single county, except the counties of Middlesex and Suffolk. The city ranking next to Boston in the percentage of stock used of the total stock used in the State, is Cambridge, this percentage being 5.07. The total value of stock used in the towns of the Commonwealth was \$120,770,285, or 26.18 per cent of the total value of stock used in the State, while the total value of stock used in the cities amounted to \$340,484,068, or 73.82 per cent of the total value of stock used in the State. That is, of every \$100 worth of stock used, \$73.82 was consumed in the cities and \$26.18 in the towns.

Goods Made and Work Done.

The presentation, pages 215-220, relates to the value of goods made and work done, by towns. The following analysis table enables a comparison to be made between the years 1885 and 1895:

THE STATE, AND COUNTIES.	VALUE OF GOODS MADE AND WORK DONE		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Amounts	Percentages
THE STATE.	\$674,634,269	\$849,807,302	+\$175,173,033	+25.97
Barnstable,	2,513,206	1,160,492	-1,352,714	-53.82
Berkshire,	21,105,616	28,303,698	+7,198,082	+34.11
Bristol,	52,670,730	80,149,744	+27,479,014	+52.17
Dukes,	149,071	226,883	+77,812	+52.20
Essex,	119,168,189	135,374,233	+16,206,044	+13.60
Franklin,	6,418,958	7,979,916	+1,560,958	+24.32
Hampden,	42,609,234	59,161,990	+16,552,756	+38.85
Hampshire,	12,138,065	11,980,836	-157,229	-1.30
Middlesex,	128,599,892	163,713,873	+35,113,981	+27.30
Nantucket,	126,619	145,895	+19,276	+15.22
Norfolk,	28,824,100	35,658,942	+6,834,842	+23.71
Plymouth,	27,819,116	38,596,486	+10,777,370	+38.74
Suffolk,	149,281,727	175,368,897	+26,087,170	+17.48
Worcester,	83,209,746	111,985,417	+28,775,671	+34.58

The total value of goods made in the State in the Census year, 1895, was \$849,807,302, as against \$674,634,269 in 1885, an increase of 25.97 per cent. Two counties show a decrease, namely, Barnstable and Hampshire, but these, as previously stated, are not leading industrial counties. The following counties show percentages of increase greater than the increase for the State, the percentage in each case being annexed: Dukes, 52.20; Bristol, 52.17; Hampden, 38.85; Plymouth, 38.74; Worcester, 34.58; Berkshire, 34.11; and Middlesex, 27.30. Although Dukes County appears in this list, the figures upon which the percentage is based are small, the total increase being but \$77,812.

A similar table for the cities follows:

THE STATE, AND CITIES.	VALUE OF GOODS MADE AND WORK DONE		INCREASE (+), OR DECREASE (—), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Amounts	Percentages

Salem,	9,845,681	10,465,019	+619,338	+6.29
Somerville,	23,791,932	16,064,706	—7,727,226	—32.48
Springfield,	12,528,823	16,569,228	+4,040,405	+32.25
Taunton,	7,325,008	9,947,686	+2,622,678	+35.80
Waltham,	4,491,614	5,000,456	+508,842	+11.33
Woburn,	7,105,897	5,782,266	—1,323,631	—18.63
Worcester,	28,699,524	41,082,611	+12,383,087	+43.15
Aggregates for towns,	199,896,155	222,785,137	+22,888,982	+11.45

The city showing the greatest increase in the value of goods made is Cambridge, the increase being \$22,170,911, or 143.02 per cent. Other cities which show large increases are the following, the percentage in each case being annexed: North Adams, 119.87; Newton, 114.46; Chelsea, 97.60; Chicopee, 85.92; New Bedford, 81.19; Malden, 75.43; Fitchburg, 70.57; Lawrence, 69.94; Fall River, 69.90; Brockton, 63.89; and Medford, 51.33. Some of the cities in which large percentages of increase are shown are not leading industrial cities, however, the large percentages being due to the fact that while their industries are limited, they have developed materially during the decade. Of the other industrial cities of the Commonwealth, Holyoke shows an increase of 46.15 per cent; Worcester, 43.15 per cent; Pittsfield, 37.32 per cent; Taunton, 35.80 per cent; Lowell, 33.42 per cent; Springfield, 32.25 per cent; Haverhill, 16.97 per cent; and Boston, 14.82 per cent. It will be noticed that the city of Somerville shows a decrease amounting to 32.48 per cent. This is largely, if not entirely, due to the fact that certain establishments manufacturing food products partly in Somerville and partly in Cambridge

were erroneously credited entirely to Somerville in 1885, but were not thus credited in 1895. To this fact is also due in a large measure the abnormal increase shown in the value of product for Cambridge.

Percentages of Goods Made and Work Done in the Counties.

The next table shows the value of goods made and work done in the counties, with the percentage which the value in each county forms of the total value for the State in 1895.

THE STATE, AND COUNTIES.	Value of Goods Made and Work Done	Percentages
THE STATE.	\$849,807,302	100.00
Barnstable,	1,160,492	0.14
Berkshire,	28,303,698	3.33
Bristol,	80,149,744	9.43
Dukes,	226,883	0.03
Essex,	125,374,233	15.93
Franklin,	7,979,916	0.94
Hampden,	59,161,990	6.96
Hampshire,	11,980,836	1.41
Middlesex,	163,713,873	19.26
Nantucket,	145,895	0.02
Norfolk,	35,658,942	4.19
Plymouth,	38,596,486	4.54
Suffolk,	175,368,897	20.64
Worcester,	111,985,417	13.18

The county of Suffolk shows a total product value of \$175,368,897, or 20.64 per cent of the total value of goods made and work done in the State. There are three other counties which show comparatively large percentages, namely, Middlesex, 19.26; Essex, 15.93; and Worcester, 13.18. The county of Bristol shows a product value amounting to 9.43 per cent of the total for the State; the county of Hampden, 6.96 per cent; and the counties of Plymouth and Norfolk, 4.54 and 4.19 per cent, respectively.

Percentages of Goods Made and Work Done in the Cities.

A similar comparison is presented in the next table which relates to the cities.

THE STATE, AND CITIES.	Value of Goods Made and Work Done	Percentages
THE STATE.	\$849,807,302	100.00
Beverly,	3,692,594	0.43
Boston,	165,774,080	19.51
Brockton,	21,913,734	2.58
Cambridge,	37,673,284	4.43
Chelsea,	8,994,330	1.06
Chicopee,	6,667,650	0.78
Everett,	1,884,193	0.22
Fall River,	38,934,678	4.58
Fitchburg,	10,629,400	1.25
Gloucester,	5,590,366	0.66

THE STATE, AND CITIES.	Value of Goods Made and Work Done	Percentages
Haverhill,	\$19,090,382	2.25
Holyoke,	22,781,222	2.68
Lawrence,	31,026,679	3.65
Lowell,	39,124,645	4.60
Lynn,	34,444,091	4.05
Malden,	7,436,724	0.88
Marlborough,	5,573,522	0.66
Medford,	1,714,890	0.20
New Bedford,	20,537,992	2.42
Newburyport,	5,175,736	0.61
Newton,	5,123,496	0.60
North Adams,	14,224,317	1.67
Northampton,	4,406,421	0.52
Pittsfield,	6,163,295	0.73
Quincy,	3,532,472	0.42
Salem,	10,465,019	1.23
Somerville,	16,064,706	1.89
Springfield,	16,569,228	1.95
Taunton,	9,947,686	1.17
Waltham,	5,000,456	0.59
Woburn,	5,782,266	0.68
Worcester,	41,082,611	4.83
Aggregate for towns,	222,785,137	26.22

The city of Boston exhibits a product value of \$165,774,080, or 19.51 per cent of the total for the State. Ranking next to Boston is the city of Worcester, with a product value of \$41,082,611, or 4.83 per cent of the total for the State. Other cities which approach this percentage are the following, the percentages being annexed in each case: Lowell, 4.60; Fall River, 4.58; Cambridge, 4.43; and Lynn, 4.05. Next to Lynn comes the city of Lawrence, having a product value of \$31,026,679, or 3.65 per cent of the total product for the State; and other cities approaching this percentage are Holyoke, 2.68; Brockton, 2.58; New Bedford, 2.42; and Haverhill, 2.25. The total value of goods made and work done in the towns of the Commonwealth is \$222,785,137, or 26.22 per cent of the total value of goods made and work done in the State; on the other hand, the value of goods made and work done in the cities is \$627,022,165, or 73.78 per cent of the total value for the State. That is, of every \$100 worth of goods made and work done, \$73.78 is found in the cities and \$26.22 in the towns.

PERSONS EMPLOYED: BY TOWNS.

PERSONS EMPLOYED: BY TOWNS.

[In this presentation are shown the average number of persons employed, the smallest number of persons employed, the greatest number of persons employed, and the excess of greatest over smallest number. By the term "Period of employment of smallest number" and "Period of employment of greatest number" is meant the time, reported by each establishment, when the smallest or greatest number, respectively, was employed. It should be borne in mind that the number of persons here enumerated are wage earners only; officers, clerks, bookkeepers, salesmen, or other salaried persons are not included.]

HOURLY, DAILY, AND PIECE HANDS:
BY TOWNS.

HOUR, DAY, AND PIECE HANDS: BY TOWNS.

[This presentation shows the number of hour, day, and piece hands, classified by sex, for that week of the Census year during which the greatest number of persons was employed. The aggregates do not, in every instance, agree with the aggregate greatest number of persons employed, as shown in the preceding presentation (pages 233 to 240). This is due to the fact that the persons here enumerated were returned for a certain specified week (the week of employment of greatest number), while in the preceding presentation the returns were for the month when the greatest number of persons was employed, on an average. It should be borne in mind that the number of persons here enumerated are wage earners only; officers, clerks, bookkeepers, salesmen, or other salaried persons are not included.]

PERSONS EMPLOYED: BY MONTHS
FOR CITIES.

PERSONS EMPLOYED: BY MONTHS. FOR CITIES.

[In this presentation is shown, for each city and for the State, the aggregate number of persons employed, by sex, during each month of the Census year, 1895, with a recapitulation showing the average number of males and females employed. This average number has been obtained by totalizing the number of persons employed each month and dividing the sum by 12. It should be borne in mind that the number of persons here enumerated are wage earners only; officers, clerks, bookkeepers, salesmen, or other salaried persons are not included. Similar presentations for the towns of the Commonwealth can be prepared from information in the office and will be supplied upon request.]

* This average, 430,310, does not agree with that shown in the first line of the recapitulation on page 240, viz., 432,272, the latter having been computed on a different basis, that of the establishment, while the above was obtained on the basis of months, as explained in the head-note on page 251.

SAME NUMBER OF PERSONS EMPLOYED:
BY TOWNS.

SAME NUMBER OF PERSONS EMPLOYED: BY TOWNS.

[This presentation shows the number of establishments reporting the same number of persons employed during the entire year and the number of such persons classified as to sex. The total number of establishments in each city or town is also shown with the average number of persons employed during the year. The proper method of reading this table is as follows: In the town of Barnstable there are 71 establishments employing, on an average, 116 persons; eight of these establishments reported continuous employment during the entire year for 26 persons: 18 males and 8 females. Other lines may be read in a similar manner. Absence of figures in the last four columns indicates that no persons were continuously employed during the year. It should be borne in mind that the number of persons here enumerated are wage earners only; officers, clerks, bookkeepers, salesmen, or other salaried persons are not included.]

TABULAR ANALYSES

FOR THE FOLLOWING PRESENTATIONS:

	Pages
PERSONS EMPLOYED: BY TOWNS,	233-240
HOOR, DAY, AND PIECE HANDS: BY TOWNS,	241-248
PERSONS EMPLOYED: BY MONTHS. FOR CITIES,	249-254
SAME NUMBER OF PERSONS EMPLOYED: BY TOWNS,	255-262

Persons Employed. Average, Smallest, and Greatest Number.

The presentations relative to persons employed appear upon pages 233-262. The first section of this presentation shows the average number of persons employed, the smallest number of persons employed, the greatest number of persons employed, and the excess of greatest over smallest number, by towns. The recapitulation appears on page 240. The average number of persons employed for the State was 432,272, ranging from 357,249, the number employed at the periods of employment of the smallest number, to 518,744, the number employed at the periods of employment of the greatest number, the excess of greatest over smallest number being 161,495. If we assume that 518,744, the largest number employed at any one time, represents the maximum number employed in manufacturing and mechanical industries, it, of course, follows that 161,495 persons were out of employment at the time the smallest number of persons was employed. The duration of unemployment, however, does not appear in this table, but will be referred to in connection with the number of persons employed month by month, presented hereafter.

The following analysis table brings forward the average number, smallest number, greatest number, and excess of greatest over smallest number, for the cities:

THE STATE, AND CITIES.	Average Number	Smallest Number	Greatest Number	Excess of Greatest over Smallest Number

Aggregate for towns,	129,087	103,299	158,189	54,890

The city of Boston shows the largest average number of persons employed, namely, 57,108, followed by Fall River, with 28,703; Lowell, 28,260; Worcester, 21,733; Lawrence, 18,497; Lynn, 14,778; New Bedford, 14,382; Holyoke, 12,809; and Cambridge, 12,017. The average number does not exceed 10,000 in any other city, Brockton standing next on the list with 9,614. The range of unemployment as indicated by the excess of greatest over smallest number was widest in Boston, where this excess was 24,282; while elsewhere the excess does not exceed that shown in Lynn, which ranks next to Boston, with an excess of 8,312.

The following table shows the percentages which the average number employed in each of the counties constitutes of the aggregate average for the State, and also the percentages found in each county of the aggregates employed at the periods of employment of the smallest and greatest number, respectively, and of the excess of greatest over smallest number:

THE STATE, AND COUNTIES.	Average Num- ber	Smallest Num- ber	Greatest Num- ber	Excess of Greatest over Smallest Num- ber
THE STATE.	100.00	100.00	100.00	100.00
Barnstable,	0.15	0.15	0.21	0.32
Berkshire,	3.42	3.26	3.46	3.92
Bristol,	12.91	14.02	11.94	7.35
Dukes,	0.03	0.02	0.04	0.09
Essex,	16.15	15.48	16.57	18.99
Franklin,	1.12	1.16	1.09	0.95
Hampden,	7.71	7.86	7.60	7.01
Hampshire,	1.89	1.90	1.84	1.70
Middlesex,	18.54	18.97	18.27	16.73
Nantucket,	0.02	0.02	0.04	0.07
Norfolk,	4.25	3.91	4.54	5.93
Plymouth,	4.23	4.27	4.22	4.11
Suffolk,	14.05	13.92	14.56	15.99
Worcester,	15.53	15.06	15.62	16.84

The average number employed in Middlesex County constituted 18.54 per cent of the average number employed in the State. Of the smallest number employed, Middlesex returns 18.97 per cent; and of the greatest number, 18.27 per cent. Essex County ranks next to Middlesex, with 16.15 per cent of the average number, 15.48 per cent of the smallest number, and 16.57 per cent of the greatest number. Next to Essex we find Worcester, with 15.53 per cent of the average number, 15.06 per cent of the smallest number, and 15.62 per cent of the greatest number; and next to Worcester the county of Suffolk, with 14.05 per cent of the average number, 13.92 per cent of the smallest number, and 14.56 per cent of the greatest number. Bristol County returns 12.91 per cent of the average number, 14.02 per cent of the smallest number, and 11.94 per cent of the greatest number. As compared with those we have mentioned, the other counties show smaller proportions, the county ranking next being Hampden, with 7.71 per cent of the average number, 7.86 per cent of the smallest number, and 7.60 per cent of the greatest number. As to the excess of greatest over smallest number, Essex County shows the largest percentage of the aggregate excess for the State, namely, 18.99; followed by Worcester, 16.84; Middlesex, 16.73; and Suffolk, 15.99. Between Suffolk and the next county, ranging downward, a wide difference appears, the county of Bristol showing 7.35 per cent of the excess; Hampden, 7.01 per cent; and the other counties still smaller percentages.

We next introduce an analysis table showing in the form of percentages, for each of the counties, the range of employment and unemployment during the Census year.

Plymouth,	69.66	30.34	100.00
Suffolk,	65.82	34.18	100.00
Worcester,	66.42	33.58	100.00

The percentage which the number of persons employed at periods of employment of the smallest number constitutes of the number employed at periods of employment of the greatest number, for the State at large, is 68.87. That is to say, as against every 100 persons employed at the periods of employment of the greatest number, about 69 only (68.87 per cent), were employed at the periods of employment of the smallest number, and about 31 persons (31.13 per cent) were unemployed. A similar comparison may be made for each of the counties. To illustrate, we may take the county of Bristol, in which the range of unemployment was less wide than in any other county. In Bristol, as against every 100 persons employed at the periods of employment of the greatest number, about 81 persons (80.83 per cent) were employed at the periods of

employment of the smallest number, and only about 19 persons (19.17 per cent) were unemployed. Or, we may take the county of Suffolk, in which, as against every 100 persons employed at the periods of employment of the greatest number, only about 66 persons (65.82 per cent) were employed at the periods of employment of the smallest number, and about 34 persons (34.18 per cent) were unemployed. It is not necessary to point out the conditions in the other counties, as they may be readily seen from the table in the manner illustrated.

The next table exhibits similar data for the cities.

Worcester,	69.09	30.91
All cities,	70.43	29.57
All towns,	65.30	34.70

Out of every 100 persons employed at the periods of employment of the greatest number, there were employed, at the periods of employment of the smallest number, in the city of Boston, about 66 persons (65.81 per cent) ; in Fall River, about 86 persons (85.63 per cent) ; in Worcester, about 69 persons (69.09 per cent) ; in Lowell, about 81

persons (81.03 per cent) ; in New Bedford, about 84 persons (83.98 per cent) ; in Lawrence, about 78 persons (78.25 per cent) ; in Lynn, about 57 persons (56.97 per cent) ; in Haverhill, about 48 persons (48.04 per cent) ; and in Brockton, about 72 persons (71.92 per cent). These are among the leading industrial cities of the Commonwealth. On the other hand, out of every 100 persons employed at the periods of employment of the greatest number there were unemployed at the periods of employment of the smallest number, in Boston, about 34 persons (34.19 per cent) ; in Fall River, about 14 persons (14.37 per cent) ; in Worcester, about 31 persons (30.91 per cent) ; in Lowell, about 19 persons (18.97 per cent) ; in New Bedford, about 16 persons (16.02 per cent) ; in Lawrence, about 22 persons (21.75 per cent) ; in Lynn, about 43 persons (43.03 per cent) ; in Haverhill, about 52 persons (51.96 per cent) ; and in Brockton, about 28 persons (28.08 per cent). It is clear from these figures that the range of unemployment was much narrower in Fall River, New Bedford, Lowell, and Lawrence, which are leading textile cities, than in Lynn, Haverhill, or Brockton, which are leading boot and shoe cities, or than it was in Boston and Worcester, which are cities of diversified industries, inasmuch as in these textile cities a smaller percentage of the maximum number on the rolls was unemployed at the periods of employment of the minimum number. In the cities combined, at the periods of employment of the smallest number, there were about 70 persons employed (70.43 per cent), and there were about 30 persons unemployed (29.57 per cent), as against 100 persons reported as employed at the periods of employment of the greatest number. In the towns combined, on the other hand, at the periods of employment of the smallest number, there were about 65 persons employed (65.30 per cent), and about 35 persons unemployed (34.70 per cent), as against 100 persons representing the maximum number.

Hour, Day, and Piece Hands.

The second section of the presentation, pages 241-248, shows the number of hour, day, and piece hands, by towns, classified by sex, for that week of the Census year during which the greatest number of persons was employed. As explained in the note preceding the presentation, the aggregates do not in every instance agree with the aggregate number of persons employed as shown in the presentation, pages 233-240. This is due to the fact that the persons enumerated were returned for a certain specified week, namely, the week of employment of the greatest number, while in the other presentation, the return was for the month in which the greatest average number of persons was employed.

The recapitulation for the State, by counties, may be found on page 248. From this it appears that the aggregate number of persons employed, of both sexes, for the State, obtained from numbers employed during the weeks of largest employment was 518,626, the males numbering 368,861 and the females 149,765. The aggregates may be classified as follows: Hour hands, both sexes, 138,612; day hands, both sexes, 201,017; and piece hands, both sexes, 178,997. Of the males, 110,773 were hour hands, 173,763 day hands, and 84,325 piece hands; while of the females, 27,839 were hour hands, 27,254 day hands, and 94,672 piece hands.

The following analysis table shows the number of persons working by the hour, by the day, or by the piece, with percentages :

THE STATE, AND CLASSIFICATION.	NUMBER OF PERSONS			PERCENTAGES		
	Males	Females	Both Sexes	Males	Females	Both Sexes
THE STATE.	368,861	149,765	518,626	100.00	100.00	100.00
Hour hands,	110,773	27,839	138,612	30.03	18.59	26.73
Day hands,	173,763	27,254	201,017	47.11	18.20	38.76
Piece hands,	84,325	94,672	178,997	22.86	63.21	34.51

Of the total number of persons considered, 26.73 per cent worked by the hour, 38.76 per cent by the day, and 34.51 per cent by the piece. Of the males, 30.03 per cent worked by the hour, 47.11 per cent by the day, and 22.86 per cent by the piece. Of the females, 18.59 per cent worked by the hour, 18.20 per cent by the day, and 63.21 per cent by the piece. It will be seen, therefore, that a very large proportion of the females employed in manufactures are piece workers, while, on the other hand, only about 23 persons in every 100 among the males (22.86 per cent), worked by the piece. A considerable number of the males, about 30 in every 100 (30.03 per cent), worked by the hour, while about 47 persons in every 100 among the males (47.11 per cent), worked by the day. The gradual reduction of the working time below ten hours has hastened the introduction of payment by the hour, the effect of which may be more readily seen from the presentation "Hour, Day, and Piece Hands: By Industries."

We are not able to trace the increase in the number of persons employed by the hour in 1895 as compared with previous Census years, for the reason that this distinction was not previously made. In 1885 and also in 1875 the classification presented simply day hands and piece hands, including under the term "day hands" all who were paid for a specified time unit, as distinct from those paid by the piece. For the purpose of comparison we may combine the hour and day hands returned in 1895. This is done in the following table:

THE STATE, AND CLASSIFICATION.	NUMBER OF PERSONS			PERCENTAGES		
	1875	1885	1895	1875	1885	1895
THE STATE.	266,339	379,328	518,626	100.00	100.00	100.00
Day hands,	176,753	232,634	339,629	66.36	61.33	65.49
Piece hands,	89,586	146,694	178,997	33.64	38.67	34.51

The number of piece hands employed in 1875 constituted 33.64 per cent of the total number of persons employed; in 1885, 38.67 per cent; and in 1895, 34.51 per cent. On the other hand, the number of persons employed otherwise than by the piece constituted 66.36 per cent of the total number in 1875, 61.33 per cent in 1885, and 65.49 per cent in 1895. As compared with 1875, there has been a slight increase in the percentage of piece hands employed, but as compared with 1885, a material decrease.

The next analysis table exhibits the relative number of males and females among the hour hands, day hands, and piece hands, respectively, with percentages.

THE STATE, AND CLASSIFICATION.	NUMBER OF PERSONS		PERCENTAGES	
	Males	Females	Males	Females
THE STATE.	368,861	149,765	71.12	28.88
Hour hands,	110,773	27,839	79.92	20.08
Day hands,	173,763	27,254	86.44	13.56
Piece hands,	84,325	94,672	47.11	52.89

Of the total number of persons employed, the males constituted 71.12 per cent and the females 28.88 per cent. Of the hour hands, the males constituted 79.92 per cent, and the females only 20.08 per cent; of the day hands, the males formed 86.44 per

cent, and the females only 13.56 per cent; while of the piece hands the males constituted 47.11 per cent and the females 52.89 per cent.

Persons Employed: by Months. For Cities.

The third section of the presentation relating to persons employed will be found upon pages 249-254, showing the number of persons employed, by months, for the cities and for the State. In this presentation is shown the aggregate number of persons employed, by sex, in each of the cities, during each month of the Census year, with a recapitulation for the State showing the average number of males and females employed. This average number has been obtained by totalizing the number of persons employed each month and dividing the sum by 12. A similar presentation for any town in the Commonwealth can be prepared from information in the office and will be supplied upon request, but in order to condense the presentation the towns have been omitted.

From the recapitulation on page 254, it will be seen that the number of persons employed month by month ranges from 407,910 in the month of January, the smallest number found in any single month, to 443,242 in the month of October, the largest number found in any single month. On the whole, the employment month by month is much more uniform than might be expected. Elsewhere we shall show, for every person employed in gainful occupations, the exact amount of lost time due to lack of employment in the occupations regularly pursued, and also the amount of time employed in other occupations, and the total amount of idleness. The information upon this point is based upon a house-to-house canvass, conducted in enumerating the population. The tables in the present volume are, of course, based upon the returns made by the manufacturers, showing the number of persons upon their rolls.

The average number of persons employed monthly, for the State, was 430,310, this number closely approximating the number employed in the month of July, in which 430,334 persons were employed. The averages shown in this table, for the State and for the cities, are averages based upon *monthly* employment computed in the manner just explained, and vary somewhat from the averages given in the recapitulation on page 240, which was computed upon a different basis, that of the establishment, as stated in the note on page 254.

The following table shows the averages for 1895, by sex, in comparison with those of other Census years, with percentages:

THE STATE, AND SEX.	NUMBER OF PERSONS EMPLOYED			PERCENTAGES		
	1875	1885	1895	1875	1885	1895
THE STATE.	308,963	379,328	430,310	100.00	100.00	100.00
Males,	214,308	263,824	300,645	69.36	69.55	69.87
Females,	94,655	115,504	129,665	30.64	30.45	30.13

The average number of persons employed, based upon the average of the number employed monthly in 1895, was 430,310, of whom 69.87 per cent were males and 30.13 per cent females. In 1885, the average number of persons employed was 379,328, the males constituting 69.55 per cent and the females 30.45 per cent. In 1875, the average number was 308,963, the males constituting 69.36 per cent and the females 30.64 per cent.

The next analysis table, drawn from the first recapitulation on page 254, shows the average number of persons employed per establishment for All Industries, with percentages of employment and unemployment, respectively, for each month.

MONTHS.	Average Number of Persons Employed per Establish- ment	PERCENTAGES OF —	
		Employment during Months Specified	Unemployment during Months Specified
January,	16	92.03	7.97
February,	16	92.38	7.62
March,	16	94.62	5.38
April,	16	96.98	3.02
May,	17	99.38	0.62
June,	17	99.70	0.30
July,	16	97.09	2.91
August,	16	97.56	2.44
September,	17	99.22	0.78
October,	17	100.00	—
November,	17	99.29	0.71
December,	16	96.73	3.27

In the above table 100 per cent is considered as representing the greatest number of persons employed. This percentage is found in the month of October. The month which exhibits the largest percentage of unemployment is, of course, that in which the smallest number was employed. This was the month of January, in which the number employed constituted 92.03 per cent of the maximum number, assuming that the number employed in October was the maximum number, while on the other hand, the persons unemployed constituted 7.97 of the maximum number. In February, the percentage unemployed was 7.62, and in March, 5.38. The percentage of persons employed then increased so that the percentage unemployed in April was but 3.02. In May and June, respectively, 99.38 and 99.70 per cent of the maximum number appeared upon the rolls, and in July, 97.09 per cent. In this month the percentage of persons unemployed was 2.91, and in the following month, August, was 2.44. In September, the percentage of persons employed rose to 99.22, reaching, as has been stated, 100 in October. It dropped again to 99.29 in November, and to 96.73 in December. The average number of persons employed per establishment was 16 in the months of January, February, March, April, July, August, and December, and 17 in the other months.

Same Number of Persons Employed During the Year.

The fourth section of the presentation relating to persons employed, pages 255-262, shows the establishments in which the same number of persons was employed during the entire year, and the number of such persons classified as to sex. The total number of establishments in each city and town is also shown, with the average number of persons employed during the year. The recapitulation appears upon page 262. The total number of establishments in the State, as previously stated, was 26,265, the average number of persons employed being 432,272. Of these establishments, 5,489 reported the same number of persons employed continuously during the year, including in the aggregate 53,041 persons, of whom 37,865 were males and 15,176 females.

It should be understood that the number reported as being employed during the entire year may not represent identical persons. Nevertheless, the fact is that the number of employes did not vary from month to month, and while precisely the same individuals may not have been employed continuously, the number was kept up to a certain figure, implying that if any were discharged or gave up their places, others were substituted.

The following analysis table brings forward the figures for the counties, with percentages, enabling a comparison of the number of persons continuously employed with the average number employed:

THE STATE, AND COUNTIES.	ESTABLISHMENTS			PERSONS EMPLOYED		
	Total Number	Reporting same Number of Persons Employed during Entire Year	Percentages of Total Number	Average Number	Same Number of Persons Employed during Entire Year	Percentages of Average Number
THE STATE.	26,265	5,489	20.90	432,272	53,041	12.27
Barnstable, . . .	328	33	10.06	666	84	12.61
Berkshire, . . .	837	149	17.80	14,794	686	4.64
Bristol, . . .	1,985	410	20.65	55,813	18,024	32.29
Dukes, . . .	76	6	7.89	131	7	5.34
Essex, . . .	4,071	719	17.66	69,808	4,905	7.03
Franklin, . . .	498	71	14.26	4,851	558	11.50
Hampden, . . .	1,489	282	18.94	33,311	2,445	7.34
Hampshire, . . .	575	109	18.96	8,183	432	5.28
Middlesex, . . .	4,389	841	19.16	80,162	4,999	6.24
Nantucket, . . .	55	3	5.45	72	5	6.94
Norfolk, . . .	1,352	239	17.68	18,370	1,924	10.47
Plymouth, . . .	1,242	238	19.16	18,269	2,604	14.25
Suffolk, . . .	5,861	1,808	30.85	60,721	12,305	20.26
Worcester, . . .	3,507	581	16.57	67,121	4,063	6.05

The number of establishments reporting the same number of persons continuously employed during the year constituted 20.90 per cent of the total number of establishments in the State, and the number of persons thus given continuous employment constituted 12.27 per cent of the average number of persons employed. That is to say, of every 100 persons included in the average number, about 12 were continuously employed in the same establishment. The largest number of establishments reporting the same number of persons continuously employed is found in the county of Suffolk, in which 30.85 per cent of the total number of establishments made this return; and the number of persons continuously employed therein constituted 20.26 per cent of the average number of persons employed. In Bristol County, the number of establishments reporting the same number of persons employed during the entire year constituted 20.65 per cent of the entire number of establishments, and the number of persons thus continuously employed in these establishments constituted 32.29 per cent of the average number. With respect to the percentage which the number of persons continuously employed in the same establishment forms of the average number of persons returned, these two counties are considerably in advance of the others, the next county in the scale being Plymouth, in which the number of persons continuously employed in the same establishment constituted 14.25 per cent of the average number of persons employed. Of the persons continuously employed in the same establishment during the entire year, 71.39 per cent were males and 28.61 per cent females.

WAGES, SALARIES, AND EARNINGS:
BY TOWNS.

WAGES, SALARIES, AND EARNINGS: BY TOWNS.

[This presentation shows the total amount paid in wages, the average number of wage earners employed, and the average amount of yearly earnings; also the total amount paid in salaries, the total number of salaried persons employed, and the average amount paid to each during the Census year, 1895. The proper method of reading this presentation is as follows: In the town of Barnstable there were 116 wage earners employed to whom the sum of \$52,428, in the aggregate, was paid; an average for the year of \$451.97 per individual, without regard to sex or age. There were two salaried persons employed to whom the sum of \$1,150 was paid, an average of \$575 per annum for each individual. Other lines may be read in a similar manner. The average earnings shown in this presentation have been obtained by dividing the total amount paid in wages by the figures representing the average number of wage earners; and similarly, average salaries, by dividing the aggregate amount paid in salaries by the number of persons receiving same. It should be borne in mind that aggregates under "Wages" represent the sums paid to wage earners only, and do not include the amounts paid to officers, clerks, bookkeepers, salesmen, or other salaried persons. The amounts paid to the latter are given under "Salaries."]

CLASSIFIED WEEKLY WAGES.
FOR CITIES.

CLASSIFIED WEEKLY WAGES. FOR CITIES.

[In this presentation are shown, for each city and for the State, a classification of the weekly wage, ranging from under \$5 per week to \$20 per week and over, and the number of males and females receiving such wage. The returns were made by manufacturers to cover the week during which the largest number of persons was employed. It should be borne in mind that the rates specified were paid to wage earners only; amounts paid to officers, clerks, bookkeepers, salesmen, or other salaried persons are not included. Similar presentations for the towns of the Commonwealth can be prepared from information in the office and will be supplied upon request.]

TABULAR ANALYSES

FOR THE FOLLOWING PRESENTATIONS:

	Pages
WAGES, SALARIES, AND EARNINGS: BY TOWNS,	273-280
CLASSIFIED WEEKLY WAGES: FOR CITIES,	281-286

Wages, Salaries, and Earnings.

The presentation, pages 273-280, shows the total amount paid in wages, the average number of wage earners employed, and the average amount of yearly earnings; also the total amount paid in salaries, the total number of salaried persons employed, and the average amount paid to each, during the Census year, 1895, by cities and towns, with a recapitulation for the counties and the State.

The average earnings shown in this presentation have been obtained by dividing the total amount paid in wages by the figures representing the average number of wage earners; and, similarly, average salaries have been obtained by dividing the aggregate amount paid in salaries by the number of persons receiving the same. It should be borne in mind that the aggregates under "Wages" represent the sums paid to wage earners only, and do not include the amounts paid to officers, clerks, bookkeepers, salesmen, or other salaried persons. The amounts paid to persons other than wage earners are given under the head of "Salaries."

The recapitulation for the State and counties appears upon page 280. The average number of wage earners for the State was 432,272 and the total amount paid in wages, \$192,970,059. The average earnings, obtained, as previously stated, by the division of the amount paid in wages by the figure representing the average number of wage earners, are \$446.41. Similarly, the average number of salaried persons is 18,823, the total amount paid in salaries \$23,812,542, and the average salary, obtained in the same manner as average earnings, \$1,265.08.

Average salaries and average earnings obtained in this way are only useful in comparison with other averages similarly obtained. Any average is more or less misleading, because in computing it no account can be taken of dissimilar elements affecting both the dividend and the divisor. For example, no account can be taken of the relative proportions of the sexes, or of differences in ages or in skill in the various establishments, differences which are increased when numerous industries operated under very dissimilar conditions are combined. The difference in the proportions of males and females employed, the different proportions of day and piece hands, the greater proportion of adult employment in some industries than in others, and the different degrees of skill required in some industries as compared with others, all affect the total amount paid in wages, and therefore affect in different degrees the average earnings. Hence, the fact that the average number of persons employed is used as the divisor in obtaining the average, and the total amount paid in wages as the dividend, implies that an uncertain figure will result from the division, having no real statistical value if con-

sidered apart from other elements, or if compared with averages otherwise obtained, since males and females, young persons and adults, day hands and piece hands, are indiscriminately included in the average number of persons employed. Nevertheless, an average may serve a legitimate purpose when compared only with other averages obtained in the same way, and it would even be possible to secure an average wage for weavers, lasters, or any other special branch, that would be fairly representative, inasmuch as it would be based upon units of the same kind in each case. In this restricted sense the expression "average rate of earnings" may be permitted.

The following analysis table shows the total amount paid in wages in the State and in each county, for 1895 and 1885, with the increase or decrease in amounts and percentages :

THE STATE, AND COUNTIES.	TOTAL AMOUNT PAID IN WAGES		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Amounts	Percentages
THE STATE.	\$147,415,316	\$192,970,059	+\$45,554,743	+30.90
Barnstable,	391,437	258,675	-132,762	-33.92
Berkshire,	4,553,719	6,095,915	+1,542,196	+33.87

Dukes,	31,503	61,540	+30,037	+95.35
Essex,	26,521,664	30,957,992	+4,436,328	+16.73
Franklin,	1,669,949	2,180,562	+510,613	+30.58
Hampden,	10,342,563	14,366,550	+4,023,987	+38.91
Hampshire,	2,712,549	3,015,671	+303,122	+11.17
Middlesex,	25,055,764	35,038,219	+9,982,455	+39.84
Nantucket,	24,184	25,676	+1,492	+6.17
Norfolk,	6,924,221	8,727,686	+1,803,465	+26.05
Plymouth,	7,079,183	9,316,170	+2,236,987	+31.60
Suffolk,	28,284,840	32,768,385	+4,483,545	+15.85
Worcester,	19,906,693	29,024,813	+9,118,120	+45.80

The total amount paid in wages has risen from \$147,415,316 in 1885 to \$192,970,059 in 1895, an increase of \$45,554,743, or 30.90 per cent. The largest percentage of increase is found in the county of Dukes, based, however, upon comparatively small amounts. Of the strictly industrial counties, Bristol leads with an increase of 51.84 per cent, the others following in the order named below, the percentage of increase in each case being annexed: Worcester, 45.80; Middlesex, 39.84; and Hampden, 38.91. The other counties which show a percentage of increase greater than the percentage for the State are, Berkshire, 33.87; and Plymouth, 31.60; while Franklin, although an agricultural county, shows an increase of 30.58 per cent, the amount paid in wages in manufacturing and mechanical industries therein having risen from \$1,669,949 in 1885 to \$2,180,562 in 1895.

The following table exhibits a similar comparison for the cities :

THE STATE, AND CITIES.	TOTAL AMOUNT PAID IN WAGES		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Amounts	Percentages
THE STATE.	\$147,415,316	\$192,970,059	+\$45,554,743	+30.90

Aggregates for towns,	45,640,710	55,372,887	+9,732,177	+21.32

The city showing the largest percentage of increase in the sum paid in wages is Newton, the aggregate amount having risen from \$613,862 in 1885 to \$1,427,911 in 1895, an increase of 132.61 per cent. This, however, is a residential rather than an industrial city. In Fitchburg, the increase was from \$1,271,329 in 1885 to \$2,717,692 in 1895, a gain of 113.77 per cent. Chicopee shows an increase of 104.33 per cent, and Malden an increase of 100.14 per cent. Of the other cities, the following show percentages of increase larger than that for the State, the percentage in each case being annexed: North Adams, 89.24; New Bedford, 77.03; Fall River, 75.91; Lawrence, 71.86; Pittsfield, 65.06; Cambridge, 65.03; Brockton, 59.33; Everett, 58.14; Lowell, 55.40; Holyoke, 54.46; Chelsea, 45.95; Worcester, 45.38; Medford, 44.05; and Salem, 34.59. The cities ranking next to Salem are Northampton and Taunton with increases of 19.12 and 17.57 per cent, respectively, and below this point the percentages of increase in the different cities are materially less. In the towns of the Commonwealth, the amount paid in wages has risen from \$45,640,710 in the aggregate in 1885 to \$55,372,887 in 1895, an increase of \$9,732,177, or 21.32 per cent; while in the cities as a whole the increase is from \$101,774,606 to \$137,597,172, a gain of \$35,822,566, or 35.20 per cent.

The next analysis table presents comparative data as to salaries, for 1885 and 1895.

THE STATE, AND COUNTIES.	TOTAL AMOUNT PAID IN SALARIES		INCREASE (+), OR DECREASE (—), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Amounts	Percentages
THE STATE.	\$10,846,367	\$23,812,542	+\$12,966,175	+119.54
Barnstable,	21,685	8,972	—12,713	—58.63
Berkshire,	394,169	796,054	+401,885	+102.97
Bristol,	1,009,431	2,036,622	+1,027,191	+101.76
Dukes,	465	5,971	+5,506	+1,184.09
Essex,	1,290,755	2,782,133	+1,491,378	+115.54
Franklin,	151,649	352,730	+201,081	+132.60
Hampden,	1,092,204	2,138,787	+1,046,583	+95.82
Hampshire,	224,042	458,984	+234,942	+104.87
Middlesex,	1,594,605	3,548,465	+1,953,860	+122.53
Nantucket,	275	300	+25	+9.09
Norfolk,	338,981	1,000,396	+661,415	+195.12
Plymouth,	288,580	784,129	+495,549	+171.72
Suffolk,	3,043,149	7,042,226	+3,999,077	+131.41
Worcester,	1,396,377	2,856,773	+1,459,396	+104.51

The total amount paid in salaries has risen from \$10,846,367 in 1885 to \$23,812,542 in 1895, an increase of \$12,966,175, or 119.54 per cent. The county of Barnstable alone shows a decrease. The county of Dukes shows the greatest percentage of increase, but the industries of the county in 1885 were very insignificant as compared with their condition in 1895, and they are still of small importance as compared with the other counties. Of the distinctively industrial counties, that of Suffolk leads, with an increase of 131.41 per cent. Bristol shows an increase of 101.76 per cent; Essex an increase of 115.54 per cent; Hampden an increase of 95.82 per cent; Middlesex an increase of 122.53 per cent; and Worcester an increase of 104.51 per cent. Some of the counties which are not distinctively industrial show percentages of increase greater than these, but, while indicating a greater proportionate advance, the figures upon which the percentages are based are comparatively small. Only six counties show a salary list in excess of one million dollars in both 1885 and 1895, these being Bristol, Essex, Hampden, Middlesex, Suffolk, and Worcester. In Norfolk County, however, the amount paid in salaries rises to \$1,000,396 in 1895, as against \$338,981 in 1885.

A similar table for the cities follows:

Worcester,	649,624	1,361,937	+712,313	+109.65
Aggregates for towns,	2,771,275	5,643,365	+2,872,090	+103.64

The largest sum paid in salaries is found in the city of Boston, the amount thus disbursed in 1885 being \$2,943,634, rising to \$6,585,768 in 1895, an increase of \$3,642,134, or 123.73 per cent. The city of Worcester ranks next to Boston, the sum paid in salaries being \$649,624 in 1885, and \$1,361,937 in 1895, an increase of 109.65 per cent. Of the leading industrial cities other than Boston and Worcester, the following, in order named, show a material increase, the percentages being annexed: Brockton, 265.17; Lawrence, 222.23; New Bedford, 144.70; Haverhill, 131.57; Holyoke, 125.82; Fall River, 115.07; Lynn, 105.73; Lowell, 67.08; and Taunton, 48.34. Some of the cities which are not distinctively industrial show even larger percentages of gain. The total amount paid in salaries in the industrial establishments conducted in the towns was \$2,771,275 in 1885, rising to \$5,643,365 in 1895, a gain of \$2,872,090, or 103.64 per cent; while the total amount paid in salaries in industrial establishments in the cities in 1885 was \$8,075,092, rising to \$18,169,177 in 1895, a gain of \$10,094,085, or 125 per cent.

Classified Weekly Wages. For Cities.

In the presentation, pages 281-286, are shown for each city and for the State, weekly wages classified, ranging from under \$5 per week to \$20 per week and over, and the number of males and females receiving such wages. The returns, as explained in the note preceding the presentation, were made to cover the week during which the largest number of persons was employed, and the rates specified apply to wage earners only. Upon request, similar statistics for the towns of the Commonwealth can be supplied from information in possession of the Department, but are not reported in print owing to limitations of space.

The returns relating to classified weekly wages are free from the misleading features attaching to averages, and indicate more closely the real conditions as to wages. Refer-

ring to the recapitulation on page 286, it will be seen that of the average number of persons employed in the State during the week when the largest number was employed, namely, 518,626, 64,149 received less than \$5 per week; 44,205 received \$5 but under \$6; 54,226, \$6 but under \$7; 49,135, \$7 but under \$8; 42,474, \$8 but under \$9; 54,474, \$9 but under \$10; 58,857, \$10 but under \$12; and 75,694, \$12 but under \$15; this being the largest number of persons found in any single wage group as classified. The persons receiving \$15 but under \$20 numbered 58,860, and those receiving \$20 and over, 16,552.

The following analysis table exhibits a comparison between 1885 and 1895, by sex, and shows also the percentage which the number receiving the various specified wages constituted of the whole number employed, both in 1885 and 1895. It may be said that in 1885 the returns did not include all the persons receiving wages, but comprised a number sufficiently large to be typical. For that reason we have not brought forward the numbers employed in each wage class, relying for comparison upon the percentages only.

CLASSIFICATION OF WEEKLY WAGE.	1885			1895		
	Males	Females	Both Sexes	Males	Females	Both Sexes
THE STATE.	100.00	100.00	100.00	100.00	100.00	100.00
Under \$5,	8.99	34.59	16.57	6.82	26.05	12.37
\$5 but under \$6,	4.85	20.04	9.35	4.56	18.28	8.52
\$6 but under \$7,	6.77	18.31	10.18	7.11	18.69	10.46
\$7 but under \$8,	8.39	10.79	9.10	7.92	13.29	9.47
\$8 but under \$9,	7.22	6.01	6.86	7.72	9.35	8.19
\$9 but under \$10,	11.21	4.25	9.15	12.29	6.10	10.50
\$10 but under \$12,	13.71	3.21	10.60	14.04	4.72	11.35
\$12 but under \$15,	19.37	1.78	14.16	19.48	2.57	14.60
\$15 but under \$20,	15.49	0.66	11.11	15.62	0.83	11.35
\$20 and over,	4.00	0.36	2.92	4.44	0.12	3.19

It will be seen from the percentages of both sexes employed in 1895, that, of the whole number employed, the largest percentage, namely, 14.60, is found in the class receiving \$12 but under \$15. The next largest percentage, 12.37, appears in the class receiving less than \$5. In 1885, the largest percentage is found in the class receiving under \$5, namely, 16.57; and the next largest in the class receiving \$12 but under \$15, namely, 14.16, a reversal of the relative positions of these two classes having taken place during the 10 years. In other words, the percentages indicate that in 1885, about 17 persons in every 100 employed (16.57 per cent) received less than \$5; while only about 12 persons in every 100 (12.37 per cent) received less than \$5 in 1895. Of the females employed in 1885, about 35 in every 100 (34.59 per cent) received less than \$5; while in 1895 only about 26 in every 100 (26.05 per cent) received such limited wage. Of the females, about 20 in every 100 in 1885 (20.04 per cent) received \$5 but under \$6; and in 1895 only about 18 in every 100 (18.28 per cent) were found in this class. The percentages of females receiving \$6 but under \$7 were practically the same in 1885 and 1895, namely, 18.31 and 18.69, respectively, or about 18 persons in every 100; but of females who received \$7 but under \$8, there were about 11 in every 100 in 1885 (10.79 per cent) and in 1895 about 13 in every 100 (13.29 per cent). The percentage of males receiving the lowest rate of wages has also declined since 1885. For example, about 9 persons in every 100 among the males (8.99 per cent) received less than \$5 in 1885, while about 7 in every 100 (6.82 per cent) received under \$5 in 1895. No material change has taken place among the males receiving \$5 but under \$6, but the percentage receiving \$6 but under \$7, has increased from 6.77 in 1885 to 7.11 in 1895; while the percentage of males receiving \$7 but under \$8 has declined from 8.39 to 7.92. The percentage of males re-

ceiving \$8 but under \$9 is practically the same at each date, 7.22 in 1885 and 7.72 in 1895; but the percentages of males receiving more than \$9 increased materially as compared with males receiving less than \$9, the number receiving \$9 but under \$10 having risen from about 11 in every 100 in 1885 (11.21 per cent), to about 12 in every 100 in 1895 (12.29 per cent). The percentage of males receiving \$10 but under \$12 has also risen from slightly less than 14 in every 100 (13.71 per cent) in 1885, to slightly more than 14 in every 100 (14.04 per cent) in 1895. In the other wage classes the percentages of males at each period show no material differences. While much the largest percentage of the males as a whole receive wages in excess of \$9, the contrary is true with respect to females, as the largest percentage is found in the wage classes below \$8, and as soon as the limit of \$9 is reached the proportion in each class materially declines.

The following table shows the percentages of males and females of the whole number employed in each wage class, in 1885 and 1895:

CLASSIFICATION OF WEEKLY WAGE.	1885		1895	
	Males	Females	Males	Females
THE STATE.	70.41	29.59	71.12	28.88
Under \$5,	38.22	61.78	39.19	60.81
\$5 but under \$6,	36.56	63.44	38.06	61.94
\$6 but under \$7,	46.80	53.20	48.38	51.62
\$7 but under \$8,	64.93	35.07	59.49	40.51
\$8 but under \$9,	74.09	25.91	67.04	32.96
\$9 but under \$10,	86.26	13.74	83.24	16.76
\$10 but under \$12,	91.05	8.95	87.99	12.01
\$12 but under \$15,	96.28	3.72	94.93	5.07
\$15 but under \$20,	98.24	1.76	97.88	2.12
\$20 and over,	96.31	3.69	98.88	1.12

Primarily, it should be noted that of the total number of persons for whom classified weekly wages were returned in 1885, about 70 in every 100 (70.41 per cent) were males and about 30 in every 100 (29.59 per cent) were females. In 1895, about 71 in every 100 (71.12 per cent) were males, and about 29 in every 100 (28.88 per cent) were females. Of those receiving under \$5, the males constituted 38.22 per cent in 1885 and 39.19 per cent in 1895; on the other hand, the females constituted 61.78 per cent of this class in 1885 and 60.81 per cent in 1895. At each date the females preponderate in the classes receiving under \$5, \$5 but under \$6, and \$6 but under \$7, the percentage of females in each of these classes, respectively, being 60.81, 61.94, and 51.62 in 1895, as against 61.78, 63.44, and 53.20 in 1885. In each of the other wage classes, the males preponderate, 59.49 per cent of those receiving \$7 but under \$8 being males in 1895 as against 64.93 per cent in 1885, the percentages for females being 35.07 and 40.51 for 1885 and 1895, respectively. In the classes receiving \$8 but under \$9, \$9 but under \$10, and \$10 but under \$12, the percentages of males employed were, respectively, 67.04, 83.24, and 87.99 in 1895, as against 74.09, 86.26, and 91.05 in 1885; while in the classes receiving \$12 but under \$15, \$15 but under \$20, and \$20 and over, the percentages of males employed were, respectively, 94.93, 97.88, and 98.88 in 1895, as against 96.28, 98.24, and 96.31 in 1885. While a comparatively small percentage of the females received more than \$9 per week, and an especially small percentage received more than \$12 per week, it is nevertheless true that the percentage of females in each of the wage groups above \$9, shows an advance since 1885, except those receiving \$20 and over. In this highest class, 3.69 per cent of the persons employed in 1885 were females, but in 1895 they comprised but 1.12 per cent.

MOTIVE POWER: BY TOWNS.

MOTIVE POWER: BY TOWNS.

[In this presentation are shown the kinds of motive power used in the cities and towns of the Commonwealth. They are subdivided as follows: Mechanical Power, Animal Power, Hand Power, Foot Power, and Hired Power. In order to avoid duplicating power already reported in the steam engines, the capacity of the boilers, although presented in the table, was omitted in making up total horse power. In some respects, the statistics of motive power are incomplete. The reasons therefor are apparent. Those manufacturing and mechanical establishments having steam boilers or engines on their own premises made returns for the same, but establishments using "hired power" made returns only of capacity for which they paid, while for establishments engaged in furnishing power to manufacturers as a business, or carrying on same in connection with trade, it is obvious that no returns would be made. Consequently, the steam power actually used in manufactures is undoubtedly greater than as given in this presentation. The number of persons running machinery by hand or foot power is also probably largely understated.]

COUNTY OF BARNSTABLE.

[No manufacturing or mechanical industries in the town of Eastham. No return of motive power in the town of Mashpee.]

MACHINERY AND TOOLS: BY TOWNS.

MACHINERY AND TOOLS: BY TOWNS.

[The value of implements, tools, and machinery (including machinery used for supplying motive power) in use in the Commonwealth during the Census year, 1895, is shown in the following presentation. It is classified as of home and foreign manufacture, separately, so as to permit comparisons. In order to avoid disclosing facts concerning individual establishments, the value has been intentionally omitted in certain towns, such omissions being indicated by a dagger and dash (†-) in each of the columns. (See the town of Mashpee in the county of Barnstable). The omitted figures are, however, included in the county and State totals. Towns making no return for machinery or tools have been omitted from the presentation.]

PROPORTION OF BUSINESS DONE
AND DAYS IN OPERATION:
BY TOWNS.

PROPORTION OF BUSINESS DONE AND DAYS IN OPERATION: BY TOWNS.

[The figures given in the second column of this presentation represent the average proportion of business done by each establishment in the cities and towns of the Commonwealth during the year ending December 31, 1895. Greatest capacity, or maximum production, has been considered as 100 per cent, and the percentages given indicate the average proportion of business done on that basis. The figures given in the third column represent the average number of days each establishment was in operation during the year. Days in operation are based upon persons employed, the number of days for each establishment being multiplied by the figures representing the average number of persons, and the sum of these results divided by the aggregate average number of persons, an average for each city and town and for the State being thus obtained.]

GENERAL STATISTICS OF MANUFACTURES.
FOR CITIES.

GENERAL STATISTICS OF MANUFACTURES. FOR CITIES.

[The information given in the preceding town presentations, relating to Number of Establishments (pages 5-53), Partners and Stockholders (pages 177-187), Amount of Capital Invested (pages 201-208), Value of Stock Used (pages 209-213), Value of Goods Made and Work Done (pages 215-219), Persons Employed (pages 233-240), Wages, Salaries, and Earnings (pages 273-280), and Proportion of Business Done and Days in Operation (pages 327-331) is brought together in the following presentation for the 32 cities and for the State. In the consideration of this presentation or in its use for purposes of comparison, reference should be made to the explanatory pages, head-notes, and foot-notes of the various town presentations for which reference pages are given above, and also to the "Tabular Analyses." Similar presentations for the towns of the Commonwealth can be prepared from information in the office and will be supplied upon request.]

TABULAR ANALYSES

FOR THE FOLLOWING PRESENTATIONS:

	Page
MOTIVE POWER: BY TOWNS,	295-320
MACHINERY AND TOOLS: BY TOWNS,	321-326
PROPORTION OF BUSINESS DONE AND DAYS IN OPERATION: BY TOWNS,	327-332
GENERAL STATISTICS OF MANUFACTURES: FOR CITIES,	333-340

Motive Power.

The presentation, pages 295-320, shows the kinds of motive power used in the manufacturing industries of the Commonwealth, by cities and towns, with a recapitulation for the counties and the State. The motive power is classified under the following heads: Mechanical power, subdivided so as to show the number and capacity of steam boilers, steam engines, and other kinds of engines and motors, windmills, etc.; Animal power (horses); Hand power, and Foot power, subdivided so as to show the number of males and females returned as running machinery exclusively by hand or foot power; and besides this there is shown the amount of Hired power.

The recapitulation for the State shows that the entire capacity of the mechanical power used in the manufacturing and mechanical industries was 676,792 $\frac{3}{4}$ horse power. The steam boilers numbered 7,862, having an aggregate horse power capacity of 617,185 $\frac{1}{2}$. In order to avoid duplicating power already reported in steam engines, the capacity of the boilers was omitted in making up the total horse power for the State, 676,792 $\frac{3}{4}$. The number of steam engines returned was 6,183, having an aggregate capacity of 485,572 horse power; gas engines 127, with 714 $\frac{1}{2}$ horse power; and oil engines 61, with 157 $\frac{1}{2}$ horse power. A few other kinds of engines were also returned, such as caloric, gasoline, hot-air, naphtha, and vapor. The number of water wheels used for supplying power was 2,412, the horse power capacity being 177,941 $\frac{1}{4}$, and there were 37 windmills, having a capacity of 93 horse power. The number of males and females employed on hand power machines was 2,838, and 3,192 were returned as operating foot power machines. There were also 979 horses used directly for the production of power. The amount of hired power returned by establishments engaged in the manufacturing industries was 14,281 $\frac{1}{2}$ horse power and is not included in the total horse power given above. In some respects the statistics of motive power are incomplete. Those manufacturing and mechanical establishments having steam boilers or engines on their own premises made returns for the same, but establishments using hired power made returns only of capacity for which they paid; while for establishments engaged in furnishing power to manufacturers as a business, or carrying on same in connection with trade, it is obvious that no returns would be made. Consequently, the steam power actually used in manufactures is probably greater than as here stated. The number of persons running machinery by hand or foot power is also probably understated. The same limitations, however, apply to the returns of the Census of 1885, and are scarcely to be avoided in any Census.

The following analysis table permits a comparison of motive power returned in 1885 and 1895, with increase or decrease noted in amounts and percentages :

CLASSIFICATION OF MOTIVE POWER.	NUMBER		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages
Steam boilers,	6,338	7,862	+1,524	+24.05
Steam engines,	4,317	6,183	+1,866	+43.22
Caloric engines,	38	9	-29	-76.32
Gas engines,	50	127	+77	+154.00
Gasoline engines,	-	3	+3	-
Hot-air engines,	-	1	+1	-
Naphtha engines,	-	1	+1	-
Oil engines,	14	61	+47	+335.71
Vapor engines,	-	7	+7	-
Water wheels,	2,576	2,412	-164	-6.37
Water motors,	-	35	+35	-
Electric motors,	22	1,254	+1,232	+5,600.00
Windmills,	23	37	+14	+60.87
Hand power,	2,477	2,838	+361	+14.57
Males,	1,768	1,652	-116	-6.56
Females,	709	1,186	+477	+67.28
Foot power,	2,584	3,192	+608	+23.53
Males,	1,403	1,209	-194	-13.83
Females,	1,181	1,983	+802	+67.91
Animal power :				
Horses,	270	979	+709	+262.59

We may point out, as shown by the above table, that the number of steam boilers increased to the extent of 24.05 per cent, and steam engines 43.22 per cent. Gas and oil engines also show large percentages of increase, although the numbers are not very great in either year. The number of water wheels shows a decline of 6.37 per cent. On the other hand, electric motors, which numbered 22 in 1885, have increased to 1,254 in 1895, and windmills show an increase from 23 to 37. The number of persons reported as running hand power and foot power machines show, respectively, increases of 14.57 per cent and 23.53 per cent; and while there were 270 horses used for the production of power in 1885, the number returned in 1895 is 979.

A comparison on the basis of horse power for the different forms of mechanical motive power is shown in the following table :

CLASSIFICATION OF MECHANICAL MOTIVE POWER.	NUMBER OF HORSE POWER (FULL CAPACITY)		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages
THE STATE.	451,729½	676,792½	+225,063½	+49.82
Steam engines,	301,318½	485,572	+184,253½	+61.15
Caloric engines,	151½	44	-107½	-70.96
Gas engines,	192½	714½	+522	+271.17
Gasoline engines,	-	48	+48	-
Hot-air engines,	-	4	+4	-
Naphtha engines,	-	5	+5	-
Oil engines,	34	157½	+123½	+362.74

CLASSIFICATION OF MECHANICAL MOTIVE POWER.	NUMBER OF HORSE POWER (FULL CAPACITY)		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages
Vapor engines,	-	40	+40	-
Water wheels,	149,906 $\frac{1}{4}$	177,941 $\frac{1}{4}$	+28,035	+18.70
Water motors,	-	90 $\frac{5}{16}$	+90 $\frac{5}{16}$	-
Electric motors,	58	12,083 $\frac{19}{48}$	+12,025 $\frac{19}{48}$	+20,733.44
Windmills,	68 $\frac{1}{2}$	93	+24 $\frac{1}{2}$	+35.77

The horse power of steam engines has risen from 301,318 $\frac{1}{2}$ in 1885 to 485,572 in 1895, an increase of 61.15 per cent; the horse power of water wheels has risen from 149,906 $\frac{1}{4}$ to 177,941 $\frac{1}{4}$, an increase of 18.70 per cent; horse power of windmills from 68 $\frac{1}{2}$ to 93, an increase of 35.77 per cent. There was only 58 horse power delivered from electric motors in 1885, but in 1895 there was 12,083 $\frac{19}{48}$. The other forms of mechanical motive power shown in the table are unimportant compared with those we have cited and need not be especially referred to.

The next table shows a comparison of horse power of steam engines in 1885 and 1895, by counties, and for the State.

THE STATE, AND COUNTIES.	HORSE POWER OF STEAM ENGINES (FULL CAPACITY)		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages
THE STATE.	301,318 $\frac{1}{2}$	485,572	+184,253 $\frac{1}{2}$	+61.15
Barnstable,	520 $\frac{1}{2}$	287	-233 $\frac{1}{2}$	-44.86
Berkshire,	12,286	16,216 $\frac{1}{2}$	+3,930 $\frac{1}{2}$	+31.99
Bristol,	67,610	129,121	+61,511	+90.98
Dukes,	33	80	+47	+142.42
Essex,	43,668	56,069	+12,401	+28.40
Franklin,	1,500 $\frac{1}{2}$	4,269	+2,768 $\frac{1}{2}$	+184.51
Hampden,	16,165 $\frac{1}{2}$	38,686	+22,520 $\frac{1}{2}$	+139.31
Hampshire,	6,653	9,082 $\frac{1}{2}$	+2,429 $\frac{1}{2}$	+36.52
Middlesex,	64,442 $\frac{1}{2}$	80,788 $\frac{1}{2}$	+16,346	+25.37
Nantucket,	-	18	+18	-
Norfolk,	11,492 $\frac{1}{2}$	19,719	+8,226 $\frac{1}{2}$	+71.58
Plymouth,	10,295	17,102 $\frac{1}{2}$	+6,807 $\frac{1}{2}$	+66.12
Suffolk,	27,074 $\frac{1}{2}$	36,207	+9,132 $\frac{1}{2}$	+33.73
Worcester,	39,577 $\frac{1}{2}$	77,926	+38,348 $\frac{1}{2}$	+96.89

The total horse power of steam engines for the State in 1885 was 301,318 $\frac{1}{2}$, rising to 485,572 in 1895, an increase of 61.15 per cent. Every county shows an increase except Barnstable in which a decrease of 44.86 per cent appears. The largest amount of horse power in any single county is found in Bristol, which includes, of course, the city of Fall River. In 1885, this county returned 67,610 horse power delivered from steam engines, while the figures for 1895 are 129,121, an increase of 90.98 per cent. Next to the county of Bristol ranks Middlesex, the figures for 1885 and 1895 being, respectively, 64,442 $\frac{1}{2}$ and 80,788 $\frac{1}{2}$, an increase of 25.37 per cent. Besides the county of Bristol, the following counties show a percentage of increase in horse power of steam engines greater than the percentage of increase for the State, the percentage in each case being annexed: Dukes, 142.42; Franklin, 184.51; Hampden, 139.31; Norfolk, 71.58; Plymouth, 66.12; and Worcester, 96.89. The figures upon which the percentage of the county of Dukes is based are quite small, only 80 horse power being returned for this

county in 1895. In Nantucket no horse power of steam engines was returned in 1885, and only 18 in 1895.

A similar table relating to the horse power of water wheels for the years 1885 and 1895 follows:

THE STATE, AND COUNTIES.	HORSE POWER OF WATER WHEELS (FULL CAPACITY)		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages
THE STATE.	149,906½	177,941½	+28,035	+18.70
Barnstable,	137	69½	-67½	-49.27
Berkshire,	13,780½	12,766½	-1,014	-7.36
Bristol,	5,678½	5,983½	+305	+5.37
Dukes,	34	12	-22	-64.71
Essex,	16,881¾	18,469½	+1,587¾	+9.41
Franklin,	10,203	12,962	+2,759	+27.04
Hampden,	31,866½	40,543½	+8,676¾	+27.23
Hampshire,	7,151	8,815½	+1,664½	+23.28
Middlesex,	26,732½	32,417	+5,684½	+21.26
Nantucket,	-	-	-	-
Norfolk,	4,565	4,216¾	-348½	-7.63
Plymouth,	4,038	3,940½	-97½	-2.41
Suffolk,	725	952¾	+227¾	+31.41
Worcester,	28,113½	36,792½	+8,679	+30.87

The full capacity of horse power delivered from water wheels for the State in 1885 was 149,906½, increasing to 177,941½ in 1895, a gain of 18.70 per cent. The counties of Barnstable, Berkshire, Dukes, Norfolk, and Plymouth show a decrease, while the others show an increase, except the county of Nantucket, in which no water wheels were returned in either year. The following counties show a percentage of increase greater than that for the State, the percentage in each case being annexed: Franklin, 27.04; Hampden, 27.23; Hampshire, 23.28; Middlesex, 21.26; Suffolk, 31.41; and Worcester, 30.87.

The next table presents a comparison for the years 1885 and 1895 relating to the horse power of electric motors.

THE STATE, AND COUNTIES.	HORSE POWER OF ELEC- TRIC MOTORS (FULL CAPACITY)		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages
THE STATE.	58	12,083½ ₄₈	+12,025½ ₄₈	+20,733.44
Barnstable,	-	-	-	-
Berkshire,	-	350	+350	-
Bristol,	-	697¾	+697¾	-
Dukes,	-	-	-	-
Essex,	31	3,922¾	+3,891¾	+12,553.76
Franklin,	-	17	+17	-
Hampden,	-	1,117	+1,117	-
Hampshire,	-	187	+187	-
Middlesex,	1	1,539½	+1,538½	+153,850.00
Nantucket,	-	-	-	-
Norfolk,	-	247½	+247½	-
Plymouth,	-	568¾ ₁₆	+568¾ ₁₆	-
Suffolk,	25	2,709¾	+2,684¾	+10,737.50
Worcester,	1	727¾	+726¾	+72,675.00

The aggregate horse power of electric motors returned for the State in 1885 was 58, rising to 12,083 $\frac{1}{2}$ in 1895. The only counties returning electric motor power in 1885 were, Essex, 31 horse power; Middlesex, one horse power; Suffolk, 25 horse power; and Worcester, one horse power. Essex now returns 3,922 $\frac{3}{4}$ horse power; Middlesex, 1,539 $\frac{1}{2}$; Suffolk, 2,709 $\frac{3}{4}$; and Worcester, 727 $\frac{3}{4}$. The percentages of increase based upon these figures are entirely abnormal, of course, although mathematically correct. The county of Hampden returns 1,117 horse power; Bristol, 697 $\frac{3}{4}$; Plymouth, 568 $\frac{1}{6}$; Berkshire, 350; Norfolk, 247 $\frac{1}{2}$; Hampshire, 187; and Franklin, 17.

A comparison for each of the cities, based upon the full capacity of horse power contained in the mechanical motive power returned for the years 1885 and 1895 follows:

CITIES AND CLASSIFICATION OF MECHANICAL MOTIVE POWER.	HORSE POWER (FULL CAPACITY)		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages

* No change.

It is not necessary to point out in detail the facts contained in the foregoing table. It is sufficient to say that all of the cities except Gloucester, Haverhill, and Newburyport show percentages of increase, although in the cities of Beverly, Lowell, Salem, Waltham, and Woburn, these percentages are not very great.

The next analysis table relates to the classification of motive power hired in the establishments reporting the use of hired power, for the cities.

CITIES AND KINDS OF HIRED MOTIVE POWER.	Number of Establish- ments Reporting Use of Hired Power	Horse Power (Full Capacity)	CITIES AND KINDS OF HIRED MOTIVE POWER.	Number of Establish- ments Reporting Use of Hired Power	Horse Power (Full Capacity)

			Electric,	184	1,261½¼

We summarize the facts for the State which are contained in the preceding table. The total horse power hired in the 1,400 establishments reporting the use of hired power is 14,281½¼, of which steam power is reported from 1,168 establishments, aggregating 12,209¾ horse power; gas from 10 establishments, aggregating 56¾ horse power; water from 38 establishments, aggregating 753½ horse power; and electric power from 184 establishments, aggregating 1,261½¼ horse power.

Machinery and Tools.

The presentation relating to machinery and tools, contained upon pages 321-326, shows for the towns and cities, with a recapitulation by counties and for the State, the value of implements, tools, and machinery (including machinery used for supplying motive power) in use in the Commonwealth during the Census year 1895. In order to permit comparisons, it is classified as of home and foreign manufacture separately. For the State at large, as will be seen from the recapitulation on page 325, the total value of machinery, implements, and tools in use in 1895 was \$178,735,454. Of this large aggregate value, \$165,402,676 represents the value of machinery, implements, and tools made at home, that is to say, in this country, while that of foreign manufacture is but \$13,332,778. In other words, 92.54 per cent of the entire value of machinery, implements, and tools used in the manufacturing and mechanical industries of Massachusetts is the product of home manufacture while only 7.46 per cent is imported. The largest aggregate value is returned from the county of Bristol, namely, \$38,341,886. Other counties which return large values are the following, in order named: Suffolk,

\$29,103,464; Middlesex, \$26,811,026; Essex, \$22,170,490; Worcester, \$21,508,026; and Hampden, \$16,594,768. Next to the county of Hampden ranks the county of Norfolk, the aggregate value, however, being only \$8,005,492; and from this point downward the values materially decline in the different counties.

The values of machinery, implements, and tools of home and foreign manufacture in the different counties are shown in the following table, with percentages:

THE STATE, AND COUNTIES.	VALUE OF MACHINERY, IMPLEMENTS, AND TOOLS		PERCENTAGES	
	Home Manufacture	Foreign Manufacture	Home Manufacture	Foreign Manufacture
THE STATE.	\$165,402,676	\$13,332,778	92.54	7.46
Barnstable,	143,440	250	99.83	0.17
Berkshire,	6,482,979	518,726	92.59	7.41
Bristol,	31,259,924	7,081,962	81.53	18.47
Dukes,	24,564	—	100.00	—
Essex,	20,003,630	2,166,860	90.23	9.77
Franklin,	2,140,257	2,030	99.91	0.09
Hampden,	15,784,755	810,013	95.12	4.88
Hampshire,	2,573,555	228,517	91.84	8.16
Middlesex,	25,366,227	1,444,799	94.61	5.39
Nantucket,	48,319	—	100.00	—
Norfolk,	7,972,632	32,860	99.59	0.41
Plymouth,	3,962,987	74,678	98.15	1.85
Suffolk,	28,785,371	318,093	98.91	1.09
Worcester,	20,854,036	653,990	96.96	3.04

Bristol contains a larger proportion of foreign made machinery, implements, and tools than any other county, namely, 18.47 per cent. The percentage in Essex County is 9.77, and in Hampshire County, 8.16. These are the only counties in which the percentage of machinery, implements, and tools of foreign manufacture is greater than that for the State. The Census of 1885 contained returns as to value of machinery only, while in 1895 the value of implements and tools is also included. We are therefore unable to make comparisons upon this point between the two censuses.

Proportion of Business Done and Days in Operation.

The presentation, pages 327–332, relates to the proportion of business done and days in operation during the Census year. The inquiries upon these points, as explained in the note at the beginning of the presentation, were intended to bring out the average proportion of business done and the average number of days in operation, for each establishment in the cities and towns of the Commonwealth during the year ending December 31, 1895. With respect to the proportion of business done, the greatest capacity or maximum production of the establishment, that is to say, the amount of production possible, if supported by a market demand, without enlarging the capacity of the plant, has been considered as 100 per cent, and the percentages given in the table indicate the average proportion of business done on that basis. With respect to the number of days in operation, the figures are based upon persons employed, the number of days for each establishment being multiplied by the figures representing the average number of persons employed therein, and the sum of these results divided by the aggregate average number of persons, an average for each city and town and for the State being thus obtained. The proportion of business done was not considered in 1885, except by industries, and that phase of the subject will be taken up in a subsequent presentation. For the State, however, the returns in 1885 indicated an average proportion of business done of 59.27 per cent, the average number of days in operation being 291. The

returns were neither so full nor so accurate as those obtained in 1895, owing to the fact that in 1885 the subject had been considered for the first time, while since 1886 returns have been made annually from the leading establishments in the State and presented in the Annual Statistics of Manufactures, so that the method of making up the returns is much better understood at the present time than formerly.

Turning to the recapitulation on page 331, we find that the average proportion of business done in 1895 for the State was 50.05 per cent, and the average number of days in operation 289.32. In order that the facts by counties may be directly before the reader, we reproduce them in the following analysis table:

THE STATE, AND COUNTIES.	Average Proportion of Business Done	Average Number of Days in Operation
THE STATE.	50.05	289.32
Barnstable,	37.09	244.72
Berkshire,	50.60	287.85
Bristol,	54.23	292.68
Dukes,	35.22	262.37
Essex,	49.96	292.71
Franklin,	43.43	274.96
Hampden,	51.66	289.53
Hampshire,	47.68	281.64
Middlesex,	49.30	291.69
Nantucket,	33.44	251.24
Norfolk,	48.91	282.46
Plymouth,	48.35	279.60
Suffolk,	50.61	289.28
Worcester,	51.12	287.67

In only five counties is the average proportion of business done in excess of the average shown for the State at large, namely, Berkshire, 50.60; Bristol, 54.23; Hampden, 51.66; Suffolk, 50.61; and Worcester, 51.12. The average proportion of days in operation shown for the State is exceeded in the following counties: Bristol, 292.68; Essex, 292.71; Hampden, 289.53; and Middlesex, 291.69. It will be seen, however, that the excess in proportion of business done and average number of days in operation, over the average given for the State, noted in a few of the above counties, is very slight. The figures showing average proportion of business done, if compared with the maximum capacity, which, as we have said, is represented by 100 in every case, indicate very plainly the exceptional depression in manufacturing industries which existed in 1895. This is, of course, shown in other parts of the Census returns, but is here especially apparent.

We introduce an analysis table containing the statistics of average number of days in operation, by counties, for 1885 and 1895, with the increase or decrease in number of days and by percentages.

THE STATE, AND COUNTIES.	AVERAGE NUMBER OF DAYS IN OPERATION		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages
THE STATE.	291.00	289.32	-1.68	-0.58
Barnstable,	259.13	244.72	-14.41	-5.56
Berkshire,	278.47	287.85	+9.38	+3.37
Bristol,	287.66	292.68	+5.02	+1.75

THE STATE, AND COUNTIES.	AVERAGE NUMBER OF DAYS IN OPERATION		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages
Dukes,	210.28	262.37	+52.09	+24.77
Essex,	290.94	292.71	+1.77	+0.61
Franklin,	281.92	274.96	-6.96	-2.47
Hampden,	290.47	289.53	-0.94	-0.32
Hampshire,	280.26	281.64	+1.38	+0.49
Middlesex,	293.14	291.69	-1.45	-0.49
Nantucket,	268.37	251.24	-17.13	-6.38
Norfolk,	289.18	282.46	-6.72	-2.32
Plymouth,	278.81	279.60	+0.79	+0.28
Suffolk,	301.97	289.28	-12.69	-4.20
Worcester,	289.52	287.67	-1.85	-0.64

With respect to the State at large the average number of days in operation in 1885 was 291; and in 1895, 289.32; a slight decrease in the latter as compared with the former year. The returns from the counties of Barnstable, Franklin, Hampden, Middlesex, Nantucket, Norfolk, Suffolk, and Worcester, show that the manufacturing establishments therein were operated, on an average, a less number of days in 1895 than in 1885. On the other hand, the average number of days in operation was greater in 1895 than in 1885 in the counties of Berkshire, Bristol, Dukes, Essex, Hampshire, and Plymouth.

General Statistics of Manufactures. For Cities.

General statistics of manufactures for the cities of the Commonwealth are brought together in the presentation, pages 333-340. This presentation gives for each city, in condensed form so as to be readily seen, the information relating to number of establishments, and whether private firms or corporations; partners and stockholders, with details as to sex, etc.; amount of capital invested; value of stock used; value of goods made and work done; persons employed, with details as to average number, smallest and greatest number, and excess of greatest over smallest; total amount paid in wages; average yearly earnings; number of salaried persons; total amount paid in salaries; average salaries; average proportion of business done; and the average number of days in operation. The figures contained in this presentation are, of course, brought forward from the preceding general tables which have been previously analyzed and need not be referred to here. Similar presentations for any of the towns in the Commonwealth can be prepared from information in the Census Office and can be supplied upon request. It was not thought advisable, however, to include them in such a general summary in this volume, owing to the space which would be required.

The following analysis table brings forward in the form of percentages the respective proportions of capital invested, value of stock used, value of goods made and work done, average number of persons employed, and total amount paid in wages in each of the counties, the aggregate for the State in each case being considered 100 per cent:

THE STATE, AND COUNTIES.	PERCENTAGES				
	Amount of Capital Invested	Value of Stock Used	Value of Goods Made and Work Done	Average Number of Persons Employed	Total Amount Paid in Wages
THE STATE.	100.00	100.00	100.00	100.00	100.00
Barnstable,	0.10	0.12	0.14	0.15	0.14
Berkshire,	4.38	3.62	3.33	3.42	3.16
Bristol,	15.60	8.71	9.43	12.91	10.95

THE STATE, AND COUNTIES.	PERCENTAGES				
	Amount of Capital Invested	Value of Stock Used	Value of Goods Made and Work Done	Average Number of Persons Employed	Total Amount Paid in Wages
Dukes,	0.03	0.02	0.03	0.03	0.03
Essex,	13.28	16.91	15.93	16.15	16.04
Franklin,	1.25	0.72	0.94	1.12	1.13
Hampden,	9.41	6.67	6.96	7.71	7.45
Hampshire,	1.76	1.36	1.41	1.89	1.56
Middlesex,	17.36	20.95	19.26	18.54	18.16
Nantucket,	0.02	0.01	0.02	0.02	0.01
Norfolk,	4.00	4.26	4.19	4.25	4.52
Plymouth,	2.82	4.76	4.54	4.23	4.83
Suffolk,	16.16	19.29	20.64	14.05	16.98
Worcester,	13.83	12.60	13.18	15.53	15.04

The facts presented in the preceding table are easily comprehended and need not be pointed out in detail, one or two illustrations being sufficient. Middlesex County contains 17.36 per cent of the capital invested, returns 20.95 per cent of the value of stock used, turns out 19.26 per cent of the value of goods made and work done, shows 18.54 per cent of the average number of persons employed, and returns 18.16 per cent of the total amount paid in wages. These percentages, with the exception of that relating to value of goods made and work done, which is exceeded in the county of Suffolk, are higher than those shown in any other county. The largest percentages as to all of the elements appear in the counties of Bristol, Essex, Middlesex, Suffolk, and Worcester.

A similar summary of percentages, for the cities, is contained in the following table:

THE STATE, AND CITIES.	PERCENTAGES				
	Amount of Capital Invested	Value of Stock Used	Value of Goods Made and Work Done	Average Number of Persons Employed	Total Amount Paid in Wages
THE STATE.	100.00	100.00	100.00	100.00	100.00
Beverly,	0.26	0.43	0.43	0.47	0.52
Boston,	14.93	18.18	19.51	13.21	16.03

All cities,	72.42	73.82	73.78	70.14	71.30
All towns,	27.58	26.18	26.22	29.86	28.70

The percentages relating to the city of Boston, as to each of the elements comprised in the table, are considerably larger than those for any of the other cities. In Boston we find 14.93 per cent of the capital invested, 18.18 per cent of the value of stock used, 19.51 per cent of the value of goods made and work done, 13.21 per cent of the average number of persons employed, and 16.03 per cent of the total amount paid in wages. It being borne in mind that in each case the total for the State is considered as 100 per cent, the position of the city of Boston with reference to the State can be readily seen.

The final lines of the table show that the aggregates for all the cities comprise 72.42 per cent of the amount of capital invested, 73.82 per cent of the value of stock used; 73.78 per cent of the value of goods made and work done; 70.14 per cent of the average number of persons employed; and 71.30 per cent of the total amount paid in wages; while outside of the cities, that is to say, in the towns, the returns include 27.58 per cent of the amount of capital invested, 26.18 per cent of the value of stock used, 26.22 per cent of the value of goods made and work done, 29.86 per cent of the average number of persons employed, and 28.70 per cent of the total amount paid in wages.

The final table in connection with the statistics of manufactures by towns shows the rank of the different cities and towns with respect to output, *i. e.* value of goods made and work done, in connection with their rank as to population. This table is now introduced.

* See head-note on page 217, ante.

† No manufacturing or mechanical industries.

The city of Boston ranks first and Worcester second as to value of goods made and work done and as to population. Lowell ranks third as to value of goods made and work done and fourth as to population, while Fall River ranks fourth as to value of goods made and work done and third as to population. The cities of Cambridge and Lynn rank respectively fifth and sixth as to both elements. At the other extremity of the scale we find the town of New Ashford, which ranks number 353 as to population and manufactures. There are, however, four towns which return no manufacturing or mechanical industries, and in that respect rank together. These towns are Eastham, Gosnold, Mount Washington, and New Ashford. For several towns, the value of goods made and work done is not presented, reference being made to the head-note to the table, page 217, in which the omission is explained.

DATE OF ESTABLISHMENT:
BY INDUSTRIES.

DATE OF ESTABLISHMENT: BY INDUSTRIES.

[This presentation shows the origin and growth of the manufacturing and mechanical industries by classified industry heads, such as "Agricultural Implements," "Boots and Shoes," "Cotton Goods," "Metals and Metallic Goods," "Woollen Goods," etc. The cities and towns in which the specified industries existed in the Census year, 1895, appear under the respective industry titles. The proper method of reading this table is as follows: Under the industry head "Agricultural Implements" there are 16 establishments, five of which are found in the county of Berkshire, their location being as follows: One in the town of Otis, established in the year 1845 (1845/1); one in the town of Sandisfield, established in the year 1860 (1860/1); and three in the town of Tyringham, one established in 1796 (1796/1), one in 1880 (1880/1), and one in 1888 (1888/1).]

CORPORATIONS, CAPITAL STOCK, ETC.:
BY INDUSTRIES.

CORPORATIONS, CAPITAL STOCK, ETC.: BY INDUSTRIES.

In this presentation are given statistics of such corporations as were engaged in manufacturing and mechanical industry in the Commonwealth during the Census year ending December 31, 1895. The first column gives the name of the industry, the date of incorporation, and, if originally established as a private firm, the date of such establishment. The presentation also includes the following: Whether the original establishment was a private firm or on a corporate basis; whether incorporated under general or special law; the State in which incorporated; a comparison of the amount of capital stock at the time of incorporation and on December 31, 1895; and a comparison of the number of stockholders at the time of incorporation and on December 31, 1895.

The proper method of reading the presentation is as follows: Referring to the industry entitled "Arms and Ammunition," we find six corporations; one was originally established in the year 1835 as a private firm; in 1890 it was incorporated under the general law of the State of Massachusetts, with a capital stock of \$75,000 and three stockholders; on December 31, 1895, the amount of capital stock remained the same, while the number of stockholders had increased to five. On the sixth line under this industry head may be noted a concern which was established and incorporated in the same year (1893) under the general law of the State of Maine. Its capital stock was \$100,000 at the time of incorporation and also at the close of the year 1895. There were seven stockholders at the date of incorporation and the same number held stock on December 31, 1895. Other lines may be read in a similar manner.

Duplications appear in this table and are indicated by an asterisk (*) following the name of the industry. (See Boots and Shoes). They are caused by the fact that the same firm or corporation is often engaged in manufacturing in two or more establishments located in the same town; sometimes in the same industry in different towns; and sometimes in more than one industry in the same town or in different towns. The plan adopted has been to consider each establishment as one (whether managed in connection with another or not), and to credit the whole number of corporations, stockholders, and amount of capital stock to each industry, but, in making up the total for All Industries, to omit the duplications.

It has been considered impracticable, in this presentation, to include the capital stock or the stockholders of certain establishments, such as associations, which have no corporate form of management; railroad corporations, in which but a small portion of the capital is invested in the repairing and equipping of railroad cars, etc.; and syndicates, wherein the capital is invested not only in this State but in others. To include them would be to increase abnormally the number of stockholders and the total amount of capital stock.

Associations are indicated by the sign (+), railroad corporations by the sign (||), and syndicates by the sign (§).

PARTNERS AND STOCKHOLDERS: BY INDUSTRIES.

26,265 establishments shown on pages 365-368. The partners are divided into general partners (males and males, females, banks, trustees, etc., estates, other firms and corporations, and charitable and educational given. There are duplications in the columns devoted to "Partners," "Stockholders," and "Aggregates." They are caused by the fact that the same firm or corporation is often engaged in manufacturing in two or times in more than one industry in the same town or in different towns. The plan adopted has been to consider number of partners and stockholders to each industry, but, in making up the total for All Industries, to omit the cases or associations, many of which have extensive investments of capital outside this Commonwealth, are not similar association, in connection with such merely branch establishments, incidental only to the main business

TABULAR ANALYSES

FOR THE FOLLOWING PRESENTATIONS:

	Pages
NUMBER OF ESTABLISHMENTS, PRIVATE FIRMS, AND CORPORATIONS: BY	
INDUSTRIES,	365-368
DATE OF ESTABLISHMENT: BY INDUSTRIES,	369-434
CORPORATIONS, CAPITAL STOCK, ETC.: BY INDUSTRIES,	435-460
PARTNERS AND STOCKHOLDERS: BY INDUSTRIES,	461-466

Number of Establishments, Private Firms, and Corporations.

The sections of the Census of Manufactures which appear upon pages 1-362 present the results by cities and towns. Those which begin upon page 363, relate to Manufactures by industries, and follow the same general order, as to subjects, as the series relating to Manufactures by cities and towns. The presentation covering number of establishments, private firms, and corporations, by industries, will be found on pages 365-368. The conditions for the State at large with reference to All Industries have already been fully analyzed in connection with the statistics by towns, pages 189, 190, and the points there brought out will not now be repeated. These points, of course, relate to the total for All Industries, shown upon page 367.

The conditions as to the nine leading industries of the State and a comparison between these industries, the other industries, and All Industries are given in the following analysis table:

INDUSTRIES.	Private Firms	Corporations	Associations, Syndicates, etc.	Total Establishments	PERCENTAGES		
					Private Firms	Corporations	Associations, Syndicates, etc.
Boots and shoes,	1,990	84	-	2,074	95.95	4.05	-
Carpetings,	5	9	-	14	35.71	64.29	-
Cotton goods,	43	145	-	188	22.87	77.13	-
Leather,	180	20	-	200	90.00	10.00	-
Machines and machinery,	500	153	7	660	75.76	23.18	1.06
Metals and metallic goods,	2,161	147	1	2,309	93.59	6.37	0.04
Paper and paper goods,	68	91	1	160	42.50	56.88	0.62
Woollen goods,	121	45	-	166	72.89	27.11	-
Worsted goods,	17	14	-	31	54.84	45.16	-
Nine industries,	5,085	708	9	5,802	87.64	12.20	0.16
Other industries,	19,494	917	52	20,463	95.27	4.48	0.25
All industries,	24,579	1,625	61	26,265	93.58	6.19	0.23

This table shows that the total number of establishments in 1895 in the industry Boots and Shoes was 2,074; 1,990 of these, or 95.95 per cent being private firms, and

84, or 4.05 per cent corporations. The number of establishments in this industry is, however, exceeded by the number of establishments in Metals and Metallic Goods, the aggregate number being 2,309, of which 2,161, or 93.59 per cent, are private firms and 147, or 6.37 per cent corporations. Besides these, there was one syndicate engaged in the industry. In the cotton goods industry 188 establishments were engaged, 43 being private firms and 145 corporations. That is, in this industry, 22.87 per cent of the entire number of establishments engaged were private firms and 77.13 per cent corporations. In Woollen Goods there were 166 establishments, 121 being private firms and 45 corporations; and in Worsted Goods, 31 establishments, 17 being private firms and 14 corporations.

It will be seen from these figures and others contained in the table that the boot and shoe industry and Metals and Metallic Goods are still largely in the hands of private firms. The same statement applies to the leather industry, in which out of 200 establishments, 180 are private firms and 20 corporations, and to Machines and Machinery, in which out of 660 establishments 500 are private firms. In all of the other leading industries the corporate form of management has assumed considerable proportions, the largest percentage of corporations, 77.13, being found in the cotton goods industry. In the nine leading industries shown in the table, namely, Boots and Shoes, Carpetings, Cotton Goods, Leather, Machines and Machinery, Metals and Metallic Goods, Paper and Paper Goods, Woollen Goods, and Worsted Goods, 5,802 establishments, in the aggregate, were returned; of these 5,085 were private firms, 708 corporations, and nine associations, syndicates, etc. Expressed in the form of percentages, the private firms constituted 87.64 per cent, corporations 12.20 per cent, and associations, syndicates, etc., sixteen one-hundredths of one per cent. In other industries than those mentioned in the table, shown in detail in the main presentation, there are, in the aggregate, 20,463 establishments; of these 19,494, or 95.27 per cent, are private firms; 917, or 4.48 per cent, corporations; and 52, or twenty-five one-hundredths of one per cent, associations, syndicates, etc.

Date of Establishment.

The date of establishment, by industries, is shown in the presentation, pages 369-434. This presentation is a complete index to the historical development of the different industries in the cities and towns of the Commonwealth. With respect to the entire number of establishments for the State, in All Industries, the analysis table, page 190, to which the reader is referred, is sufficiently full. We present, however, in the form of condensed analysis tables, recapitulations for the State covering Boots and Shoes, Cotton Goods, and Metals and Metallic Goods, the table relating to the first named industry being first presented.

Boots and Shoes.

PERIODS OF YEARS.	Number Established in Years Specified	PERIODS OF YEARS.	Number Established in Years Specified
1891 to 1895,	720	1851 to 1855,	22
1886 to 1890,	451	1846 to 1850,	24
1881 to 1885,	266	1841 to 1845,	14
1876 to 1880,	197	1831 to 1840,	10
1871 to 1875,	132	1821 to 1830,	2
1866 to 1870,	99	1811 to 1820,	5
1861 to 1865,	80	1801 to 1810,	1
1856 to 1860,	51	TOTALS,	2,074

Of the 2,074 establishments existing in the State in the boot and shoe industry in 1895, 720 were established during the years from 1891 to 1895; 451 from 1886 to 1890;

266 from 1881 to 1885; 197 from 1876 to 1880; and 132 from 1871 to 1875. The number of establishments founded in the quinquennial periods preceding 1871 grows constantly smaller. There was, however, one establishment in existence which was founded in the period 1801 to 1810; five which were founded in the period 1811 to 1820; and two in the period 1821 to 1830.

A table relating to Cotton Goods follows:

Cotton Goods.

PERIODS OF YEARS.	Number Established in Years Specified	PERIODS OF YEARS.	Number Established in Years Specified
1891 to 1895,	19	1851 to 1855,	13
1886 to 1890,	20	1846 to 1850,	9
1881 to 1885,	18	1841 to 1845,	11
1876 to 1880,	6	1831 to 1840,	18
1871 to 1875,	25	1821 to 1830,	12
1866 to 1870,	10	1811 to 1820,	8
1861 to 1865,	12	1801 to 1810,	1
1856 to 1860,	6	TOTALS,	188

Of the 188 establishments existing in the Census year in the cotton goods industry, 19 were established in the period 1891 to 1895; 20 in the years 1886 to 1890; 18 from 1881 to 1885; six from 1876 to 1880; and 25 from 1871 to 1875. All the other establishments were founded prior to 1871; and of these, one originated in the period 1801 to 1810; eight in the years from 1811 to 1820; and 12 from 1821 to 1830.

The figures for Metals and Metallic Goods follow:

Metals and Metallic Goods.

PERIODS OF YEARS.	Number Established in Years Specified	PERIODS OF YEARS.	Number Established in Years Specified
1891 to 1895,	597	1841 to 1845,	35
1886 to 1890,	382	1831 to 1840,	60
1881 to 1885,	295	1821 to 1830,	20
1876 to 1880,	253	1811 to 1820,	8
1871 to 1875,	224	1801 to 1810,	3
1866 to 1870,	151	1791 to 1800,	8
1861 to 1865,	74	1781 to 1790,	2
1856 to 1860,	76	1771 to 1780,	1
1851 to 1855,	59	1751 to 1760,	1
1846 to 1850,	60	TOTALS,	2,309

Of the 2,309 establishments existing in the Census year in Metals and Metallic Goods, 597 were founded in the years from 1891 to 1895; 382 from 1886 to 1890; 295 from 1881 to 1885; 253 from 1876 to 1880; and 224 from 1871 to 1875. At the other extremity of the scale we find one establishment dating from the period 1751 to 1760, and one from 1771 to 1780; two from 1781 to 1790; eight from 1791 to 1800; three from 1801 to 1810; eight from 1811 to 1820; and 20 from 1821 to 1830.

It will be possible to prepare similar tables for each of the industries shown in the main presentation, and the office can supply to any one interested such a statement rela-

tive to any particular industry ; but in order to save space it has not been thought advisable to insert them in this analysis.

Corporations, Capital Stock, Etc.

The presentation, pages 435-460, contains data relative to corporations, capital stock, etc., by industries. This presentation shows for such corporations as were engaged in manufacturing and mechanical industries in the Commonwealth during the Census year ending December 31, 1895, the date of incorporation, and, if originally established as a private firm, the date of such establishment. It also includes data showing whether the original establishment was a private firm or on a corporate basis ; whether incorporated under general or special law ; the State in which incorporated ; a comparison of the amount of capital stock at the time of incorporation and on December 31, 1895 ; and a comparison of the number of stockholders at the time of incorporation and on December 31, 1895. The information contained in the presentation, therefore, enables the reader to trace the development of the corporation in the different industries of the State.

The following analysis table, containing comparative figures for 1885 and 1895, shows the number of corporations in each of the nine leading industries at each census date, with percentages indicating the relation of the corporations in each of these industries separately and in the aggregate to the number in All Industries :

INDUSTRIES.	NUMBER OF CORPORATIONS		PERCENTAGES	
	1885	1895	1885	1895
Boots and shoes,	22	84	2.32	5.23
Carpetings,	7	9	0.74	0.56
Cotton goods,	111	145	11.70	9.04
Leather,	6	*25	0.63	1.56
Machines and machinery,	93	160	9.80	9.97
Metals and metallic goods,	99	148	10.43	9.22
Paper and paper goods,	58	92	6.11	5.73
Woollen goods,	38	45	4.00	2.80
Worsted goods,	8	14	0.84	0.87
Nine industries,	442	722	46.57	44.98
Other industries,	507	883	53.43	55.02
All industries,	949	1,605	100.00	100.00

* Includes Saddlery and Harness.

As in the Census of 1885 the industry now classed as Saddlery and Harness was included under the general term of Leather, the figures for Leather and Saddlery and Harness in 1895 have been combined. The establishments in the nine leading industries comprised in the aggregate 722 corporations in 1895, or 44.98 per cent of the entire number of corporations in All Industries ; therefore the corporations in the other industries, which number in the aggregate 883, constituted 55.02 per cent of the number of corporations in All Industries. In 1885 the number of corporations in the nine leading industries named was 442, a number much less than returned in 1895, but these corporations at that time constituted 46.57 per cent of the total number of corporations in All Industries, a slightly larger percentage than shown in 1895. The total number of corporations in All Industries in 1895 has risen from 949 to 1,605. The number returned in Boots and Shoes in 1895 is 84, as against 22 in 1885 ; in Carpetings, 9 as against 7 ; in Leather, 25 as against 6 ; in Cotton Goods, 145 as against 111 ; in Machines and Machinery, 160 as against 93 ; in Metals and Metallic Goods, 148 as against 99 ; in Paper and Paper Goods, 92 as against 58 ; in Woollen Goods, 45 as against 38 ; and in Worsted Goods, 14 as

against 8. Notwithstanding this material increase in the different industries, the proportions which the number in each of the industries bears to the total number, as indicated by percentages, do not in every case show so great a change. For example, the number of incorporated establishments in Boots and Shoes in 1885 constituted 2.32 per cent of the total number of corporations in All Industries, and in 1895, 5.23 per cent. The number of corporations in Cotton Goods, on the other hand, which constituted 11.70 per cent of the total number in All Industries in 1885, constitutes but 9.04 per cent in 1895. In Metals and Metallic Goods also, although as in Cotton Goods the number of corporations has increased, still the number in 1885 constituted 10.43 per cent of the total number in All Industries, but only 9.22 per cent in 1895. These three industries are those which show the greatest changes in percentages of the total number.

The following table shows in detail and in the aggregate the amounts of capital stock at the time of incorporation and on December 31, 1895, in the corporations existing in 1895 in the nine leading industries, in the other industries, and in All Industries, with the increase noted, both in amounts and percentages :

INDUSTRIES.	AMOUNT OF CAPITAL STOCK—		INCREASE (+), ON DEC. 31, 1895, AS COMPARED WITH DATE OF INCORPORATION	
	At Time of Incorporation	On Dec. 31, 1895	Amounts	Percentages
Boots and shoes,	\$6,085,200	\$7,025,810	+\$940,610	+15.46
Carpetings,	1,684,400	4,163,600	+2,479,200	+147.19
Cotton goods,	44,421,900	79,954,600	+35,532,700	+79.99
Leather,	2,165,000	2,734,000	+569,000	+26.28
Machines and machinery,	34,648,240	39,254,244	+4,606,004	+13.29
Metals and metallic goods,	15,982,650	23,440,835	+7,458,185	+46.66
Paper and paper goods,	10,700,000	18,582,900	+7,882,900	+73.67
Woollen goods,	6,159,500	10,240,500	+4,081,000	+66.26
Worsted goods,	2,804,600	6,530,600	+3,726,000	+132.85
Nine industries,	124,651,490	191,927,089	+67,275,599	+53.97
Other industries,	65,342,570	110,953,235	+45,610,665	+69.80
All industries,	189,994,060	302,880,324	+112,886,264	+59.42

In the corporations in the boot and shoe industry the amount of capital stock on December 31, 1895, was \$7,025,810, an increase of 15.46 per cent over the amount at the time of incorporation ; in Carpetings, \$4,163,600, an increase of 147.19 per cent ; in Cotton Goods, \$79,954,600, an increase of 79.99 per cent ; in Leather, \$2,734,000, an increase of 26.28 per cent ; in Machines and Machinery, \$39,254,244, an increase of 13.29 per cent ; in Metals and Metallic Goods, \$23,440,835, an increase of 46.66 per cent ; in Paper and Paper Goods, \$18,582,900, an increase of 73.67 per cent ; in Woollen Goods, \$10,240,500, an increase of 66.26 per cent ; and in Worsted Goods, \$6,530,600, an increase of 132.85 per cent. The total amount of capital stock in these nine leading industries on December 31, 1895, was \$191,927,089, as against \$124,651,490, the amount at time of incorporation, an increase of 53.97 per cent. In the corporations comprising the other industries the capital stock on December 31, 1895, was \$110,953,235, rising from \$65,342,570, the amount at time of incorporation, a gain of 69.80 per cent. It will be seen that the greatest percentages of increase obtain in Carpetings, Cotton Goods, Paper and Paper Goods, Woollen Goods, and Worsted Goods ; that is to say, in Paper and Paper Goods and the textile industries. In each case the percentage of increase in these industries is greater than in any of the other leading industries in the group of nine, and also considerably greater than in the corporations in All Industries taken together.

We next insert an analysis table showing the amount of capital stock at the time of incorporation of the corporations existing in 1895 and 1885 in the nine leading industries, the other industries, and All Industries.

INDUSTRIES.	AMOUNT OF CAPITAL STOCK AT TIME OF INCORPORATION		PERCENTAGES	
	1885	1895	1885	1895
Boots and shoes,	\$1,765,000	\$6,085,200	1.44	3.20
Carpetings,	978,400	1,684,400	0.80	0.89
Cotton goods,	34,823,350	44,421,900	28.32	23.38
Leather,	164,000	*2,878,000	0.13	1.51
Machines and machinery,	11,705,500	34,648,240	9.52	18.24
Metals and metallic goods,	10,514,500	15,982,650	8.55	8.41
Paper and paper goods,	6,030,000	10,700,000	4.90	5.63
Woollen goods,	4,374,075	6,159,500	3.56	3.24
Worsted goods,	1,334,000	2,804,600	1.09	1.48
Nine industries,	71,688,825	125,364,490	58.31	65.98
Other industries,	51,256,383	64,629,570	41.69	34.02
All industries,	122,945,208	189,994,060	100.00	100.00

* Includes Saddlery and Harness.

In the nine leading industries, in the aggregate, the amount of capital stock at the time of incorporation in corporations existing in 1895 was \$125,364,490, or 65.98 per cent of the capital stock at time of incorporation of the corporations existing in All Industries. The corresponding figure for 1885 was \$71,688,825, or 58.31 per cent of the capital stock at time of incorporation of corporations then existing in All Industries. Of the capital stock at time of incorporation of all the corporations existing in 1895 in All Industries, the largest percentage, namely, 23.38, is found in the cotton goods industry. The same condition existed in 1885, the percentage in that year being 28.32. Machines and Machinery ranks next. In the corporations existing in this industry in 1895, is found 18.24 per cent of the amount of capital stock at time of incorporation of the corporations existing in All Industries, the corresponding percentage in 1885 being 9.52. That is, of corporate capital put into industrial enterprises at their inception, within the corporations existing in 1895 much the largest amounts are found in the cotton goods industry and in the industry known as Machines and Machinery. The next largest amount is found in Metals and Metallic Goods, and next to this ranks the paper and paper goods industry. The other industries rank in the following order: Woollen Goods, Boots and Shoes, Worsted Goods, Leather, and Carpetings.

Partners and Stockholders.

The information upon this subject, by industries, is contained on pages 461-466. The presentation shows the number of partners and stockholders concerned in the management of the entire number of establishments engaged in manufacturing and mechanical industry in the State, each industry being presented in detail. As in the presentation relating to the same subject by towns, the partners are classified as general partners (males and females), special partners (males and females), estates, and trustees. The stockholders are designated as males, females, banks, trustees, etc., estates, other firms and corporations, and charitable and educational institutions. We may repeat the statement contained in the note at the head of the presentation, as follows: "There are duplications in the columns devoted to 'Partners,' 'Stockholders,' and 'Aggregates.' * * * * They are caused by the fact that the same firm or corporation is often engaged in manufacturing in two or more establishments located in the same town; sometimes in the same industry in different towns; and sometimes in more than one industry in the same town or in different towns. The plan adopted has been to consider each establishment as one (whether managed in connection with another or not), and to credit the whole number of partners and stockholders to each industry, but, in making up the total for All Industries, to omit the duplications. Stockholders of certain establishments

which are operated by railroad companies, or by syndicates or associations, many of which have extensive investments of capital outside this Commonwealth, are not included in this presentation; since to include all the stockholders of a railroad company, or of a syndicate or similar association, in connection with such merely branch establishments, incidental only to the main business of the corporation, would result in abnormally increasing the aggregate." Besides the duplications to which we have referred, we remind the reader, as stated in the analysis of the same subject by towns, that stockholders, and to a certain extent partners, are sometimes represented in more than one corporation or firm. This duplicate presentation, however, it is impossible to trace, and so far as relates to the comparative figures between 1885 and 1895, presented in the following analysis tables, may be presumed to have had the same effect in each Census.

The analysis table now introduced relates to the number of partners in the nine leading industries, in the other industries, and in All Industries, in 1885 and 1895.

INDUSTRIES AND CLASSIFICATION.	NUMBER OF PARTNERS		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885

The number of partners in each of the nine leading industries shows a decrease in 1895 as compared with 1885, except in Worsted Goods, where an increase of 50 per cent is shown, the number of partners in this industry, however, being quite small. In the nine leading industries, in the aggregate, in 1885, the number of partners was 8,478, declining to 7,114 in 1895, a decrease of 16.09 per cent; this decrease, of course, being mainly caused by the change from the private firm to the corporate form of doing business previously brought out in the analysis by towns, page 199. In other industries outside this selected group, the number of partners has increased from 19,816 to 23,256, a gain of 17.36 per cent.

The next table, similar in form, relates to stockholders.

INDUSTRIES AND CLASSIFICATION.	NUMBER OF STOCKHOLDERS		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Number	Percentages

ALL INDUSTRIES.	42,731	57,191	+14,460	+33.84
Males,	30,733	34,231	+3,498	+11.38
Females,	11,572	17,369	+5,797	+50.10
Banks, trustees, etc.,	426	5,591	+5,165	+1,212.44

In each of the nine leading industries the number of stockholders has increased as might have been expected from the returns relating to the increase of corporations in these establishments. In the nine leading industries, in the aggregate, the number of stockholders has risen from 22,773 in 1885 to 37,180 in 1895, a gain of 63.26 per cent. In industries outside these nine selected industries, the number of stockholders has increased from 19,958 to 20,011, a gain of 0.27 per cent. A comparison of the figures relative to partners in the preceding table and of those relating to stockholders, shows that in the nine leading industries while there has been a decline in the number of partners of 16.09 per cent, there has at the same time been a gain in All Industries, including, of course, the nine selected industries of 7.34 per cent. On the other hand, while there has been a gain of 63.26 per cent in the number of stockholders in the nine leading industries, the percentage of gain in All Industries, the nine leading industries being included, was but 33.84.

The tendency to increase the number of stockholders after formation over the number in the different corporations when first formed is shown in the following table :

INDUSTRIES.	NUMBER OF STOCKHOLDERS—		INCREASE ON DEC. 31, 1895, AS COMPARED WITH DATE OF INCORPORATION	
	At Time of Incorporation	On Dec. 31, 1895	Number	Percentages
Boots and shoes,	807	1,023	216	26.77
Carpetings,	57	1,067	1,010	1,771.93
Cotton goods,	8,390	22,113	13,723	163.56
Leather,	109	278	169	155.05
Machines and machinery,	1,841	5,238	3,397	184.52
Metals and metallic goods,	1,260	3,920	2,660	211.11
Paper and paper goods,	1,002	1,663	661	65.97
Woollen goods,	397	1,268	871	219.40
Worsted goods,	260	497	237	91.15
Nine industries,	14,123	37,067	22,944	162.46
Other industries,	10,385	20,124	9,739	93.78
All industries,	24,508	57,191	32,683	133.36

This presentation is identical in form with those previously presented, showing the nine leading industries in detail. In each industry there has been a marked increase in the number of stockholders as shown by the number in the different corporations on December 31, 1895, in comparison with the number at time of incorporation. In the nine leading industries, in the aggregate, the number at the time of incorporation was 14,123, and the number on December 31, 1895, in the same corporations was 37,067, an increase of 162.46 per cent. In the other industries, except the nine specified in detail, the number of stockholders at the time of incorporation was 10,385, rising to 20,124, the number on December 31, 1895. These figures, as pointed out in connection with the analysis of this subject by towns, pages 197–199, indicate the tendency to develop ownership among a constantly increasing number of persons through the extension of the corporate form of management.

The aggregates of partners and stockholders, as shown in 1885 and 1895, with the increase or decrease noted, are presented in the following table for the nine leading industries, the other industries, and All Industries :

INDUSTRIES AND CLASSIFICATION.	NUMBER OF PARTNERS AND STOCKHOLDERS		INCREASE (+), OR DECREASE (–), IN 1895 AS COM- PARED WITH 1885	
	1885	1895	Number	Percentages
<i>Boots and Shoes.</i>	3,450	3,668	+218	+6.32

Females,	13,332	19,967	+6,635	+49.77
Banks, estates, etc.,	439	5,710	+5,271	+1,200.68

* Includes Saddlery and Harness.

The number of partners and stockholders returned in 1885 in the nine leading industries, in the aggregate, was 31,251, rising to 44,294 in 1895, a gain of 41.74 per cent. In the other industries, the number has risen from 39,774 to 43,267, a gain of 8.78 per cent. In the nine leading industries the number of male partners and stockholders has risen from 24,376 to 27,562, a gain of 13.07 per cent, and the number of females has risen from 6,667 to 12,602, a gain of 89.02 per cent. In the other industries, the number of males has risen from 32,878 to 34,322, a gain of 4.39 per cent, while the number of females has risen from 6,665 to 7,365, a gain of 10.50 per cent. The movement towards the representation of females in the different industrial establishments, which has been pointed out before (pages 197 and 198), is thus shown with reference to the nine leading industries and the other industries.

CAPITAL INVESTED: BY INDUSTRIES.

CAPITAL INVESTED: BY INDUSTRIES.

[In this presentation is shown the aggregate amount of capital invested in each industry in the State. That buildings and fixtures, machinery and motive power, and implements and tools. The amount of cash on hand with the value, on that date, of unused stock on hand and stock in process of manufacture. The value of Capital" shows the aggregate amount of borrowed capital. This amount forms a part, of course, of the "Total It is presented separately in order that the amount of borrowed capital may be shown; that is, the amount of

INDUSTRIES.	PLANT

GOODS MADE: BY INDUSTRIES.

GOODS MADE: BY INDUSTRIES.

[In this presentation, the figures given under "Value of Goods Made or Work Done" represent the value of the output in all establishments making return of product in the manufacturing and mechanical industries of the Commonwealth during the Census year, 1895. Special effort has been made to separate the output into mill or factory product (goods made) and workshop product (work done). In order to avoid disclosing facts concerning individual establishments, the description and value of goods made in certain industries has been intentionally included in the line "Other goods made."]

INDUSTRIES AND CLASSIFICATION OF GOODS MADE AND WORK DONE.	Value of Goods Made or Work Done	INDUSTRIES AND CLASSIFICATION OF GOODS MADE AND WORK DONE.	Value of Goods Made or Work Done

TABULAR ANALYSES

FOR THE FOLLOWING PRESENTATIONS:

	Pages
CAPITAL INVESTED: BY INDUSTRIES,	479-484
STOCK USED: BY INDUSTRIES,	485-488
GOODS MADE: BY INDUSTRIES,	489-496

Capital Invested.

The statistics relating to capital invested, by industries, are contained upon pages 479-484. The reader should carefully note the general remarks as to capital contained in the analysis of this subject, by towns, pages 221-223, as the nature of the returns, fully explained therein, must be borne in mind with reference to the statistics of capital, by industries.

The following table brings forward for the nine leading industries in detail and in the aggregate, as well as for the other industries and All Industries, the amount of capital invested, classified so as to show, respectively, the amounts invested in land, buildings and fixtures, machinery and motive power, implements and tools, cash on hand and in bank, stock on hand (raw and in process), and, separately, the amount of credit capital, this last amount being also included in the total capital:

INDUSTRIES AND CLASSIFICATION OF CAPITAL INVESTED.	Amounts	Percentages
<i>Boots and Shoes.</i>	\$31,196,027	100.00
Land,	868,654	2.78
Buildings and fixtures,	3,231,235	10.36
Machinery and motive power,	5,614,256	18.00
Implements and tools,	1,383,097	4.43
Cash on hand and in bank,	4,255,400	13.64
Stock on hand (raw and in process),	15,843,385	50.79
Credit capital (included in total capital),	5,608,697	17.98
<i>Carpetings.</i>	\$6,142,395	100.00
Land,	502,250	8.18
Buildings and fixtures,	1,303,963	21.23
Machinery and motive power,	1,942,452	31.62
Implements and tools,	181,140	2.95
Cash on hand and in bank,	325,295	5.30
Stock on hand (raw and in process),	1,887,295	30.72

Credit capital (included in total capital),	76,754,319	14.87

Of the nine leading industries, the largest amount of capital is found in Cotton Goods, namely, \$117,963,203. Of this amount, 6.28 per cent represents the investment in land; 24.82 per cent, buildings and fixtures; 45.04 per cent, machinery and motive power; 1.29 per cent, implements and tools; 2.70 per cent, cash on hand and in bank; and 19.87 per cent, stock on hand (raw and in process). The total amount of credit capital in the industry is \$24,728,021, or 20.96 per cent of the total capital invested. The industry which ranks next to Cotton Goods with respect to amount of capital invested is Machines and Machinery, the total amount being \$31,947,230, of which 7.53 per cent represents the investment in land; 18.53 per cent, buildings and fixtures; 22.24 per cent, machinery and motive power; 18.40 per cent, implements and tools; 9.37 per cent, cash on hand and in bank; and 23.93 per cent, stock on hand (raw and in process). The difference in the total amount of capital invested in Machines and Machinery and Boots and Shoes is very slight, however, the capital in the last named industry aggregating \$31,196,027, of which 2.78 per cent represents the investment in land; 10.36 per cent,

buildings and fixtures; 18 per cent, machinery and motive power; 4.43 per cent, implements and tools; 13.64 per cent, cash on hand and in bank; and 50.79 per cent, stock on hand (raw and in process). The total amount of credit capital in Machines and Machinery is \$3,805,180, or 11.91 per cent of the total capital invested; while in Boots and Shoes the credit capital aggregates \$5,608,697, or 17.98 per cent of the total capital invested.

Of the other nine leading industries included in the table, the following have capital invested as annexed: Carpetings, \$6,142,395; Leather, \$9,786,607; Metals and Metallic Goods, \$28,522,339; Paper and Paper Goods, \$27,336,211; Woollen Goods, \$24,928,120; and Worsted Goods, \$15,800,966. The aggregate capital invested in the nine leading industries as a whole is \$293,623,098, as against \$222,459,459 in the other industries, and \$516,082,557 in All Industries. In the nine industries, investments in land represented 6.61 per cent of the total capital; buildings and fixtures, 21.18 per cent; machinery and motive power, 33.16 per cent; implements and tools, 4.28 per cent; cash on hand and in bank, 6.04 per cent; and stock on hand (raw and in process), 28.73 per cent. In the other industries, that is, all those in the State except the nine specifically mentioned, investments in land represented 9.63 per cent of the aggregate capital invested therein; buildings and fixtures, 20.26 per cent; machinery and motive power, 22.99 per cent; implements and tools, 7.94 per cent; cash on hand and in bank, 10.07 per cent; and stock on hand (raw and in process), 29.11 per cent. The subdivision of capital invested for All Industries has been previously analyzed, page 223, and need not be again referred to here; but, being included in the table, can be compared with the percentages we have just cited. The credit capital in the nine leading industries, in the aggregate, amounts to \$52,853,253, or 18 per cent of the total capital invested, while in the other industries, that is, all industries except these nine, the credit capital aggregates \$23,901,066, or 10.74 per cent of the total capital invested.

In order to enable the percentages representing the different items of capital in the nine leading industries and the other industries to be readily compared, we insert a table in which these percentages are brought together.

CLASSIFICATION OF CAPITAL INVESTED.	Nine Leading Industries	Other Industries
<i>Total Capital Invested.</i>	56.89	43.11
Land,	47.56	52.44
Buildings and fixtures,	57.98	42.02
Machinery and motive power,	65.56	34.44
Implements and tools,	41.55	58.45
Cash on hand and in bank,	44.19	55.81
Stock on hand (raw and in process),	56.58	43.42
Credit capital (included in total capital),	68.86	31.14

Of the total capital invested 56.89 per cent is found in the nine leading industries and 43.11 per cent in the other industries. The percentages of investment are higher in the nine selected industries in the following items: Buildings and fixtures, machinery and motive power, stock on hand, and in credit capital.

Stock Used.

The presentation, pages 485-488, contains the data relating to stock used, by industries. As in the case of capital invested, the reader is referred to the general statement relating to stock used contained in the analysis of the subject, by towns, pages 225-228.

The following table brings forward the value of stock used in 1895, for the nine leading industries, the other industries, and All Industries, with parallel figures for 1885,

the increase or decrease being noted in amounts and percentages. In this table, the value of stock used for Saddlery and Harness, as shown in the main presentation, is combined with the figures for Leather, in order to agree with the classification employed in the leather industry in 1885.

INDUSTRIES.	VALUE OF STOCK USED		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Amounts	Percentages
Boots and shoes,	\$70,178,677	\$75,262,178	+\$5,083,501	+7.24
Carpetings,	4,075,069	4,490,399	+415,330	+10.19
Cotton goods,	36,625,530	48,432,498	+11,806,968	+32.24
Leather,	19,713,559	*19,057,541	-656,018	-3.33
Machines and machinery,	7,539,470	12,896,878	+5,357,408	+71.06
Metals and metallic goods,	19,240,584	17,213,647	-2,026,937	-10.53
Paper and paper goods,	13,377,220	17,108,505	+3,731,285	+27.89
Woollen goods,	19,422,953	17,132,502	-2,290,451	-11.79
Worsted goods,	6,708,076	13,407,877	+6,699,801	+99.88
Nine industries,	196,881,138	225,002,025	+28,120,887	+14.28
Other industries,	192,876,320	236,252,328	+43,376,008	+22.49
All industries,	389,757,458	461,254,353	+71,496,895	+18.34

* Includes Saddlery and Harness.

The nine leading industries included in this table consumed 50.51 per cent of the entire amount of stock used in 1885, and 48.78 per cent in 1895. All of the industries show an increase in the amount of stock consumed in 1895 as compared with 1885 except Leather, which shows a decline of 3.33 per cent; Metals and Metallic Goods, which shows a decline of 10.53 per cent; and Woollen Goods, which shows a decline of 11.79 per cent. With respect to the nine industries in the aggregate, however, an increase is shown in the total value of stock used from \$196,881,138, as returned in 1885, to \$225,002,025 in 1895, a gain of 14.28 per cent. The other industries show an increase from \$192,876,320 to \$236,252,328, a gain of 22.49 per cent; and during the same time the gain in All Industries was 18.34 per cent. The four industries showing the largest percentages of increase in the value of stock used are the following, the percentages in each case being annexed: Cotton Goods, 32.24; Machines and Machinery, 71.06; Paper and Paper Goods, 27.89; and Worsted Goods, 99.88. The other two industries which show percentages of gain are: Boots and Shoes, 7.24, and Carpetings, 10.19. It will be borne in mind that, as stated in the note preceding the presentation, the value of stock used represents the cost value of all kinds of materials used, whether entering into the construction of the articles manufactured, or consumed in the processes necessary to the production of the goods.

Goods Made.

The subject of goods made and work done, by industries, is covered by the presentation, pages 489-496. In this presentation, the figures given under value of goods made and work done represent the value of the output in the establishments in the different industries during the Census year. Special effort has been made to separate the value of strictly mill or factory product (goods made) from what may be termed workshop product (work done).

The aggregate figures representing output in the nine leading industries, in the other industries, and in All Industries, are brought forward in the table which follows, in comparison with similar figures for the year 1885, with the increase or decrease noted in amounts and percentages:

INDUSTRIES.	VALUE OF GOODS MADE AND WORK DONE		INCREASE (+), OR DECREASE (—), IN 1895 AS COM- PARED WITH 1885	
	1885	1895	Amounts	Percentages
Boots and shoes,	\$114,729,533	\$122,135,081	+\$7,405,548	+6.45
Carpetings,	6,536,341	7,447,115	+910,774	+13.93
Cotton goods,	61,425,097	93,615,560	+32,190,463	+52.41
Leather,	28,008,851	*27,863,217	—145,634	—0.52
Machines and machinery,	20,365,970	33,492,848	+13,126,878	+64.45
Metals and metallic goods,	41,332,005	40,297,899	—1,034,106	—2.50
Paper and paper goods,	21,223,626	27,955,024	+6,731,398	+31.72
Woollen goods,	31,748,278	29,370,963	—2,377,315	—7.49
Worsted goods,	11,198,148	20,975,996	+9,777,848	+87.32
Nine industries,	336,567,849	403,153,703	+66,585,854	+19.78
Other industries,	338,066,420	446,653,599	+108,587,179	+32.12
All industries,	674,634,269	849,807,302	+175,173,033	+25.97

* Includes Saddlery and Harness.

The following industries show percentages of decline: Leather, 0.52; Metals and Metallic Goods, 2.50; and Woollen Goods, 7.49. All others show percentages of increase in accordance with the figures annexed: Boots and Shoes, 6.45; Carpetings, 13.93; Cotton Goods, 52.41; Machines and Machinery, 64.45; Paper and Paper Goods, 31.72; and Worsted Goods, 87.32. In the nine industries, in the aggregate, the value of goods made and work done in 1885 was \$336,567,849, and in 1895 \$403,153,703, a gain of 19.78 per cent. In the other industries, the figure in 1885 was \$338,066,420, rising to \$446,653,599 in 1895, a gain of 32.12 per cent. The gain in All Industries during the period was 25.97 per cent. The nine leading industries shown in the table turned out 49.89 per cent of the entire output in 1885 and 47.44 per cent in 1895.

The following analysis table brings forward the figures as to output in all the industries in detail, classified under the heads of "goods made" and "work done," covering the strictly factory output and what we have termed the workshop product as distinct from factory product:

INDUSTRIES.	VALUE OF —		PERCENTAGES OF —	
	Goods Made	Work Done	Goods Made	Work Done
Agricultural implements,	\$1,051,113	—	100.00	—
Arms and ammunition,	1,799,651	\$5,292	99.71	0.29

ALL INDUSTRIES,	\$726,305,563	\$123,501,739	85.47	14.53

Under the classification made in the preceding table the value of goods made in All Industries is \$726,305,563, and the value of work done \$123,501,739. These sums represent, respectively, 85.47 per cent and 14.53 per cent of the entire output. In the nine leading industries the figures for each class of output are as follows: Boots and Shoes—goods made \$120,524,593, work done \$1,610,488; the percentages of total output for the industry being, respectively, 98.68 and 1.32. Carpetings—the entire output is classified under the head of goods made, namely, \$7,447,115, there being in this industry nothing except strictly factory product. To Cotton Goods practically the same remark applies, although out of the total product a fractional percentage (0.16), representing in value \$146,002, is classified as work done, as against a factory product (goods made) of \$93,469,558, or 99.84 per cent of the total output in the industry. Leather (not including in this case Saddlery and Harness)—goods made \$24,653,441, work done \$1,040,966; representing, respectively, 95.95 per cent and 4.05 per cent of the total output in the industry. Machines and Machinery—goods made \$31,858,110, work done \$1,634,738; the percentages of total output being, respectively, 95.12 and 4.88. Metals and Metallic Goods—goods made \$35,950,893, work done \$4,347,006; the percentages of total output being, respectively, 89.21 and 10.79. In Paper and Paper Goods the entire product, namely, \$27,955,024, is classed as goods made, and the same remark applies to Worsted Goods, in which the total product is \$20,975,996. In Woollen Goods a product value of \$998,594, or 3.40 per cent of the total output in the industry, is classed under the head of work done, leaving the value of goods made or strictly factory product as \$28,372,369, or 96.60 per cent of the total output. Reference to the main presentation will show under each of the industry heads the kind of product classed as goods made and work done. For example, under Boots and Shoes, the goods made includes boots and shoes; soles, heels, and cut stock; and boot and shoe findings; each item being separately presented. Work done includes custom work and repairing, stitching, heeling, etc.

The Industry Product.

It will be understood that the value of goods made and work done, as given in the general presentations of the Census and referred to in this analysis, is the selling value (manufacturers' selling price) of the entire output in goods and work.

This value involves duplications to the extent that the product of one industry within the State is consumed as stock in another industry also within the State. If, to take a familiar instance, \$25,000 worth of leather appears as part of the value of

goods made in the leather industry, and this product was consumed as stock in the boot and shoe industry in the State, it would swell the value of the boot and shoe product of the State by substantially that amount. In other words, of the value of boots and shoes (goods made) in the industry Boots and Shoes, substantially \$25,000 would have also appeared as the value of goods made (leather) in the leather industry. Duplications of this kind cannot be avoided in taking the product, nor from one point of view, should they be considered.

Every time the goods are "turned over," to use a technical phrase, they become a factor in industrial operations, wages and profits accrue from the process, and the values involved represent in their entirety the magnitude of the manufacturing operations of the State. Nevertheless it should not be assumed that the aggregate value of goods made and work done represents the value actually created or brought into being through these operations during the Census year.

In order to show the actual result of the productive forces we insert a table showing what may be termed the "Industry Product" in the different industries, as distinguished from the normal value of goods made and work done. By "Industry Product" is meant the value remaining after deducting the value of stock and materials consumed.

INDUSTRIES.	Value of Goods Made and Work Done	Value of Stock Used	Industry Product
Agricultural implements,	\$1,051,113	\$494,266	\$556,847
Arms and ammunition,	1,804,943	502,345	1,302,598

Straw and palm leaf goods,	5,626,638	3,310,836	2,315,802
Tallow, candles, soap, and grease,	4,267,577	2,877,909	1,389,668
Tobacco, snuff, and cigars,	4,563,069	2,104,769	2,458,300
Toys and games (children's),	806,950	338,214	468,736
Trunks and valises,	217,088	101,051	116,037
Whips, lashes, and stocks,	1,296,310	471,481	824,829
Wooden goods,	9,346,531	4,530,141	4,816,390
Woollen goods,	29,370,963	17,132,502	12,238,461
Worsted goods,	20,975,996	13,407,877	7,568,119
ALL INDUSTRIES,	\$849,807,302	\$461,254,353	\$388,552,949

The value of industry product presented in the above table is obtained by deducting from the total value of goods made and work done in each of the specified industries,

the value of stock used and materials consumed, the difference, or remainder, being the added value or actual product due to the industry.

So far as relates to All Industries, in the aggregate, this industry product for the Census year is \$388,552,949 as against \$849,807,302 the nominal value of goods made and work done. Out of this industry product a certain portion is paid to labor in the form of wages (aggregate, for All Industries, \$192,970,059). Out of the new remainder are paid freights, insurance, interest on loans (credit capital), rents, commissions, salaries, etc.; in fact all other expenses except those for stock and wages. The final remainder, if any, is the profit of the individual, firm, or corporation conducting the manufacturing establishment.

PERSONS EMPLOYED: BY INDUSTRIES.

PERSONS EMPLOYED: BY INDUSTRIES.

[In this presentation are shown the average number of persons employed, the smallest number of persons employed, the greatest number of persons employed, and the excess of greatest over smallest number. By the term "Period of employment of smallest number" and "Period of employment of greatest number" is meant the time, reported by each establishment, when the smallest or greatest number, respectively, was employed. It should be borne in mind that the number of persons here enumerated are wage earners only; officers, clerks, bookkeepers, salesmen, or other salaried persons are not included.]

HOURLY, DAILY, AND PIECE HANDS:
BY INDUSTRIES.

HOUR, DAY, AND PIECE HANDS : BY INDUSTRIES.

[This presentation shows the number of hour, day, and piece hands, classified by sex, for that week of the Census year during which the greatest number of persons was employed. The aggregates do not, in every instance, agree with the aggregate greatest number of persons employed, as shown in the preceding presentation (pages 509-512). This is due to the fact that the persons here enumerated were returned for a certain specified *week* (the week of employment of greatest number), while in the preceding presentation the returns were for the *month* when the greatest number of persons was employed, on an average. It should be borne in mind that the number of persons here enumerated are wage earners only; officers, clerks, bookkeepers, salesmen, or other salaried persons are not included.]

PERSONS EMPLOYED—BY MONTHS:
BY INDUSTRIES.

PERSONS EMPLOYED—BY MONTHS: BY INDUSTRIES.

[In this presentation is shown, for each industry and for All Industries, the aggregate number of persons employed, by sex, during each month of the Census year, 1895, with a recapitulation showing the average number of males and females employed. This average number has been obtained by totalizing the number of persons of each sex employed month by month and dividing the sum by 12. It should be borne in mind that the number of persons here enumerated are wage earners only; officers, clerks, bookkeepers, salesmen, or other salaried persons are not included.]

ALL INDUSTRIES,	300,645	129,665	*430,310

* This average, 430,310, does not agree with that shown in the final line of the table on page 511, viz., 432,272, the latter having been computed on a different basis, that of the establishment, while the above was obtained on the basis of months, as explained in the head-note on page 521.

SAME NUMBER OF PERSONS EMPLOYED:
BY INDUSTRIES.

SAME NUMBER OF PERSONS EMPLOYED: BY INDUSTRIES.

[This presentation shows the number of establishments reporting the same number of persons employed during the entire year and the number of such persons classified as to sex. The total number of establishments in each of the manufacturing and mechanical industries is also shown with the average number of persons employed during the year. The proper method of reading this table is as follows: In the industry designated "Boots and Shoes" there are 2,074 establishments employing, on an average, 59,829 persons; 309 of these establishments reported continuous employment during the entire year for 5,292 persons: 3,763 males and 1,529 females. Other lines may be read in a similar manner. Absence of figures in the last four columns indicates that no persons were continuously employed during the year. It should be borne in mind that the number of persons here enumerated are wage earners only; officers, clerks, bookkeepers, salesmen, or other salaried persons are not included.]

TABULAR ANALYSES

FOR THE FOLLOWING PRESENTATIONS:

	Pages
PERSONS EMPLOYED: BY INDUSTRIES,	509-512
HOUR, DAY, AND PIECE HANDS: BY INDUSTRIES,	513-518
PERSONS EMPLOYED—BY MONTHS: BY INDUSTRIES,	519-530
SAME NUMBER OF PERSONS EMPLOYED: BY INDUSTRIES,	531-533

Persons Employed.

The returns as to persons employed, by industries, are given upon pages 509-512. In this presentation, as in that relating to the same subject, by towns, are shown the average number of persons employed, the smallest number of persons employed, the greatest number of persons employed, and the excess of greatest over smallest number. By the terms "Period of employment of smallest number" and "Period of employment of greatest number," as used in the presentation, are meant the times reported by each establishment when the smallest or greatest number, respectively, was employed. The statistics relate to wage earners only; officers, clerks, bookkeepers, salesmen, or other salaried persons not being included.

The facts as to the nine leading industries, the other industries, and All Industries, are summarized in the following analysis table:

INDUSTRIES.	Average Number	Smallest Number	Greatest Number	Excess of Greatest over Smallest Number
Boots and shoes,	59,829	45,614	73,433	27,819
Carpetings,	4,682	4,370	4,910	540
Cotton goods,	83,113	76,911	87,055	10,144
Leather,	8,181	6,452	9,845	3,393
Machines and machinery,	21,598	17,329	25,712	8,383
Metals and metallic goods,	22,723	19,638	26,042	6,404
Paper and paper goods,	12,616	11,224	13,621	2,397
Woollen goods,	19,365	16,332	21,451	5,119
Worsted goods,	12,504	11,062	13,569	2,507
Nine industries,	244,611	208,932	275,638	66,706
Other industries,	187,661	148,317	243,106	94,789
All industries,	432,272	357,249	518,744	161,495

From the preceding table it will be seen that the largest number of persons is employed in the cotton goods industry, the average number being 83,113. The number employed at the periods of employment of the smallest number, 76,911, rose to 87,055, the number employed at the periods of employment of the greatest number, the excess of greatest over smallest number being 10,144. In Boots and Shoes, the average num-

ber employed was 59,829, the number at the periods of employment of the smallest number being 45,614, and the number at the periods of employment of the greatest number, 73,433, showing an excess of greatest over smallest number of 27,819. In the nine leading industries, in the aggregate, the average number of persons employed was 244,611, as against 187,661, the average number employed in the other industries, in the aggregate. The number employed at the periods of employment of the smallest number in the nine leading industries was 208,932, as against 148,317 in the other industries; and the number employed at the periods of employment of the greatest number in the nine leading industries, 275,638, as against 243,106 in the other industries. The excess of greatest over smallest number of persons employed in the nine leading industries, in the aggregate, was, therefore, 66,706, as against 94,789 in the other industries.

The following table shows the percentages which the number employed in the nine leading industries and in the other industries, form of the number in All Industries, the latter being considered 100 per cent:

INDUSTRIES.	Average Number	Smallest Number	Greatest Number	Excess of Greatest over Smallest Number
Boots and shoes,	13.84	12.77	14.16	17.23
Carpetings,	1.08	1.22	0.95	0.33
Cotton goods,	19.23	21.53	16.78	6.28
Leather,	1.89	1.80	1.90	2.10
Machines and machinery,	5.00	4.85	4.96	5.19
Metals and metallic goods,	5.26	5.50	5.02	3.97
Paper and paper goods,	2.92	3.14	2.63	1.48
Woollen goods,	4.48	4.57	4.13	3.17
Worsted goods,	2.89	3.10	2.61	1.55
Nine industries,	56.59	58.48	53.14	41.30
Other industries,	43.41	41.52	46.86	58.70
All industries,	100.00	100.00	100.00	100.00

The average number of persons employed in All Industries being considered 100 per cent, the percentage represented by the average number employed in the nine leading industries shown in the table forms, in the aggregate, 56.59 per cent, and in the other industries 43.41 per cent. The average number employed in Cotton Goods is 19.23 per cent of the number employed in All Industries and in Boots and Shoes, 13.84 per cent. The average numbers employed in the other industries of the selected group are indicated by the following percentages: Carpetings, 1.08; Leather, 1.89; Machines and Machinery, 5; Metals and Metallic Goods, 5.26; Paper and Paper Goods, 2.92; Woollen Goods, 4.48; and Worsted Goods, 2.89. These percentages may be compared with the percentages indicating the number employed at the periods of employment of smallest number and of greatest number, respectively. As to the nine leading industries, in the aggregate, the number employed at the periods of employment of the smallest number constitutes 58.48 per cent of the aggregate number employed in All Industries; and the number employed at the periods of employment of the smallest number in the other industries, in the aggregate, constitutes 41.52 per cent. The corresponding percentages at the periods of employment of the greatest number are, respectively, 53.14 and 46.86. If the excess of greatest over smallest number in All Industries be considered 100 per cent, the percentages for the nine leading industries and for the other industries, in the aggregate, are, respectively, 41.30 and 58.70. In the boot and shoe industry 17.23 per cent of the excess is found, and the percentages in the other selected industries are as follows: Carpetings, 0.33; Cotton Goods, 6.28; Leather, 2.10; Machines and Machinery, 5.19; Metals and Metallic Goods, 3.97; Paper and Paper Goods, 1.48; Woollen Goods, 3.17; and Worsted Goods, 1.55.

By reference to the analysis table on page 534 it will be seen that the excess of greatest over smallest number in All Industries is 161,495, indicating, as pointed out in the analysis of this subject, by towns, that at some time during the year this number of persons was out of employment for an indeterminate period; and the percentages we have just cited indicate that about one-sixth of this number were found in the boot and shoe industry, about one-sixteenth in the cotton goods industry, and a percentage nearly as large in Machines and Machinery.

The following table indicates the range of unemployment in the nine leading industries in detail and in the aggregate, in the other industries, and in All Industries, as represented by the percentage of persons unemployed at some time during the year, based upon the difference between the number unemployed at the periods of employment of smallest and greatest numbers:

INDUSTRIES.	PERCENTAGES		
	Persons Employed at Periods of Employment of <i>Smallest</i> Number of Persons Employed at Periods of Employment of <i>Greatest</i> Number	Range (Unemployed at Some time During the Year)	Persons Employed at Periods of Employment of <i>Greatest</i> Number
Boots and shoes,	62.12	37.88	100.00
Carpetings,	89.00	11.00	100.00
Cotton goods,	88.35	11.65	100.00
Leather,	65.54	34.46	100.00
Machines and machinery,	67.40	32.60	100.00
Metals and metallic goods,	75.41	24.59	100.00
Paper and paper goods,	82.40	17.60	100.00
Woollen goods,	76.14	23.86	100.00
Worsted goods,	81.52	18.48	100.00
Nine industries,	75.80	24.20	100.00
Other industries,	61.01	38.99	100.00
All industries,	68.87	31.13	100.00

In the nine leading industries, in the aggregate, the number of persons employed at periods of employment of the greatest number being considered 100 per cent, the number of persons employed at periods of employment of smallest number forms 75.80 per cent, and the number unemployed 24.20 per cent. The corresponding percentages in the other industries are 61.01 and 38.99, and in All Industries 68.87 and 31.13. The facts as to the range of unemployment for the nine leading industries in detail, as indicated by the percentages in the table, may be summarized as follows: If we consider that the number of persons employed at periods of employment of the greatest number indicates the maximum number employed in the industry (100 per cent), then the number unemployed at some time during the year, indicated by the difference between this maximum number and the number employed at periods of employment of the smallest number, for the different industries, is, for Boots and Shoes, about 38 in every 100 (37.88 per cent); for Carpetings, 11 in every 100 (11 per cent); for Cotton Goods, about 12 in every 100 (11.65 per cent); for Leather, about 34 in every 100 (34.46 per cent); for Machines and Machinery, about 33 in every 100 (32.60 per cent); for Metals and Metallic Goods, about 25 in every 100 (24.59 per cent); for Paper and Paper Goods, about 18 in every 100 (17.60 per cent); for Woollen Goods, about 24 in every 100 (23.86 per cent); and for Worsted Goods, about 18 in every 100 (18.48 per cent). It should be borne in mind that the length of the period of unemployment is not in any respect indicated by these figures, which simply show the fluctuation in employment without regard to its duration.

The whole subject of employment and unemployment will be treated in a special section of the Census, derived from a house-to-house canvass of the population, and the

duration of the periods of idleness will be there fully shown. The fluctuations of employment in the different industries are fully indicated by the foregoing percentages, and from them it would seem that employment is most regular in Carpetings, Cotton Goods, Paper and Paper Goods, and Worsted Goods, the industries ranking in this respect in order named, employment being most regular in Carpetings and Cotton Goods, which rank close together; while the greatest fluctuations of unemployment are found in the following industries: Boots and Shoes, Leather, Machines and Machinery, Metals and Metallic Goods, and Woollen Goods, the industries ranking in order named, the widest range of unemployment being found in Boots and Shoes.

Hour, Day, and Piece Hands.

The presentation, pages 513-518, shows the number of hour, day, and piece hands, by industries, classified by sex, for that week of the Census year during which the greatest number of persons was employed. As pointed out in the note at the head of the presentation, page 515, the aggregates do not in every instance agree with the aggregate greatest number of persons employed in the presentation which we have just analyzed. This is due to the fact that the persons enumerated in the presentation, pages 513-518, were returned for a specified week (the week of employment of the greatest number), while in the preceding presentation the returns were for the month when the greatest number of persons was employed, on an average, including wage earners only.

We summarize in the following analysis table the data as to the nine leading industries, the other industries, and All Industries:

INDUSTRIES AND CLASSIFICATION.	NUMBER OF PERSONS			PERCENTAGES		
	Males	Females	Both Sexes	Males	Females	Both Sexes
<i>Boots and Shoes.</i>	50,445	22,721	73,166	100.00	100.00	100.00

Hour hands,	110,773	27,839	138,612	30.03	18.59	26.73
Day hands,	173,763	27,254	201,017	47.11	18.20	38.76
Piece hands,	84,325	94,672	178,997	22.86	63.21	34.51

In the nine leading industries, in the aggregate, the number of persons employed during the week of employment of the greatest number was 274,807, comprising 183,259 males and 91,548 females. Of these, 87,062, including 66,299 males and 20,763 females, were paid by the hour; 66,585, including 58,080 males and 8,505 females, by the day; and 121,160, including 58,880 males and 62,280 females, by the piece. These figures, reduced to percentages, show that in these nine industries 31.68 per cent of the total number of persons employed during the week of employment of greatest number were hour hands; 24.23 per cent day hands, and 44.09 per cent piece hands. Among the males employed, 36.18 per cent were hour hands, 31.69 per cent day hands, and 32.13 per cent piece hands; while among the females, 22.68 were hour hands, only 9.29 per cent day hands, and 68.03 per cent piece hands. As to the other industries in the aggregate, the percentages being based upon the number employed during the week of employment of greatest number, 21.14 per cent were hour hands, 55.14 per cent day hands, and 23.72 per cent piece hands. When classified by sex, we find that of the males, 23.96 per cent were hour hands, 62.33 per cent day hands, and 13.71 per cent piece hands; while of the females, 12.15 per cent were hour hands, 32.21 day hands, and 55.64 piece hands. These percentages, as well as the numbers upon which they are based, may be compared with the numbers and percentages for All Industries, also contained in the table, but as the facts for All Industries were analyzed in connection with the consideration of the subject, by towns, we shall not repeat them here.

We summarize briefly the percentages showing the different classes of employes in the nine leading industries, as follows: Hour hands: Boots and Shoes, 16.19; Carpet-

ings, 46.15; Cotton Goods, 38.85; Leather, 9.51; Machines and Machinery, 46.79; Metals and Metallic Goods, 31.53; Paper and Paper Goods, 11.16; Woollen Goods, 35.87; and Worsted Goods, 66.16. Day hands: Boots and Shoes, 19.45; Carpetings, 9.71; Cotton Goods, 8.45; Leather, 72.54; Machines and Machinery, 44.81; Metals and Metallic Goods, 44.98; Paper and Paper Goods, 63.25; Woollen Goods, 24.93; and Worsted Goods, 3.45. Piece hands: Boots and Shoes, 64.36; Carpetings, 44.14; Cotton Goods, 52.70; Leather, 17.95; Machines and Machinery, 8.90; Metals and Metallic Goods, 23.49; Paper and Paper Goods, 25.59; Woollen Goods, 39.20; and Worsted Goods, 30.39. Disregarding the percentages relating to hour and day hands, and confining our attention to piece hands only, it will be seen that the largest percentages of employes paid by the piece are found in the following industries, ranking from highest to lowest in order named: Boots and Shoes (64.36), Cotton Goods (52.70), Carpetings (44.14), Woollen Goods (39.20), and Worsted Goods (30.39). On the other hand, the smallest percentages are found in the following industries, ranking from lowest to highest in order named: Machines and Machinery (8.90), Leather (17.95), Metals and Metallic Goods (23.49), and Paper and Paper Goods (25.59).

The following table presents comparative figures as to the number and percentages of day hands and piece hands, according to the Censuses of 1875, 1885, and 1895, the hour hands of 1895 being included with the day hands, as the classification in preceding censuses followed this plan, all employes who were not paid by the piece having been called day hands in making up the returns:

INDUSTRIES AND CLASSIFICATION.	NUMBER OF PERSONS			PERCENTAGES		
	1875	1885	1895	1875	1885	1895
<i>Boots and Shoes.</i>	38,516	64,858	73,166	100.00	100.00	100.00

Piece hands,	6,465	7,571	8,361	36.54	39.91	39.20

* Includes Saddlery and Harness.

INDUSTRIES AND CLASSIFICATION.	NUMBER OF PERSONS			PERCENTAGES		
	1875	1885	1895	1875	1885	1895
<i>Worsted Goods.</i>	1,481	7,963	13,555	100.00	100.00	100.00
Day hands,	1,063	5,498	9,436	71.78	69.04	69.61
Piece hands,	418	2,465	4,119	28.22	30.96	30.39
<i>Nine Industries.</i>	155,899	212,819	275,879	100.00	100.00	100.00
Day hands,	89,242	111,379	154,323	57.24	52.34	55.94
Piece hands,	66,657	101,440	121,556	42.76	47.66	44.06
<i>Other Industries.</i>	110,440	166,509	242,747	100.00	100.00	100.00
Day hands,	87,511	121,255	185,306	79.24	72.82	76.34
Piece hands,	22,929	45,254	57,441	20.76	27.18	23.66
ALL INDUSTRIES.	266,339	379,328	518,626	100.00	100.00	100.00
Day hands,	176,753	232,634	339,629	66.36	61.33	65.49
Piece hands,	89,586	146,694	178,997	33.64	38.67	34.51

Disregarding the numbers in the preceding table, and confining our attention to percentages only, we find that in the nine leading industries, in the aggregate, 44.06 per cent of the employes were piece hands in 1895, as against 42.76 per cent in 1875 and 47.66 per cent in 1885. In the other industries aggregated, 23.66 per cent were piece hands in 1895, as against 20.76 per cent in 1875 and 27.18 per cent in 1885. It appears, therefore, that as to the nine leading industries and the other industries, a larger percentage of the employes were paid by the piece in 1895 than in 1875, but a smaller percentage than in 1885. The same statement may be made as to Cotton Goods, Leather, Metals and Metallic Goods, Woollen Goods, and Worsted Goods, although in Woollen Goods and Worsted Goods the change in percentages in 1895, as compared with 1885 is only fractional, and the condition in these industries is to all intents and purposes unchanged. In Carpetings and Machines and Machinery, an increase in the percentage of persons paid by the piece is shown in 1895 as compared with 1885, and in 1885 as compared with 1875, that is, both the Censuses of 1885 and 1895 show an increase over the preceding census. In Boots and Shoes and Paper and Paper Goods, the percentage of employes paid by the piece in 1895 is smaller than in either 1875 or 1885, although in Paper and Paper Goods the change is so slight as to be of practically no importance.

The next analysis table shows the relative proportions of males and females employed in the nine leading industries, in the other industries, and in All Industries, classified under the heads of hour hands, day hands, and piece hands, with percentages:

INDUSTRIES AND CLASSIFICATION.	NUMBER OF PERSONS		PERCENTAGES	
	Males	Females	Males	Females
<i>Boots and Shoes.</i>	50,445	22,721	68.95	31.05
Hour hands,	9,299	2,546	78.51	21.49
Day hands,	11,349	2,879	79.77	20.23
Piece hands,	29,797	17,296	63.27	36.73
<i>Carpetings.</i>	2,326	2,575	47.46	52.54
Hour hands,	1,516	746	67.02	32.98
Day hands,	367	109	77.10	22.90
Piece hands,	443	1,720	20.48	79.52

INDUSTRIES AND CLASSIFICATION.	NUMBER OF PERSONS		PERCENTAGES	
	Males	Females	Males	Females
<i>Cotton Goods.</i>	43,705	43,247	50.26	49.74
Hour hands,	23,479	10,302	69.50	30.50
Day hands,	5,752	1,598	78.26	21.74
Piece hands,	14,474	31,347	31.59	68.41
<i>Leather.</i>	9,596	340	96.58	3.42
Hour hands,	911	34	96.40	3.60
Day hands,	7,113	95	98.68	1.32
Piece hands,	1,572	211	88.17	11.83
<i>Machines and Machinery.</i>	25,073	472	98.15	1.85
Hour hands,	11,841	110	99.08	0.92
Day hands,	11,125	195	98.28	1.72
Piece hands,	2,107	167	92.66	7.34
<i>Metals and Metallic Goods.</i>	23,787	2,038	92.11	7.89
Hour hands,	7,449	693	91.49	8.51
Day hands,	11,326	291	97.50	2.50
Piece hands,	5,012	1,054	82.62	17.38
<i>Paper and Paper Goods.</i>	7,501	6,097	55.16	44.84
Hour hands,	949	569	62.52	37.48
Day hands,	6,396	2,204	74.37	25.63
Piece hands,	156	3,324	4.48	95.52
<i>Woollen Goods.</i>	13,782	7,547	64.62	35.38
Hour hands,	5,793	1,857	75.73	24.27
Day hands,	4,394	924	82.63	17.37
Piece hands,	3,595	4,766	43.00	57.00
<i>Worsted Goods.</i>	7,044	6,511	51.97	48.03
Hour hands,	5,062	3,906	56.45	43.55
Day hands,	258	210	55.13	44.87
Piece hands,	1,724	2,395	41.85	58.15
<i>Nine Industries.</i>	183,259	91,548	66.69	33.31
Hour hands,	66,299	20,763	76.15	23.85
Day hands,	58,080	8,505	87.23	12.77
Piece hands,	58,880	62,280	48.60	51.40
<i>Other Industries.</i>	185,602	58,217	76.12	23.88
Hour hands,	44,474	7,076	86.27	13.73
Day hands,	115,683	18,749	86.05	13.95
Piece hands,	25,445	32,392	43.99	56.01
ALL INDUSTRIES.	368,861	149,765	71.12	28.88
Hour hands,	110,773	27,839	79.92	20.08
Day hands,	173,763	27,254	86.44	13.56
Piece hands,	84,325	94,672	47.11	52.89

As to the nine leading industries, in the aggregate, 66.69 per cent of the employes are males and 33.31 per cent females; the corresponding percentages in the other industries aggregated being 76.12 and 23.88. Of the hour hands in the nine leading industries, 76.15

per cent are males and 23.85 per cent females; the corresponding percentages in the other industries being 86.27 and 13.73. Of the day hands in the nine leading industries, 87.23 per cent are males and 12.77 per cent females, as against 86.05 per cent and 13.95 per cent, respectively, in the other industries. Of the piece hands in the nine industries, 48.60 per cent are males and 51.40 per cent females, as against 43.99 per cent and 56.01 per cent, respectively, in the other industries. In the piece hands alone, the following percentages represent the female employes in the nine leading industries in detail: Boots and Shoes, 36.73; Carpetings, 79.52; Cotton Goods, 68.41; Leather, 11.83; Machines and Machinery, 7.34; Metals and Metallic Goods, 17.38; Paper and Paper Goods, 95.52; Woollen Goods, 57; and Worsteds Goods, 58.15. These may be contrasted with the percentages representing the males among the piece hands, as follows: Boots and Shoes, 63.27; Carpetings, 20.48; Cotton Goods, 31.59; Leather, 88.17; Machines and Machinery, 92.66; Metals and Metallic Goods, 82.62; Paper and Paper Goods, 4.48; Woollen Goods, 43; and Worsteds Goods, 41.85. The following marked differences appear: Although 55.16 per cent of the total number of employes in Paper and Paper Goods are males, only 4.48 per cent of the piece hands in this industry are males; and while 50.26 per cent of the total number of employes in Cotton Goods are males, 31.59 per cent of the piece hands are males; and in Carpetings while 47.46 per cent of the total employes are males, only 20.48 per cent of the piece hands are males.

Persons Employed: By Months.

In the presentation, pages 519-530, is shown for each industry and for All Industries, the aggregate number of persons employed, by sex, during each month of the Census year, 1895, with a recapitulation showing the average number of males and females employed. This average number has been obtained by totalizing the number of persons of each sex employed month by month and dividing the sum by 12; only wage earners being included. This presentation may be considered in connection with the table, pages 509-512, showing the greatest and smallest number of persons employed, and the excess of greatest over smallest number, and enables us to trace approximately the variation in employment. Take, for example, the boot and shoe industry, presented on page 521. From the figures it will be seen that the aggregate number employed in the month of January was 59,129, and in February 59,675; in March the number rose to 61,686, and was maintained at practically the same level, the changes being very slight, either up or down, during the months of April, May, and June; in July the number dropped to 60,101; rose again in August to 61,354; dropped in September to 59,393, in October to 57,225; in November to 56,610; and in December to 56,359, the smallest number employed in any single month of the year.

In the following table we show the average number of persons employed per establishment in the nine leading industries, in the other industries, and in All Industries, with percentages showing employment and unemployment month by month:

INDUSTRIES AND MONTHS.	Average Number of Persons Employed per Establishment	PERCENTAGES OF —	
		Employment During Months Specified	Unemployment During Months Specified

In the above table 100 per cent is considered as representing the greatest number of persons employed in each industry. In Boots and Shoes this percentage occurs in the month of June, in which the aggregate was 61,751. In the nine leading industries taken together, the highest percentage was reached in the month of September. That is to say, the largest number of persons employed in any single month in Boots and Shoes is found in the month of June in the Census year, and so far as relates to the nine leading industries, in the aggregate, in the month of September. In Boots and Shoes, as will appear from the figures previously cited, page 542, the smallest number appearing on the rolls in any single month is found in the month of December, the percentage of employment in that month as compared with the month of June being 91.27. In the nine leading industries, in the aggregate, the smallest percentage of employment is found in the month of January, namely, 97.27. The percentages indicating unemployment are the complement of those indicating employment; that is, the percentage indicating unemployment in Boots and Shoes in the month of December is 8.73, and in the nine leading industries in the month of January, 2.73. To put the matter in other words, so that it may be plainly understood by the reader: In comparison with the maximum number of persons appearing on the rolls in the boot and shoe industry, namely, the number found in the month of June, about nine in every 100 (8.73 per cent) were unemployed in the month of December; and, similarly, in comparison with the maximum number of persons found upon the rolls in the nine leading industries, in the aggregate, namely, the number found in the month of September, about three in every 100 (2.73 per cent) were unemployed in the month of January.

The reader may find it interesting to make similar comparisons for some of the other leading industries which are given in detail in the preceding table, or may compute the percentages of employment and unemployment for any industry from the figures shown in the presentation on pages 519–530. These percentages based upon employment month by month plainly show that although many persons were out of employment at some time during the year, as indicated by the presentation, pages 519–530, nevertheless, employment month by month in the different industries was comparatively uniform during the year.

The following table shows the average number of persons male and female employed in 1875, 1885, and 1895 in the nine leading industries, in the other industries, and in All Industries, based upon the returns as to monthly employment. These averages are computed upon the basis of monthly employment, as previously explained, and do not exactly agree with those shown in the presentation, pages 509–512, which were computed on the basis of establishments.

INDUSTRIES AND SEX.	NUMBER OF PERSONS EMPLOYED			PERCENTAGES

Females,	94,655	115,504	129,665	30.64	30.45	30.13

* Includes Saddlery and Harness.

With respect to the nine leading industries, in the aggregate, the returns as to monthly employment show an average number of persons employed in 1895 of 245,151, comprising 161,505 males and 83,646 females, representing, respectively, 65.88 per cent and 34.12 per cent. The averages computed from the Censuses of 1875 and 1885 indicate a division by sexes, in the same industries, as follows: 1875—males, 63.58 per cent; females, 36.42

per cent. 1885 — males, 65.42 per cent; females, 34.58 per cent. In the other industries, in the aggregate, the percentages of males and females based upon the returns as to employment by months in 1895 are, respectively, 75.15 and 24.85. In 1875 and 1885 the percentages in these industries were as follows: 1875 — males, 76.64; females, 23.36. 1885 — males, 74.83; females, 25.17.

Same Number of Persons Employed.

The presentation, pages 531-533, shows the number of establishments, by industries, reporting the same number of persons employed during the entire year and the number of such persons classified as to sex. The table also shows the total number of establishments in each industry, and the average number of persons employed. The note at the head of the presentation explains that absence of figures in the last four columns of the presentation indicates that no persons were continuously employed during the year. As in the other presentations relating to persons employed, only wage earners are referred to.

We summarize the facts relating to the nine leading industries, the other industries, and All Industries.

INDUSTRIES.	ESTABLISHMENTS			PERSONS EMPLOYED		
	Total Number	Reporting same Number of Persons Employed During Entire Year	Per- centages of Total Number	Average Number	Same Number of Persons Employed During Entire Year	Per- centages of Average Number
Boots and shoes,	2,074	309	14.90	59,829	5,292	8.85
Carpetings,	14	2	14.29	4,682	103	2.20
Cotton goods,	188	37	19.68	83,113	16,330	19.65
Leather,	200	29	14.50	8,181	651	7.96
Machines and machinery,	660	150	22.73	21,598	1,167	5.40
Metals and metallic goods,	2,309	756	32.74	22,723	2,762	12.16
Paper and paper goods,	160	29	18.13	12,616	1,372	10.88
Woollen goods,	166	28	16.87	19,365	1,790	9.24
Worsted goods,	31	1	3.23	12,504	61	0.49
Nine industries,	5,802	1,341	23.11	244,611	29,528	12.07
Other industries,	20,463	4,148	20.27	187,661	23,513	12.53
All industries,	26,265	5,489	20.90	432,272	53,041	12.27

In the nine leading industries, in the aggregate, 5,802 establishments are included. Of these, 1,341 establishments reported the same number of persons employed throughout the entire year. The average number of persons employed in the 5,802 establishments is 244,611, and the total number of persons employed in establishments reporting the same number of persons throughout the entire year was 29,528, or 12.07 per cent of the average number employed in the establishments in the nine selected industries aggregated. The corresponding percentage in establishments in the other industries is 12.53. In the boot and shoe industry the aggregate number of persons employed in establishments reporting the same number of persons employed during the entire year is 5,292, or 8.85 per cent of the average number of persons employed in all the establishments in that industry. The percentages which the aggregate number of persons employed in establishments reporting the same number employed during the entire year form of the number employed in all establishments in the industry are for each of the other selected industries as follows: Carpetings, 2.20; Cotton Goods, 19.65; Leather, 7.96; Machines and Machinery, 5.40; Metals and Metallic Goods, 12.16; Paper and Paper Goods, 10.88; Woollen Goods, 9.24; and Worsted Goods, 0.49. These percentages afford a fair indication of the number of persons employed in establishments in which employ-

ment did not fluctuate during the year, so that month by month the same number of persons appeared on the rolls. They are of value when taken in connection with the other figures relating to employment, although it is plain it does not follow that identical persons were given continuous employment in these establishments during the year, but simply that the working force in the establishment was kept up to the same level month by month. The condition indicated affected a larger proportion of the total average number of employes in Cotton Goods, Metals and Metallic Goods, Paper and Paper Goods, and Woollen Goods than in any of the other leading industries, these four industries ranking in the order named.

WAGES, SALARIES, AND EARNINGS:
BY INDUSTRIES.

WAGES, SALARIES, AND EARNINGS: BY INDUSTRIES.

[This presentation shows the total amount paid in wages, the average number of wage earners employed, and the average amount of yearly earnings; also the total amount paid in salaries, the total number of salaried persons employed, and the average amount paid to each during the Census year, 1895. The proper method of reading this presentation is as follows: In the industry designated "Boots and Shoes" there were 59,829 wage earners employed to whom the sum of \$28,276,255, in the aggregate, was paid; an average for the year of \$472.62 per individual, without regard to sex or age. There were 2,178 salaried persons employed to whom the sum of \$2,315,272 was paid, an average of \$1,063.03 per annum for each individual. Other lines may be read in a similar manner. The average earnings shown in this presentation have been obtained by dividing the total amount paid in wages by the figures representing the average number of wage earners; and similarly, average salaries, by dividing the aggregate amount paid in salaries by the number of persons receiving the same. It should be borne in mind that aggregates under "Wages" represent the sums paid to wage earners only, and do not include the amounts paid to officers, clerks, bookkeepers, salesmen, or other salaried persons. The amounts paid to the latter are given under "Salaries."]

CLASSIFIED WEEKLY WAGES:
BY INDUSTRIES.

CLASSIFIED WEEKLY WAGES: BY INDUSTRIES.

[In this presentation are shown, for each industry and for All Industries, a classification of the weekly wage, ranging from under \$5 per week to \$20 per week and over, and the number of males and females receiving such wage. The returns were made by manufacturers to cover the week during which the largest number of persons was employed. It should be borne in mind that the rates specified were paid to wage earners only; amounts paid to officers, clerks, bookkeepers, salesmen, or other salaried persons are not included.]

TABULAR ANALYSES

FOR THE FOLLOWING PRESENTATIONS:

WAGES, SALARIES, AND EARNINGS: BY INDUSTRIES,	Pages 551-554
CLASSIFIED WEEKLY WAGES: BY INDUSTRIES,	555-564

Wages, Salaries, and Earnings.

The presentation relating to wages, salaries, and earnings, by industries, may be found upon pages 551-554. The reader should refer to the general remarks pertaining to wages, salaries, and earnings, in connection with the analysis, by towns, found upon pages 287-291, which have equal significance as applied to averages of wages and salaries, by industries.

The following analysis table shows the total amount paid in wages in the nine leading industries, in the other industries, and in All Industries, in 1895 and 1885, with the increase noted in amounts and percentages:

INDUSTRIES.	TOTAL AMOUNT PAID IN WAGES		INCREASE (+) IN 1895 AS COMPARED WITH 1885	
	1885	1895	Amounts	Percentages
Boots and shoes,	\$26,916,608	\$28,276,255	+\$1,359,647	+5.05
Carpetings,	1,275,827	1,749,670	+473,843	+37.14
Cotton goods,	16,915,633	27,447,232	+10,531,599	+62.26
Leather,	4,313,674	*4,400,714	+87,040	+2.02
Machines and machinery,	7,249,855	11,624,673	+4,374,818	+60.34
Metals and metallic goods,	11,303,973	11,405,493	+101,520	+0.90
Paper and paper goods,	3,266,023	5,150,118	+1,884,095	+57.69
Woollen goods,	5,688,981	7,129,016	+1,440,035	+25.31
Worsted goods,	2,439,498	4,545,449	+2,105,951	+86.33
Nine industries,	79,370,072	101,728,620	+22,358,548	+28.17
Other industries,	68,045,244	91,241,439	+23,196,195	+34.09
All industries,	147,415,316	192,970,059	+45,554,743	+30.90

* Includes Saddlery and Harness.

The aggregate amount paid in wages in 1895 in the nine leading industries, in the aggregate, was \$101,728,620, an increase of \$22,358,548 over the aggregate amount paid in the same industries in 1885, in which year the total was \$79,370,072, the increase amounting to 28.17 per cent. The wages paid in these nine leading industries constituted 53.84 per cent of the total amount of wages paid in All Industries in 1885, and 52.72 per cent in 1895. In the other industries, in the aggregate, the total amount of wages paid in 1895 was \$91,241,439, as against \$68,045,244, the total amount paid in these industries in 1885, an increase of \$23,196,195, or 34.09 per cent. The increase

in All Industries, taken in the aggregate, was 30.90 per cent. In the nine leading industries, therefore, the percentage of increase was slightly less than the rate obtaining in all the industries consolidated, and considerably less than the rate obtaining in the other industries except the nine specifically mentioned. The total amount of wages paid in Boots and Shoes increased during the decade to the extent of 5.05 per cent; in Leather (including Saddlery and Harness) the increase was 2.02 per cent; and in Metals and Metallic Goods only ninety one-hundredths of one per cent. The rate of increase in the other industries of the group was very much greater than in these three, as will be seen by the percentages which follow: Carpetings, 37.14; Cotton Goods, 62.26; Machines and Machinery, 60.34; Paper and Paper Goods, 57.69; Woollen Goods, 25.31; and Worsted Goods, 86.33.

The following table shows the average yearly earnings in the nine leading industries, in the other industries, and in All Industries, in 1895 and 1885, with the increase noted in amounts and percentages:

INDUSTRIES.	AVERAGE YEARLY EARNINGS		INCREASE (+) IN 1895 AS COMPARED WITH 1885	
	1885	1895	Amounts	Percentages
Boots and shoes,	\$387.12	\$472.62	+\$85.50	+22.09
Carpetings,	303.26	373.70	+70.44	+23.23
Cotton goods,	268.03	330.24	+62.21	+23.21
Leather,	443.34	*482.80	+39.46	+8.90
Machines and machinery,	435.45	538.23	+102.78	+23.60
Metals and metallic goods,	426.76	501.94	+75.18	+17.62
Paper and paper goods,	362.05	408.22	+46.17	+12.75
Woollen goods,	291.64	368.14	+76.50	+26.23
Worsted goods,	292.47	363.52	+71.05	+24.29
Nine industries,	350.29	414.30	+64.01	+18.27
Other industries,	351.87	488.64	+136.77	+38.87
All industries,	351.02	446.41	+95.39	+27.18

* Includes Saddlery and Harness.

It will be seen that an increase is shown in the average yearly earnings in each of the nine leading industries, in the other industries, in the aggregate, and, of course, in All Industries, in the aggregate. The percentages of increase are as follows: In the nine leading industries, in the aggregate, 18.27, and in other industries outside this group, 38.87; while the rate for All Industries, in the aggregate, is 27.18. The increase in each of the nine leading industries expressed in percentages is as follows: Boots and Shoes, 22.09; Carpetings, 23.23; Cotton Goods, 23.21; Leather (including Saddlery and Harness), 8.90; Machines and Machinery, 23.60; Metals and Metallic Goods, 17.62; Paper and Paper Goods, 12.75; Woollen Goods, 26.23; and Worsted Goods, 24.29.

We have pointed out the limitations which attach to an average wage, owing to the fact that in making up such an average no account is taken of differences in sex, age, or skill; but as the averages for both 1895 and 1885 were made up in this way, they may perhaps be fairly compared. No consideration of a figure representing an average wage is complete, however, which does not take into account the different percentages of males and females employed in the different industries, and also the different percentages of hour, day, and piece hands. These elements, of course, materially affect the averages.

The following table shows the percentage of male and female employes in each of the industries, the percentage of hour hands, day hands, and piece hands, respectively, and also the average yearly earnings:

Average Yearly Earnings 1895	INDUSTRIES.	PERCENTAGES					
		PERSONS EMPLOYED		HOUR, DAY, AND PIECE HANDS: BOTH SEXES			
		Males	Females	Hour Hands	Day Hands	Piece Hands

\$446.41	ALL INDUSTRIES,	69.87	30.13	26.73	38.76	34.51	

This table throws some light upon the differences in average yearly earnings in the different industries. For example, the highest average yearly earnings, \$707.39, are found in the industry Models, Lasts, and Patterns, in which 99.44 per cent of the persons employed are males, and 48 per cent of the persons employed are paid by the day. This is an industry in which the skill of the workman is an important factor. On the other hand, the lowest average yearly earnings, \$258.89, are found in the industry Corks, Bungs, and Taps, in which little skill is required, although 91.89 per cent of the employes are males, and 70.73 per cent are paid by the day. In Boots and Shoes, the average yearly earnings are \$472.62, in which 69.35 per cent of the employes are males, and 19.45 per cent of the employes paid by the day; while in Cotton Goods the average yearly earnings are \$330.24, only 49.55 per cent of the employes being males, and only 8.45 per cent of the employes paid by the day. Difference of skill in the different industries is perhaps the most important factor affecting average yearly earnings, but aside from that the relative proportions of males and females are of greatest influence; since, disregarding differences of skill, the lowest rates, as a rule, obtain in those industries in which the largest proportion of females is found.

The following analysis table shows the total amount paid in salaries in 1895 and 1885, in the nine leading industries, in the other industries, and in All Industries, with the increase noted in amounts and percentages:

INDUSTRIES.	TOTAL AMOUNT PAID IN SALARIES		INCREASE (+) IN 1895 AS COMPARED WITH 1885	
	1885	1895	Amounts	Percentages
Boots and shoes,	\$1,146,086	\$2,315,272	+ \$1,169,186	+102.02
Carpetings,	104,589	171,831	+67,242	+64.29
Cotton goods,	917,634	1,817,726	+900,092	+98.09
Leather,	163,206	*399,548	+236,342	+144.81
Machines and machinery,	886,107	1,973,624	+1,087,517	+122.73
Metals and metallic goods,	956,258	1,595,357	+639,099	+66.83
Paper and paper goods,	478,628	1,279,710	+801,082	+167.37
Woollen goods,	565,416	686,846	+121,430	+21.48
Worsted goods,	97,048	372,149	+275,101	+283.47
Nine industries,	5,314,972	10,612,063	+5,297,091	+99.66
Other industries,	5,531,395	13,200,479	+7,669,084	+138.65
All industries,	10,846,367	23,812,542	+12,966,175	+119.54

* Includes Saddlery and Harness.

The total amount paid in salaries in the nine leading industries in 1895 was \$10,612,063, as against \$5,314,972 in 1885, an increase of 99.66 per cent. In the other industries outside the nine leading industries, the increase in the total amount paid in salaries was from \$5,531,395 to \$13,200,479, an increase of 138.65 per cent; while the rate of increase obtaining in All Industries, in the aggregate, was 119.54 per cent. The percentages of increase in the total amount paid in salaries in the nine leading industries, respectively, follow: Boots and Shoes, 102.02; Carpetings, 64.29; Cotton Goods, 98.09; Leather (including Saddlery and Harness), 144.81; Machines and Machinery, 122.73; Metals and Metallic Goods, 66.83; Paper and Paper Goods, 167.37; Woollen Goods, 21.48; and Worsted Goods, 283.47.

The average annual salary per person in each of the years, with the increase or decrease noted in amounts and percentages is shown in the following table:

INDUSTRIES.	AVERAGE ANNUAL SALARIES		INCREASE (+), OR DECREASE (-), IN 1895 AS COM- PARED WITH 1885	
	1885	1895	Amounts	Percentages
Boots and shoes,	\$954.28	\$1,063.03	+ \$108.75	+11.40
Carpetings,	2,050.76	1,952.63	-98.13	-4.79
Cotton goods,	1,778.36	1,931.70	+153.34	+8.62
Leather,	1,059.78	*1,106.78	+47.00	+4.43
Machines and machinery,	1,464.64	1,410.74	-53.90	-3.68
Metals and metallic goods,	1,278.42	1,295.84	+17.42	+1.36
Paper and paper goods,	1,685.31	1,873.66	+188.35	+11.18
Woollen goods,	776.67	1,691.74	+915.07	+117.82
Worsted goods,	1,617.47	1,833.25	+215.78	+13.34
Nine industries,	1,222.68	1,416.07	+193.39	+15.82
Other industries,	1,055.01	1,165.19	+110.18	+10.44
All industries,	1,133.37	1,265.08	+131.71	+11.62

* Includes Saddlery and Harness.

In the nine leading industries considered in the aggregate, the average annual salary in 1895 shows an increase of 15.82 per cent over the average in 1885. In the other industries outside of this group, the increase in the average salary is 10.44 per cent; while the increase in all the industries aggregated is 11.62 per cent. The following industries show percentages of increase in the average salary as annexed: Boots and Shoes, 11.40; Cotton Goods, 8.62; Leather (including Saddlery and Harness), 4.43; Metals and Metallic Goods, 1.36; Paper and Paper Goods, 11.18; Woollen Goods, 117.82; and Worsted Goods, 13.34. On the other hand, the following industries show percentages of decrease: Carpetings, 4.79; and Machines and Machinery, 3.68.

Classified Weekly Wages.

The presentation, pages 555-564, shows a classification of weekly wages, by industries. As stated in connection with the analysis of classified weekly wages, by cities, the returns thus classified are free from the misleading features attaching to averages, and therefore indicate more closely the real conditions as to wages.

The following analysis table shows the relative proportions of males and females in each wage class in 1895 and 1885, for the nine leading industries in detail and in the aggregate, for the other industries, and for All Industries in the aggregate:

INDUSTRIES AND CLASSIFICATION OF WEEKLY WAGE.	1885		1895	
	Males	Females	Males	Females

INDUSTRIES AND CLASSIFICATION OF WEEKLY WAGE.	1885		1895	
	Males	Females	Males	Females
ALL INDUSTRIES—Con.				
\$7 but under \$8,	64.93	35.07	59.49	40.51
\$8 but under \$9,	74.09	25.91	67.04	32.96
\$9 but under \$10,	86.26	13.74	83.24	16.76
\$10 but under \$12,	91.05	8.95	87.99	12.01
\$12 but under \$15,	96.23	3.72	94.93	5.07
\$15 but under \$20,	98.24	1.76	97.88	2.12
\$20 and over,	96.31	3.69	98.88	1.12

The value of the preceding table in showing the changes which have affected the different classes in the industries specified may be seen by reference to the percentages relating to the nine leading industries in the aggregate. For example, of the employés receiving under \$5 per week, 41.37 per cent were males in 1895, as against 35.48 per cent in 1885; and in this class 58.63 per cent of the employés were females in 1895, as against 64.52 per cent in 1885. Of the employés receiving this lowest wage, therefore, the males constituted a larger percentage in 1895 than in 1885, indicating an upward tendency in the wages of females. With respect to the employés receiving \$5 but under \$6, 60.51 per cent were females in 1895, and 63.80 per cent were females in 1885. As to those receiving \$6 but under \$7, 48.91 per cent were females in 1895, as against 53.37 per cent in 1885. In each of these lowest wage classes, therefore, a smaller percentage of the employés were females in 1895 than in 1885. The same statement may be made of the highest wage class, those receiving \$20 and over, one per cent of the employés being females in 1895, as against 3.26 per cent in 1885. As regards the other wage classes, however, that is, those receiving \$7 but under \$8, \$8 but under \$9, \$9 but under \$10, \$10 but under \$12, \$12 but under \$15, and \$15 but under \$20, the females constituted a larger percentage in 1895 than in 1885.

A similar comparison may be made from the table for each of the nine leading industries in detail. The conditions as to the different proportions of males and females in each of the wage classes, respectively, in All Industries, have already been analyzed on page 293.

MOTIVE POWER: BY INDUSTRIES.

MOTIVE POWER: BY INDUSTRIES.

[In this presentation are shown the kinds of motive power used in the manufacturing and mechanical industries of the Commonwealth. They are subdivided as follows: Mechanical Power, Animal Power, Hand Power, Foot Power, and Hired Power. In order to avoid duplicating power already reported in the steam engines, the capacity of the boilers, although presented in the table, was omitted in making up the total horse power. In some respects, the statistics of motive power are incomplete. The reasons therefor are apparent. Those manufacturing and mechanical establishments having steam boilers or engines on their own premises made returns for the same, but establishments using "hired power" made returns only of capacity for which they paid, while for establishments engaged in furnishing power to manufacturers as a business, or carrying on same in connection with trade, it is obvious that no returns would be made. Consequently, the steam power actually used in manufactures is undoubtedly greater than as given in this presentation. The number of persons running machinery by hand or foot power is also probably largely understated. No return of motive power was made for the industry "Fine Arts and Taxidermy." A recapitulation showing hired power appears on pages 583, 584.]

INDUSTRIES AND KINDS OF MOTIVE POWER.	Number	Horse Power (Full Capacity)	INDUSTRIES AND KINDS OF MOTIVE POWER.	Number	Horse Power (Full Capacity)

MACHINERY AND TOOLS: BY INDUSTRIES.

MACHINERY AND TOOLS: BY INDUSTRIES.

[The value of implements, tools, and machinery (including machinery used for supplying motive power) in use in the Commonwealth during the Census year, 1895, is shown in the following presentation. It is classified as of home and foreign manufacture, separately, so as to permit comparisons.]

INDUSTRIES.	VALUE OF MACHINERY, IMPLEMENTS, AND TOOLS		
	Home Manufacture	Foreign Manufacture	Total Value
Agricultural implements,	\$153,262	—	\$153,262
Arms and ammunition,	832,252	\$800	833,052
Artisans' tools,	1,346,074	—	1,346,074
Awnings, sails, tents, etc.,	18,765	—	18,765
Boots and shoes,	6,996,923	430	6,997,353
Boxes (paper and wooden),	1,015,353	1,600	1,016,953
Brick, tiles, and sewer pipe,	832,463	1,820	834,283
Brooms, brushes, and mops,	119,239	—	119,239
Building,	2,369,434	572	2,370,006
Burial cases, caskets, coffins, etc.,	35,132	—	35,132
Buttons and dress trimmings,	324,599	100	324,699
Carpetings,	1,699,406	424,186	2,123,592
Carriages and wagons,	1,599,963	1,695	1,601,658
Cement, kaolin, lime, and plaster,	24,457	—	24,457
Charcoal and kindlers,	2,847	—	2,847
Chemical preparations (compounded),	584,353	13,000	597,353
Clocks, watches, and jewelry,	2,554,216	1,455	2,555,671
Clothing,	1,317,299	950	1,318,249
Concrete walks, paving, etc.,	23,301	—	23,301
Cooking, lighting, and heating apparatus,	464,788	—	464,788
Cordage and twine,	1,491,822	137,500	1,629,322
Corks, bungs, and taps,	8,400	—	8,400
Cotton goods,	45,729,114	8,930,118	54,659,232
Cotton, woollen, and other textiles,	1,466,108	—	1,466,108
Crayons, pencils, crucibles, etc.,	17,466	—	17,466
Drugs and medicines,	443,118	105	443,223
Dyestuffs,	141,002	—	141,002
Earthen, plaster, and stone ware,	42,218	—	42,218
Electrical apparatus and appliances,	1,264,123	1,241	1,265,364
Electroplating,	73,081	—	73,081
Emery and sand paper and cloth, etc.,	164,688	—	164,688
Fancy articles, etc.,	71,982	100	72,082
Fertilizers,	47,718	—	47,718
Fine arts and taxidermy,	4,718	—	4,718
Fireworks and matches,	39,575	—	39,575
Flax, hemp, jute, and linen goods,	400,208	136,410	536,618
Food preparations,	4,118,006	89,668	4,207,674
Furniture,	1,160,151	—	1,160,151
Gas and residual products,	14,316,378	—	14,316,378
Glass,	30,550	714	31,264

MACHINERY AND TOOLS : BY INDUSTRIES — Concluded.

INDUSTRIES.	VALUE OF MACHINERY, IMPLEMENTS, AND TOOLS		
	Home Manufacture	Foreign Manufacture	Total Value
Glue, isinglass, and starch,	\$372,569	\$750	\$373,319
Hair work (animal and human),	34,348	2,000	36,348
Hose: rubber, linen, etc.,	226,064	—	226,064
Hosiery and knit goods,	1,224,611	156,045	1,380,656
Ink, mucilage, and paste,	28,883	500	29,383
Ivory, bone, shell, and horn goods, etc.,	118,384	—	118,384
Leather,	1,596,519	8,150	1,604,669
Liquors and beverages (not spirituous),	370,614	—	370,614
Liquors: malt, distilled, and fermented,	3,140,921	135,303	3,276,224
Lumber,	754,651	1,250	755,901
Machines and machinery,	12,823,982	158,788	12,982,770
Metals and metallic goods,	9,629,035	7,141	9,636,176
Mixed textiles,	315,069	—	315,069
Models, lasts, and patterns,	214,108	—	214,108
Musical instruments and materials,	639,741	—	639,741
Oils and illuminating fluids,	60,397	—	60,397
Paints, colors, and crude chemicals,	219,097	240	219,337
Paper and paper goods,	9,347,932	31,050	9,378,982
Perfumes, toilet articles, etc.,	7,812	—	7,812
Photographs and photographic materials,	380,327	41,674	422,001
Polishes and dressing,	410,502	—	410,502
Printing, publishing, and bookbinding,	7,039,354	18,815	7,058,169
Print works, dye works, and bleacheries,	3,917,696	40,900	3,958,596
Railroad construction and equipment,	1,244,656	1,000	1,245,656
Rubber and elastic goods,	2,693,855	117,383	2,811,238
Saddlery and harness,	102,582	200	102,782
Scientific instruments and appliances,	466,435	4,175	470,610
Shipbuilding,	439,153	900	440,053

PROPORTION OF BUSINESS DONE
AND DAYS IN OPERATION:
BY INDUSTRIES.

PROPORTION OF BUSINESS DONE AND DAYS IN OPERATION: BY INDUSTRIES.

[The figures given in the second column of this presentation represent the average proportion of business done by each establishment engaged in the manufacturing and mechanical industries of the Commonwealth during the year ending December 31, 1895. Greatest capacity, or maximum production, has been considered as 100 per cent, and the percentages given indicate the average proportion of business done on that basis. The figures given in the third column represent the average number of days each establishment was in operation during the year. Days in operation are based upon persons employed, the number of days for each establishment being multiplied by the figures representing the average number of persons, and the sum of these results divided by the aggregate average number of persons, an average for each industry and for All Industries being thus obtained.]

INDUSTRIES.	Average Proportion of Busi- ness Done	Average Number of Days in Operation
Agricultural implements,	48.44	280.44
Arms and ammunition,	54.04	289.31
Artisans' tools,	52.78	283.86

GENERAL STATISTICS OF MANUFACTURES:
BY INDUSTRIES. FOR CITIES.

GENERAL STATISTICS OF MANUFACTURES: BY INDUSTRIES. FOR CITIES.

[The information given in preceding Industry Presentations relating to Number of Establishments (pages 365-368), Partners and Stockholders (pages 461-466), Amount of Capital Invested (pages 479-484), Value of Stock Used (pages 485-488), Value of Goods Made and Work Done (pages 489-496), Average Number of Persons Employed (pages 509-512), and Total Amount Paid in Wages (pages 551-554) is brought together in the following presentation for the 32 cities and for the State. In order that facts regarding individual establishments may not be disclosed, it has been deemed advisable to omit all those industries in which there were less than three establishments from the individual showing, and to include them in the line "Other Industries." In the consideration of this presentation or in its use for purposes of comparison, reference should be made to the explanatory pages, head-notes, and foot-notes of the various industry presentations, for which reference pages are given above, and also to the "Tabular Analyses." Similar presentations for the towns of the Commonwealth can be prepared from information in the office and will be supplied, upon request, subject to the limitation regarding the presentation of facts for less than three establishments in an industry.]

CITY OF BEVERLY—COUNTY OF ESSEX.

INDUSTRIES.	Num- ber of Es- tablish- ments	Num- ber of Partners and Stock- holders	Amount of Capital Invested	Value of Stock Used	Value of Goods Made and Work Done	Average Num- ber of Persons Em- ployed	Total Amount Paid in Wages

GENERAL STATISTICS OF MANUFACTURES.
FOR SELECTED INDUSTRIES.

GENERAL STATISTICS OF MANUFACTURES. FOR SELECTED INDUSTRIES.

[In the following presentation, general statistics of manufactures for 19 selected industries are given for certain specified cities and towns. Under each of the industry heads are presented the number of establishments, number of partners and stockholders, amount of capital invested, value of stock used, value of goods made and work done, average number of persons employed, and total amount paid in wages. In order that facts regarding individual establishments may not be disclosed, it has been deemed advisable to omit from this presentation all towns having a representation of less than three establishments in an industry, and to include such in the line "Other cities and towns." In some cases it was necessary to omit even towns which had three establishments for the same reason. In the consideration of this presentation or in its use for purposes of comparison, reference should be made to the explanatory pages, head-notes, and foot-notes of the various industry presentations, and also to the "Tabular Analyses." Similar presentations for other industries can be prepared from information in the office and will be supplied, upon request, subject to the above limitation.]

TABULAR ANALYSES

FOR THE FOLLOWING PRESENTATIONS:

	Pages
MOTIVE POWER: BY INDUSTRIES,	575-584
MACHINERY AND TOOLS: BY INDUSTRIES,	585-588
PROPORTION OF BUSINESS DONE AND DAYS IN OPERATION: BY INDUSTRIES,	589-592
GENERAL STATISTICS OF MANUFACTURES: BY INDUSTRIES. FOR CITIES,	593-608
GENERAL STATISTICS OF MANUFACTURES. FOR SELECTED INDUSTRIES,	609-626

Motive Power.

The statistics of motive power, by industries, are presented on pages 575-584. As in the presentation of the subject, by towns, the kinds of motive power are subdivided as follows: Mechanical power, animal power, hand power, foot power, and hired power. The note at the head of the presentation should be carefully read, in order to prevent misconception as to the figures. The facts as to All Industries appear on page 583, but being identical with the data covering motive power, by towns, which have already been fully explained in the analysis, pages 341-349, do not require further attention here.

The following table shows the motive power in the nine leading industries, in the other industries, and in All Industries, with comparative figures as to horse power for 1895 and 1885, the increase or decrease being noted both in number and percentages:

INDUSTRIES AND CLASSIFICATION OF MOTIVE POWER.	HORSE POWER (FULL CAPACITY)		INCREASE (+), OR DECREASE (-), IN 1895 AS COM- PARED WITH 1885	
	1885	1895	Number	Percentages
<i>Boots and Shoes.</i>				
Mechanical power,	14,632½	15,551½	+919	+6.28
Steam engines,	13,633	14,712½	+1,079½	+7.92

In the nine leading industries aggregated, the full capacity of the mechanical power employed in 1885 was 304,932 horse power, rising to 469,408 $\frac{1}{2}$ horse power in 1895, an increase of 53.94 per cent. The horse power in steam engines increased 71.01 per cent; in water wheels 20.84 per cent; while electric motors have increased at a rate which is entirely abnormal, the horse power of this kind reported in 1885 being but three, while the returns for 1895 show 3,037 $\frac{1}{4}$ horse power. The number of persons reported as running hand power machines in these industries was 770 in 1885, increasing to 1,544 in 1895, a gain of over 100 per cent, but, as remarked in the note at the head of the presentation, page 577, the number of persons reported as engaged on hand power machines was probably understated in both years. The same qualification applies also to persons employed in running foot power machines, the number of which has declined from 759, reported in 1885, to 452 in 1895, a decrease of 40.45 per cent.

The figures for the nine leading industries, in the aggregate, which we have just cited, may be compared with the corresponding figures for all the other industries aggregated, the total horse power in these other industries being 146,797 $\frac{1}{4}$ in 1885, and 207,384 $\frac{1}{4}$ in 1895, a gain of 41.27 per cent. The gain in the horse power in steam engines amounted to 43.05 per cent; in water wheels, 12.86 per cent; while the horse power in electric motors rose from 55, the amount reported in 1885, to 9,046 $\frac{7}{8}$ in 1895.

For the nine leading industries in detail, the changes in the amount of horse power reported in the aggregate are as follows: Boots and Shoes, 14,632 $\frac{1}{2}$ in 1885, increasing to 15,551 $\frac{1}{2}$ in 1895, a gain of 6.28 per cent; Carpetings, 4,033 in 1885, rising to 5,437 in

1895, a gain of 34.81 per cent; Cotton Goods, 133,651½ in 1885, rising to 239,015 in 1895, a gain of 78.83 per cent; Leather, including Saddlery and Harness, 11,105½ in 1885, and 11,147 in 1895, a very slight gain, amounting to only thirty-seven one-hundredths of one per cent; Machines and Machinery, 13,755½ in 1885, rising to 20,853½ in 1895, a gain of 51.60 per cent; Metals and Metallic Goods, 35,157½ in 1885, rising to 39,869 in 1895, a gain of 13.40 per cent; Paper and Paper Goods, 51,802½ in 1885, rising to 75,135½ in 1895, a gain of 45.04 per cent; Woollen Goods, 29,556 in 1885, rising to 39,578 in 1895, a gain of 33.91 per cent; and Worsted Goods, 11,238 in 1885, rising to 22,822 in 1895, a gain of 103.08 per cent. No electric motive power was reported in the boot and shoe industry in 1885, but 596 horse power in such motors was returned in 1895; in Carpetings no power of this kind was reported in either year; in Cotton Goods, none in 1885, but 498 in 1895; in Leather, including Saddlery and Harness, none in 1885, but 26 in 1895; in Machines and Machinery, two horse power in 1885, and 471½ in 1895; in Metals and Metallic Goods, one horse power in 1885, and 951 in 1895; in Paper and Paper Goods, none in 1885, but 147½ horse power in 1895; in Woollen Goods, none in 1885, but 136 horse power in 1895; and in Worsted Goods, none in 1885, but 211 horse power in 1895. The horse power delivered from water wheels has declined in the boot and shoe industry, in Leather (including Saddlery and Harness), and in Metals and Metallic Goods, and increased in Carpetings, Cotton Goods, Machines and Machinery, Paper and Paper Goods, Woollen Goods, and Worsted Goods.

The recapitulation, pages 583, 584, shows the character of the hired motive power in use in the different industries. As stated in the note on page 577, establishments using hired power made return only of the amount of such power for which they paid, without regard to the aggregate capacity of the plant from which such hired power was obtained. The industry reporting the largest amount of hired power is Boots and Shoes, the aggregate horse power reported being 3,545, in use in 329 establishments; of this horse power, 3,379½ is steam and 165½ electric. Next to the boot and shoe industry with respect to the aggregate amount of hired power used, is Machines and Machinery, the aggregate horse power hired, as reported, being 1,312½. In Wooden Goods 998 horse power is reported hired; in Metals and Metallic Goods, 800; in Building, 724, and in Printing, Publishing, and Bookbinding, 716½ horse power. Other industries reporting comparatively large amounts of hired power, although less in the aggregate than those which we have especially noted, are: Food Preparations, 570½; Electrical Apparatus and Appliances, 558½; Leather, 542½; Furniture, 533½; and Clocks, Watches, and Jewelry, 433½.

Machinery and Tools.

The presentation, pages 585-588, presents the value of implements, tools, and machinery (including machinery used for supplying motive power) in use in the Commonwealth during the Census year, 1895, by industries, classified as of home and foreign manufacture separately, so as to permit comparisons. The conditions obtaining in the nine leading industries, in the other industries, and in All Industries are shown in the following analysis table:

INDUSTRIES.	VALUE OF MACHINERY, IMPLEMENTS, AND TOOLS		PERCENTAGES	
	Home Manufacture	Foreign Manufacture	Home Manufacture	Foreign Manufacture
Boots and shoes,	\$6,996,923	\$430	99.99	0.01
Carpetings,	1,699,406	424,186	80.03	19.97
Cotton goods,	45,729,114	8,930,118	83.66	16.34
Leather,	1,596,519	8,150	99.49	0.51
Machines and machinery,	12,823,982	158,788	98.78	1.22
Metals and metallic goods,	9,629,035	7,141	99.93	0.07
Paper and paper goods,	9,347,932	31,050	99.67	0.33

INDUSTRIES.	VALUE OF MACHINERY, IMPLEMENTS, AND TOOLS		PERCENTAGES	
	Home Manufacture	Foreign Manufacture	Home Manufacture	Foreign Manufacture
Woollen goods,	\$6,982,502	\$119,810	98.31	1.69
Worsted goods,	2,792,706	2,641,615	51.39	48.61
Nine industries,	97,598,119	12,321,188	88.79	11.21
Other industries,	67,804,557	1,011,590	98.53	1.47
All industries,	165,402,676	13,332,778	92.54	7.46

In the nine industries, in the aggregate, the value of machinery, implements, and tools of home manufacture is \$97,598,119, and of foreign manufacture, \$12,321,188; that is, only 11.21 per cent is of foreign manufacture. In Carpetings, 19.97 per cent is of foreign manufacture; in Cotton Goods, 16.34 per cent; and in Worsted Goods, 48.61 per cent. In each of the other nine leading industries, the percentage of machinery, implements, and tools of foreign manufacture is insignificant as compared with the aggregate value. The value of machinery, implements, and tools in Cotton Goods is very much greater than in any of the other industries, being \$54,659,232. Next to Cotton Goods in this respect ranks Gas and Residual Products, in which, as shown by the table, page 586, the total value of machinery, implements, and tools is \$14,316,378, all of which is of home manufacture. The aggregate value of machinery, implements, and tools in other industries in which large values are returned is as follows, the figures being reproduced from the table, pages 586, 587: Boots and Shoes, \$6,997,353; Food Preparations, \$4,207,674; Liquors: malt, distilled, and fermented, \$3,276,224; Machines and Machinery, \$12,982,770; Metals and Metallic Goods, \$9,636,176; Paper and Paper Goods, \$9,378,982; Printing, Publishing, and Bookbinding, \$7,058,169; Print Works, Dye Works, and Bleacheries, \$3,958,596; Rubber and Elastic Goods, \$2,811,238; Woollen Goods, \$7,102,312; and Worsted Goods, \$5,434,221. No other industry presents an aggregate value of machinery, implements, and tools in excess of two and one-half millions, except Clocks, Watches, and Jewelry, in which the aggregate is \$2,555,671.

Proportion of Business Done.

The proportion of business done and days in operation, by industries, forms the subject of the presentation, pages 589-592. We bring forward for the nine leading industries previously considered, the percentages indicating the average proportion of business done in 1895, in comparison with similar figures for 1885, with the increase or decrease noted.

INDUSTRIES.	AVERAGE PROPORTION OF BUSINESS DONE		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885	
	1885	1895	Proportion	Percentages
Boots and shoes,	62.38	51.80	-10.58	-16.96
Carpetings,	64.07	69.64	+5.57	+8.69
Cotton goods,	80.53	84.16	+3.63	+4.61
Leather,	63.84	*50.58	-13.26	-20.77
Machines and machinery,	49.31	54.98	+5.67	+11.50
Metals and metallic goods,	54.82	48.58	-6.24	-11.38
Paper and paper goods,	78.99	69.37	-9.62	-12.18
Woollen goods,	74.42	78.31	+3.89	+5.23
Worsted goods,	67.00	85.06	+18.06	+26.96
Nine industries,	61.99	53.15	-8.84	-14.26
Other industries,	56.80	49.08	-7.72	-13.59
All industries,	59.27	50.05	-9.22	-15.56

* Includes Saddlery and Harness.

In order to understand exactly what is meant by proportion of business done, the reader should refer to the analysis in connection with the returns by towns, page 350. It is sufficient to say here that 100 represents the amount of production possible in the establishments as they now exist, if supported by a sufficient demand for goods, the variation from 100 indicating the average proportion of business done under market conditions as they existed during the Census year. For example, in the nine leading industries, in the aggregate, the average proportion of business done for the year 1895 is represented by 53.15; that is to say, it amounted to 53.15 per cent of what might have been done had business conditions warranted, without enlarging the capacity of the manufacturing plants. In the other industries, as a whole, the average proportion of business done for the year 1895 was 49.08 per cent, and for All Industries the percentage was 50.05. Apparently, therefore, slightly better conditions obtained in the nine leading industries of the State than in All Industries in the aggregate, and still better than in industries outside these nine. The average proportion of business done in All Industries in 1885 was 59.27, showing a change in the ratio of 9.22, this change being a decrease, and representing an actual decline of 15.56 per cent as between the years. In Boots and Shoes the average proportion of business done in 1895, upon the basis used in the table, which, we repeat, is practically a percentage upon the actual capacity of the establishments, was 51.80, as against 62.38 in 1885; in Leather (including Saddlery and Harness), 50.58, as against 63.84; in Metals and Metallic Goods, 48.58, as against 54.82; and in Paper and Paper Goods, 69.37, as against 78.99. All these industries, therefore, show a smaller average proportion of business done in comparison with the capacity of the establishment in 1895 than in 1885, due, in part, to the exceptional business depression in the later year. On the other hand, the following among the nine leading industries show increases: Carpetings, 69.64, as against 64.07; Cotton Goods, 84.16, as against 80.53; Machines and Machinery, 54.98, as against 49.31; Woollen Goods, 78.31, as against 74.42; and Worsted Goods, 85.06, as against 67. The statement made upon pages 350, 351 should be repeated, however, namely, that upon this point the returns in 1895 are more full, as well as more accurate, than those obtained in 1885; which fact, no doubt, influences the comparison between the two years to a certain extent.

Days in Operation.

The average number of days in operation, for the nine leading industries, the other industries, and All Industries, is shown in the following analysis table, in comparison with similar figures for the year 1885:

INDUSTRIES.	AVERAGE NUMBER OF DAYS IN OPERATION		INCREASE (+), OR DECREASE (-), IN 1895 AS COM- PARED WITH 1885	
	1885	1895	Number	Percentages
Boots and shoes,	291.12	283.81	-7.31	-2.51
Carpetings,	260.67	299.61	+38.94	+14.94
Cotton goods,	278.03	297.24	+19.21	+6.91
Leather,	296.48	*292.30	-4.18	-1.41
Machines and machinery,	292.62	297.92	+5.30	+1.81
Metals and metallic goods,	297.72	288.33	-9.39	-3.15
Paper and paper goods,	287.76	286.86	-0.90	-0.31
Woollen goods,	268.87	290.39	+21.52	+8.00
Worsted goods,	274.26	305.16	+30.90	+11.27
Nine industries,	293.13	292.36	-0.77	-0.26
Other industries,	290.09	285.41	-4.68	-1.61
All industries,	291.00	289.32	-1.68	-0.58

* Includes Saddlery and Harness.

The average number of days in operation for the nine leading industries, as a whole, during the Census year, 1895, was 292.36; for the other industries, in the aggregate,

285.41; and for All Industries 289.32. The corresponding figure for All Industries in 1885 was 291 days. This shows a slight decline in the number of days in operation for All Industries, in the aggregate, in 1895 as compared with 1885, previously brought out in connection with the analysis by towns; but, although the decline is slight, it will be remembered that the proportion of business done during the days in operation shows a percentage of decline considerably in excess of the decline in the number of days.

Of the industries in the selected group, Boots and Shoes, Leather, Metals and Metallic Goods, and Paper and Paper Goods show a smaller average number of days in operation in 1895 than in 1885, the decrease in Paper and Paper Goods, however, being very slight. On the other hand, in Carpetings the number of days in operation in 1895 shows an increase of 38.94 as compared with 1885, in which year that industry was much depressed. The same general statement applies to the other textile industries, Cotton Goods, Woollen Goods, and Worsted Goods, in each of which a substantial gain in the number of days in operation in 1895 as compared with 1885 is noted.

General Statistics of Manufactures.

The general statistics of manufactures for cities, by industries, is presented upon pages 593-626. This presentation varies from the general statistics of manufactures given by cities upon pages 333-349, which was confined to aggregates. Within it the information given in the preceding presentations, by industries, relating to the number of establishments, number of partners and stockholders, amount of capital invested, value of stock used, value of goods made and work done, average number of persons employed, and total amount paid in wages, is brought together for each of the 32 cities and for the State. As stated in the note at the head of the presentation, similar condensed statements for any of the towns of the Commonwealth can be prepared from information in the office, and will be supplied upon request, although omitted from this volume on account of considerations of space.

The section of the presentation, pages 609-626, contains general statistics of manufactures for certain specified cities and towns under 19 selected industry heads. This presentation enables the reader to trace the localities in which these industries are chiefly carried on, and also to compare the relative importance of the different municipalities, so far as relates to the specified industries. If desired, similar presentations for other industries can be supplied by the Census office, but the industries included in this presentation cover in the aggregate 83.01 per cent of the total output and 82 per cent of the persons employed in the Commonwealth.

The series of tables which follows permits a comparison as to the value of the goods made and work done in 1885 and 1895, in Boots and Shoes, Cotton Goods, Leather, Paper and Paper Goods, Woollen Goods, and Worsted Goods, being arranged so as to show, under each industry title, the cities and towns in which the industry is an important factor, with the increase or decrease during the decade stated in amounts and percentages. The tables also show in the last two columns the percentage which the product in each of the cities and towns named forms of the total product for the State in the industry specified in each Census year.

The first table of the series relates to Boots and Shoes.

Boots and Shoes.

CITIES AND TOWNS.	VALUE OF GOODS MADE AND WORK DONE		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885		CITY AND TOWN PERCENTAGES OF TOTAL PRODUCT	
	1885	1895	Amounts	Percentages	1885	1895

* Less than one one-hundredth of one per cent. † Not including the value of goods made in Avon, \$434,928.

The cities and towns presented in detail in the above table produced 91.45 per cent of the entire output for the State in Boots and Shoes in 1895. In the same cities and towns, 89 per cent was returned in 1885. The following cities and towns returned the largest percentages of product in both of the Census years: Brockton, 1895, 14.54; 1885, 9.66—Haverhill, 1895, 13.13; 1885, 11.82—Lynn, 1895, 18.59; 1885, 20.54. The output in Brockton and Haverhill, therefore, shows an increase, while that in Lynn shows a slight decline.

In considering the percentages of increase or decrease it should be borne in mind that during the Census year the industry was much depressed, and also that the comparison turns on values, not on quantities, possible declines in prices being an important factor in the comparison. This last statement, of course, applies also to the succeeding tables.

The next table relates to Cotton Goods.

Cotton Goods.

CITIES AND TOWNS.	VALUE OF GOODS MADE AND WORK DONE		INCREASE (+), OR DECREASE (-), IN 1895 AS COMPARED WITH 1885		CITY AND TOWN PERCENTAGES OF TOTAL PRODUCT

Other cities and towns, .	17,686,810	17,461,599	-225,211	-1.27	28.79	18.65

The cities and towns named in detail returned 81.35 per cent of the total output for the State in 1895, and 71.21 per cent in 1885, the leading cities being as follows, the percentages for each Census year being annexed in each case: Fall River, 1895, 28.20; 1885, 25.51—Lowell, 1895, 18.70; 1885, 15.92—New Bedford, 1895, 13.72; 1885, 7.12. The product in each of these cities shows an increase.

The next table relates to Leather.

*Leather.**

* Includes Saddlery and Harness.

The cities and towns named in detail returned 75.26 per cent of the total output for the State in 1895, and 79.04 per cent in 1885, the highest percentages appearing as follows: Lynn, 1895, 9.25; 1885, 11.89—Peabody, 1895, 14.77; 1885, 14.45—Salem, 1895, 10.82; 1885, 14.96—Woburn, 1895, 14.31; 1885, 19.48. It will be seen that declines appear in all except Peabody, in which a fractional gain is noted.

A table relating to Paper and Paper Goods follows:

Paper and Paper Goods.

CITIES AND TOWNS.	VALUE OF GOODS MADE AND WORK DONE		INCREASE (+), OR DECREASE (—), IN 1895 AS COMPARED WITH 1885		CITY AND TOWN PERCENTAGES OF TOTAL PRODUCT

Other cities and towns, .	2,831,422	6,252,319	+3,420,897	+120.82	25.29	29.81

Of the entire output for the State, 70.19 per cent was returned from the three cities named in 1895, and 74.71 per cent in 1885, 53.55 per cent of the entire output appearing in Lawrence in 1895, as against 51.79 per cent in 1885.

We next present for the nine leading industries a comparison of the value of goods made and work done, for each of the Census years, beginning with 1837, when statistics of manufactures were first collected.

It should be borne in mind that the returns prior to 1875 are neither so full nor so accurate as those obtained since, and the comparison is affected also by differences of classification in the different Censuses. The first condition cannot, of course, be changed, but we have endeavored to re-classify the products returned in the Census years prior to 1895 so as to be fairly comparable with returns made in that year. The currency values originally given for the Census years 1865 and 1875 have been reduced to a gold basis, so as to eliminate the fluctuating values of currency in those years, the average value of the currency dollar being \$1.57 in 1865 and \$1.12 in 1875.

INDUSTRIES AND YEARS.	Value of Goods Made and Work Done	INDUSTRIES AND YEARS.	Value of Goods Made and Work Done
<i>Boots and Shoes.</i>		<i>Cotton Goods.</i>	
1837,	\$14,642,520	1837,	\$13,225,880

		1895,	20,975,996

No extended review is necessary with respect to the foregoing table. No return was made as to Carpetings or Worsted Goods in 1837, all woollen products being classified under the head of "Woollen Goods" in that year. In order to make the comparison for the leather industry uniform, the manufacture of Saddlery and Harness has been included within it in each Census year.

We close this analysis by introducing a table which brings together in form admitting of ready comparison, the percentages indicating for the nine leading industries in detail and in the aggregate, the amount of capital invested, value of stock used, value of goods made and work done, average number of persons employed, and total amount paid in wages, of the total amount in the State.

INDUSTRIES.	PERCENTAGES				
	Amount of Capital Invested	Value of Stock Used	Value of Goods Made and Work Done	Average Number of Persons Employed	Total Amount Paid in Wages
Boots and shoes,	6.04	16.32	14.37	13.84	14.65
Carpetings,	1.19	0.97	0.88	1.08	0.91
Cotton goods,	22.86	10.50	11.02	19.23	14.22
Leather,*	1.89	3.89	3.02	1.89	2.03
Machines and machinery,	6.19	2.80	3.94	5.00	6.02
Metals and metallic goods,	5.53	3.73	4.74	5.26	5.91
Paper and paper goods,	5.30	3.71	3.29	2.92	2.67
Woollen goods,	4.83	3.71	3.46	4.48	3.70
Worsted goods,	3.06	2.91	2.47	2.89	2.36
Nine industries,	56.89	48.54	47.19	56.59	52.47
Other industries,	43.11	51.46	52.81	43.41	47.53
All industries,	100.00	100.00	100.00	100.00	100.00

* Saddlery and Harness not included.

Summarizing the facts contained in the preceding table, it is apparent that the nine leading industries contain 56.89 per cent of the total amount of industrial capital invested in the Commonwealth, consume 48.54 per cent of the stock, turn out 47.19 per cent of goods made and work done, employ 56.59 per cent of the average number of persons employed, and return 52.47 per cent of the total amount paid in wages. Cotton Goods alone requires 22.86 per cent of the capital, ranking first in this respect, followed by the other industries, each having a percentage of capital invested as indicated by the figures annexed: Machines and Machinery, 6.19; Boots and Shoes, 6.04; Metals and Metallic Goods, 5.53; Paper and Paper Goods, 5.30; Woollen Goods, 4.83; Worsted Goods, 3.06; Leather, 1.89; and Carpetings, 1.19. With respect to the percentages of value of stock used of the total value used in All Industries, the industries rank as follows: Boots and Shoes, 16.32; Cotton Goods, 10.50; Leather, 3.89; Metals and Metallic Goods, 3.73; Paper and Paper Goods, 3.71; Woollen Goods, 3.71; Worsted Goods, 2.91; Machines and Machinery, 2.80; and Carpetings, 0.97. As to the value of goods made and work done, the boot and shoe industry stands at the head, turning out 14.37 per cent of the total value of output in the State, the other industries ranking as follows: Cotton Goods, 11.02; Metals and Metallic Goods, 4.74; Machines and Machinery, 3.94; Woollen Goods, 3.46; Paper and Paper Goods, 3.29; Leather, 3.02; Worsted Goods, 2.47; and Carpetings, 0.88. With respect to the average number of persons employed, Cotton Goods leads, with 19.23 per cent of the total number employed in All Industries, followed by Boots and Shoes, 13.84, and by the other industries in order named: Metals and Metallic Goods, 5.26; Machines and Machinery, 5; Woollen Goods, 4.48; Paper and Paper Goods, 2.92; Worsted Goods, 2.89; Leather, 1.89; and Carpetings, 1.08.
